The bags had been wheeled across a flat to the boat, and at the time of the accident the flat was being loaded. Mr. J. G. Wright, shipping clerk for Messrs. G. W. Williams & Co., was on the boat, and he and the engineer sprang on the flat. Mr. Wright was slightly hurt. Mr. Smith had to feel his way out of the room, which was quickly filled with a dense smoke Part of the boiler in its upward flight struck the top-mast of the schooner Nellie Potter, lying close to the boat, and broke it off. The smoke-stack was blown to atoms. The furniture went down with the boat, but a good deal of it was subsequently fished out. The boat went down in about one minute after the explosion. Several persons jumped into the river besides those that were drowned. Mr. L. B. Love, assistant engineer, got jammed between the cabin of the boat and a schooner and made a narrow escape from being carried down with the wreck. One of his hands was pretty badly bruised. At the time of the accident Capt. Jeff. Robeson was on this side of the river, attending to some business. The boat is a complete wreck, the hull, it is thought, being broken in twain. She was owned principally by Capts. W. A. and J. D. Robeson, but Mr. Smith, the engineer, also owned an interest in her. She was valued at from \$8,000 to \$10,000, and was insured for \$5,000. Much sympathy is felt among the many friends of the owners on account of their loss, and much regret is felt at the loss of life. We are extremely gratified at the truly patriotic utterances of the President as to a faithful adherence to the Constitution. It is a long time since any Chief Executive ex hibited in words such a comprehen sion of the importance of maintaining Constitutional methods and limitations. It is indeed a most auspicious circuinstance when we hear the new President so emphatically declaring:

"In the discharge of my official duty I shall endeavor to be guided by a just and unstrained construction of the constitution, a careful observance of the distinction be tween the powers granted to the Federal government and those reserved to the States, or to the people, and by a cautious appreciation of those functions which by the constitution and laws have been espe cially assigned to the Executive branch of the government."

Equally pertinent and impressive are his remarks as to the loyalty and fidelity of all citizens to the Constitution of their country. The duties of citizenship have rarely been more felicitously and tersely emphasized. There are some noble sentiments that. should be blazoned upon banners, and, what is more important, should be expressed in the constant action of the people. Hear the President of the United States:

"The constitution which prescribes his oath, my countrymen, is yours; the government, you have chosen him to dminister for a time, is yours; the suf frage, which executes the will of freemen is yours; the laws and the entire scheme ( our civil ru'e, from the town meeting to the State capital and the National capital, is yours. Every citizen owes to the country a vigilant watch and close scrutiny of its public servants, and a fair and reasonable estimate of their fidelity and usefulness. Thus is the peo-ple's will impressed upon the whole framework of our civic polity-municipal, State and Federal; and this is the price of our liberty and the inspiration of our faith i

Supreme Court, head-ed by Chief Justice Waite, called about 12 o'clock and were received in the blue parlor. Members of the National Democratic committee were next received. Many other prominent persons called to pay their respects and kept the President engaged during the entire day.

No changes have as yet been made in the force employed at the White House. The President's mail was very large. It consisted principally of letters of congratu-lation. Many of them, however, related to Later in the day the Democratic Phalanx of Albany called on the President in a

The President then gave notice that he would receive all who might choose to call between the hours of 2 and 4 o'clock, and during that time hours of s and 40 clock, and during that time housands of strangers paid their respects to the Chief Magistrate. The President received them in the east room and shook hands with each of them. The crowd filed past in single file, and owing to the immense number presenting themselves it was found necessary to dispense with the formality of an introduc-tion. The President, however, recognized many acquaintances in the line, and greeted them by name. There was a large number of colored people among the visitors. The President was attended by Marshal McMi-chael and Col. Rockwell. He bore the try-

All the members of ex-President Arthur's Cabinet, with the exception of Secretaries Frelinghuysen and Teller, occupied their usual desks to-day and attended to all business requiring action at their hands. Sec-retary Frelinghuysen was detained at home by ill health and Senator Teller, whose resignation as Secretary of the Interior was accepted yesterday, was at the capitol. Those on duty received many callers and took occasion during the day to take official leave of bureau officers and other employes. Such exact figures as are obtainable indi-

cate that all estimates of the number of strangers in Washington yesterday were much below the actual number. Figures furnished by the Baltimore & Ohio and the Pennsylvania Railroads show that these two roads alone brought from or through Baltimore 105,000 persons yesterday. Add to this number those who have been flocking to the city for several days previous, over these roads, and from the West over the Baltimore & Ohio, and over the Virginia roads and steamers on the Potomac river, and it is probable that from 200,000 to 250, 000 strangers were in the city yesterday. Many thousands still remain here.

WASHINGTON, March 6 .- The first offi cial action of President Cleveland was the nomination of his Cabinet. His second official act was to affix his signature to the commission of U.S. Grant as an officer on the retired list of the army with the rank of General.

The crowd of callers at the White House to-day was even greater than that of yesterday. They began to arrive before the doors were opened and continued coming in large numbers all day. The President received some of them in the library and others in the east room, just as it happened to be convenient. This arrangement kep him busy running up and down stairs. The majority of the callers consisted of delegations from different States. Among

the number were delegations from the following States: Virginia, head-ed by Representatives Barbour and Wise; West Virginia, headed by Senators
