TION AT EDENTON.

Correspondence of New Bern Journal. Edenton is beautifully situated, and is the home of intelligence, culture and old-time hospitality. Some of the noblest residences in the State are here. Brightly looking out on the bay, through the leafy foliage of splendid trees, is the elegant home of the Pages, whose kindly master and brilliant mistress would adorn any mansion estate. Directly opposite is the residence of the Shepherds, perhaps the most costly and richly furnished dwelling in the city, and the hospitality of whose owners added greatly to the pleasure of the Convention. On the eastern side of the bay and only a short distance from Edenton, is the palatial abode of the Woods. Built in 1811, without regard to expense, by the Johnston family, furnished throughout in the most complete and elegant manner, and surrounded by grounds which more resemble the tasteful planning of an old English estate, the visitor is absolutely dazzled by what he sees. Many other homes there are occupied by genial and educated people, where the deputies found delightful treatment bestowed upon them. Edenton may be remotely situated, and difficult to reach, but it is a gem | intent of the parties. of the waters, and takes a strong hold on the stranger's heart by its quiet, polished character and warm, unaffected manners.

The time of the convention was taken up as usual by much necessary routine business. The reports of committees showed a fair degree of prosperity in the financial and spiritual affairs of the church. The discussions were always conducted with good sense, good temper and a wise Statutes, and when under that statute regard to utility and propriety. Dr. Huske is a venerable, some what infirm, but conscientious and thoughtful man and is always heard with attention. Mr. Lewis is a younger and more vigorous man, with a head that a phrenologist would smack his lips at the sight of, and what he says is no protest against his phrenological devel-opments. Dr. DeRosset is a wonderful old man, in the manhood of his old age. He is on the verge of octogenary, but an active, alert, vigorous man, full of vivacity which becometh old age. He is the sole survivor of the memorable graduating class of 1823, which produced a Graham, a Cherry, an Outlaw, a Moore, a Bromfield Ridley, a Johnston, a Simms and others known to fame, whose memory long lingered there as the ablest class that the University had ever sent out to fields of usefulness and honor. The father of Dr. DeRosset closed his earthly pilgrimage at 92 years, and may his representative live to be a nonegenarian, and may we live to chronicle that fact. Col. Atkinson, of Wilmington, is a son of that be-loved man of God, the late Bishop Thomas Atkinson, of the old diocese of North Carolina. Col. Atkinson is not unlike his father in physical conformation, with something of his plain and practical good sense, with the same apparent sincerity of manner and purpose.

Test of toffee. All coffee put up ground, is adulterated -often with the injurious drug, chicory. But if any one desires to test an alleged exception to this rale, throw a little of the mixture into a glass of water, stirring it around so as to wet the grains. The coffee will float and scarcely color the water. Beans and chicory sink to the bottom; chicory colors the water at once, beans more slowly. Test the part that floats by chewing it: coffee will thus be recognized by its taste; nutshells, which also float, are hard and brittle; and there is a floating nut that is nearly tasteless.

GULLIBILITY.

The wild phantoms and shricking ories of a worthless humbug can make money by imposing upon the creduity and ignorance of an honest public, and the supply of this species of work seems more than an adequate demand. The enunciation of facts—facts that have stood crucial tests—facts proven by brain force and tangible evidence, should satisfy all laudable enterprises; but the execrable practice of teaching falsa ideas and doctrines for self-aggrandizement is truly reprehensible and should be sooned by all classes.

when one house tells you that Iodine of Potash is a poison simply because their opponents use it, and because they are pandering to your ignorance, as they suppose, you should look upon all such as arrant frands and their remedies as unworthy public confidence, and if those who make such assertions do not know better, they are a set of unenviable ignoranues.

Doctors and Hot Springs.

Hot Springs falled entirely to cure me of several terrible, indolent running ulcers on my legs, with which I have been troubled for many years. with which I have been troubled for many years, several doctors also attempted to cure me but falled. I have used only a few bottles of B. B. (made at Atlanta, Ga.,) and the effect has been truly magical, as they have all healed and I am cured. It is worth all medicines made for purifying the blood. This wonderfully quick cure has been effected after everything else had failed. Your medicine is a daisy, and has done the business for me. I have lived here twenty-five years. My general nealth is also improving, appetite and digestion good. I sleep soundly, and n. ver felt better. Doctors told me that I could not be cured, but B. B. has cured me. It is decidedly the quickest, best and cheapest blood purifier I ever used. It is ahead of all others. As to my case and its cure I refer to every merchant or professional man of Pine Fine Bluff, A. H. Morris, Cotton Buyer.

Cancerous Ulcers Cared.

I have been taking Botanic Blood Balm (B. B. B.) and I am about well of an ulcer I had upon my nose for six years said by all to be a cancer. I refer to Postmaster Renfroe, of Atlanta.

\$1,325,000. New York, May 27.—Flames broke out at 1.80 o'clock this morning, in the south end of the Belt Line stables, on Tenth avenue, between 58d and 54th streets. The building was entirely destroyed with sixteen hundred horses and nearly all of the cars in the building. The flames were first seen by one of the night hands, who gave the alarm. The flames spread rapidly and soon completely enveloped the building in their folds. The building was a five-story building and covered a square block, reaching back to Eleventh avenue. The upper stories were occupied by the repair shops and combustible material, which blazed as soon as touched by the fire. The offices were situated in the southeast corner. The block was composed of six-story tenement houses and a coal yard. The terror stricken tenants poured out of the building like a swarm of bees, praying, fighting and cursing by turns. The scene of terror was indescribable. The buildings burned rapidly, though the fronts facing the avenue were of brown stone, and in a short while they were completely gutted.
