MAJORITY RULE. The only defence that the adherents of Speaker Reed attempt to make for his arbitrary rulings in the House is that he belongs to the majority.

Chicago with a population of 705,000 has 24 railroads; Kansas City, with a population of 105,000, 13 railroads; St. Louis with a population of 450,000, 19 railroads; Cincinnati with a population of 255,000, 15 railroads; Indianapolis with a population of 122,000, 14 railroads.

It begins to look as if New York would get the World's Fair. Boss Platt, who for political reasons, because New York is a Democratic city, opposed the bill which was the State Legislature appropriating \$10,000,000 to it, succeeded in defeating it, but the defeat raised such a howl in the State, that it was reconsidered and passed.

Mr. Reed's party is not now and never has been in the majority in this country. Its first President, Abraham Lincoln, was a minority President, and every Republican President since him has been elected by a minority vote except Grant, and he had to count the negro votes of the North with the votes of the newly enfranchised Southern negroes to give him a majority.
