

Table with 2 columns: ADVERTISING SCHEDULE, SPACE. Lists rates for various ad placements.

Table with 2 columns: SUBSCRIPTION PRICE, The subscription price of the Weekly Star is as follows: Single Copy 1 year, postage paid, \$1.00; 6 months, .50; 3 months, .25.

VERY IMPORTANT. During the past two months bills have been mailed to about sixteen hundred subscribers to the WEEKLY STAR.

It is hoped every subscriber in arrears will read this notice, and that he will forward the amount due us at once.

It is unjust to the proprietor to read his newspaper without paying for it—fully as much as for the proprietor of the paper to eat the farmer's chickens and eggs and then fail or remunerate him.

We thank those of our subscribers who have paid us, and trust this appeal will not be lost on those who have not paid.

DOES IT DEMONETIZE?

The opponents of the repeal of the purchasing clause of the Sherman act contend that if it be passed without making some provision for the coinage of silver, it will demonetize silver, while the advocates of repeal say it will not.

But whether it would be demonetized by the repeal of this clause or not there is but little doubt that the purpose of many of those who oppose the continued coinage of silver is to demonetize it if they can.

We published an extract from the Charlotte News a few days ago stating that Congressman Alexander had been invited by a German sugar syndicate, interested in the manufacture of beet sugar, to visit Nebraska and inspect the sugar factories there and the methods pursued in making the sugar.

Money is a cosmopolitan; it knows no country, no race, no sentiment, no politics. Its simple and sole inspiration is to increase its own power by shaping the legislation of nations as it has always been doing, and in few countries with more signal success than in this within the past thirty years.

It is quick to take advantage of circumstances, circumstances very often of its own creation, to do this. As an illustration of this note how quick the national banks, which have been fighting the coinage of silver under the pretext that there was money enough in circulation, took advantage of the stringency which they themselves precipitated, to apply for an increase of ten per cent. in their circulation, while per-

THE WEEKLY STAR. WILMINGTON, N. C., FRIDAY, SEPTEMBER 15, 1893. NO. 45

VOL. XXIV.

ically opposed to an increase in any other kind of circulating medium. They were the main agents in bringing on the stringency and then utilized it by making it an argument for adding one-tenth to the volume of notes which they had already issued.

As a business transaction the demonetization of, or if not demonetization absolute, the retiring of the bulk of the silver coin, which would be the next thing to it, would be money in the pockets of the currency controllers, for with silver out of the way and the gold dollar the measure of value, the purchasing power and interest bringing power of every gold dollar would be enhanced that much in proportion, then one dollar would buy twice as much, and command twice as much labor as it would with double as much in circulation.

MINOR MENTION.

Senator Voorhees in concluding his remarks to Senator Hale, Friday, addressed a few remarks to the public, in which he congratulated the public, (and took some consolation himself), on the fact that confidence was being restored, and business revived, which he attributed to the knowledge that the bill for the repeal of the Sherman purchasing clause will be passed.

The latest pension proposition is to put people in the civil service of the Government on the pension list when they become disabled. As this country with its \$160,000,000 a year to soldiers, camp followers, &c., is not paying out money enough, this proposition should be carried out at once, before some heavy man sits down on it.

A little land will go a long way sometimes in South Carolina, an instance of which is furnished by the Charleston News and Courier, when it tells of an eighth of an acre in Laurens county being assigned by deed to forty-one negroes and nineteen white men to qualify them to sign a petition as free-holders for a dispensary.

The Ohio hewers for protection on wool, call free wool "the colossal political crime of the age." In the estimation of these breeders of fancy sheep cheaper blankets and clothes for the poor men would be a crime if it reduced the margin of the plunder they now enjoy.

The Goldsboro Headlight, one of the best of our weekly exchanges, has entered upon its seventh year, and contemplates its bright prospects with satisfaction. Roscowser is a hustler and runs a regular dragnet for local and district news.

Mr. Henry G. Hester, Secretary of the New Orleans Cotton Exchange, shows that while last year there was a decrease in the amount of cotton consumed by the Northern mills there was an increase by the Southern mills. The Northern spinners took 508,000 bales less than the year before while the Southern mills took

748,848 bales, an increase of 84 per cent over the takings of the previous year. For the year ending August 31st there was a gain of thirteen cotton mills in active operation, over the previous year, giving a net increase of 178,000 spindles, 135,000 of which were new and 38,000 additions to old mills.

It is said that Mrs. Cyrus W. Field, Jr., of New York, who keenly feels the disgrace brought upon the family by the defalcations of her brother-in-law, Edwin Field, is going to help her husband to pay off the indebtedness contracted by Edwin. Her husband receives a salary of \$2,000 as U. S. Consul, half of which he devotes to that purpose.

READY FOR A CRUISE.

The Kearsarge and the Nantucket at Southport waiting for the Reserves. The Wilmington Contingent Will Go Down To-day. The Charlotte Division Will Arrive To-morrow.

The Light House Board gives notice that on or about September 6, 1893, the front beacons of the Morris Island South and North ranges entrance to Charleston harbor, S. C., which were washed away in the recent storm, will be re-established; also, that light vessel No. 29 has been moored off Rattlesnake Shoal.

LAST NIGHT'S FIRE.

A Blaze in a Dry Goods Store that was speedily extinguished by the Fire Department. Fire broke out last night about 12 o'clock in the rear of Mr. C. E. Gordon's dry goods store on the corner of Market and Front streets.

RIVER AND MARINE.

There was 6 feet of water at Fayetteville at 8 o'clock Friday morning, a fall of 3.6 feet. The schooner Hattie L. Sheets (disabled), from Georgetown, S. C., to New York, was towed up to the city yesterday from Southport.

THE WORLD'S FAIR.

A large number of our people are arranging to avail themselves of the advantages of the special tour to the World's Fair, which will leave here on the 18th, in charge of Mr. Thos. D. Meares, of the Seaboard Air Line. Special coaches will run through solid from Wilmington to Chicago, and comfortable arrangements have been made for those desiring sleepers, either part or all of the way.

A SHOOTING AFFAIR.

Mulatto Named Mayor Attempts to Kill Louis Johnson, Colored, Near Garland, N. C. POINT CASWELL, Sept. 5. EDITOR STAR:—There has been considerable excitement at Garland, on the C. F. & Y. V. R., owing to a shooting which took place near there on the morning of the second of August.

The contrast between these two vessels is very striking. The Kearsarge, with her immense masts and square rigging, looms up and completely overshadows the Nantucket, which lying well down in the water, at a distance makes almost no appearance, but a nearer acquaintance proves the fact that here is a type of the most formidable class of war vessels.

FAYETTEVILLE NEWS ITEMS.

Cotton Mills Resuming Operations—Third dividend of the Late People's National Bank. The Fayetteville Cotton Mills, which have been closed for about one month, the Gazette says, resumed operations Monday morning bright and early and everything is moving along smoothly and serenely there.

ABOUT THE NANTUCKET.

Lieutenant Hosley, Lieutenant Bitler and Surgeon L. N. T. Harris, of the monitor Nantucket, arrived here last evening and leave for New York, where they are stationed, this morning. It was Lieutenant Hosley who commanded the Nantucket and so successfully carried her through the recent hurricane off the North Carolina coast.

WASHINGTON NEWS.

WASHINGTON, September 7.—The Treasury Department to-day issued a circular which is here given verbatim: To Collectors of Internal Revenue and Revenue Agents: It has come to the knowledge of this office, through published news items, by correspondents and otherwise, that banks are issuing certificates of deposit payable in the money or currency of the United States, and that these obligations of the banks, negotiable notes, carrying title in their circulation from hand to hand, are paid out and used for circulation in lieu of the money of the United States.

THE STORM-SUFFERERS.

A Deplorable Account of the Condition of Affairs on the South Carolina Islands. By Telegraph to the Morning Star. WASHINGTON, Sept. 9.—Col. Elliott, ex-member of Congress from Beaufort, S. C., reached Washington yesterday and was soon in conference with the supervising Surgeon General of the Marine Hospital Service, and told a story of the condition of affairs in that country, that promptly secured the aid of that department and the co-operation of the President of the United States.

UNIVERSITY OF N. CAROLINA.

Opened With 300 Students—The Largest Attendance in Thirty-Three Years. By Telegraph to the Morning Star. RALEIGH, N. C., Sept. 7.—The University of North Carolina opened to-day with 300 students, the largest attendance in thirty-three years. One hundred and fifty Freshmen are present and more are coming. The improvements added by the \$300,000 legislative appropriation have made the sanitary and the physical comforts well high perfect. There is a large contribution of men by other colleges.

WASHINGTON NEWS.

WASHINGTON, September 7.—The Treasury Department to-day issued a circular which is here given verbatim: To Collectors of Internal Revenue and Revenue Agents: It has come to the knowledge of this office, through published news items, by correspondents and otherwise, that banks are issuing certificates of deposit payable in the money or currency of the United States, and that these obligations of the banks, negotiable notes, carrying title in their circulation from hand to hand, are paid out and used for circulation in lieu of the money of the United States.

The tax rate of official notices described in the circular is 10 per cent. The number now in circulation is believed to be very heavy, as they have taken the place of the currency of the country, and these include Clearing House certificates which are a question Treasury officials decline to discuss, intimating that the question is a legal one that may call for a judicial decision from the courts.

SPIRITS TURPENTINE.

—Kinston Free Press: Mr. W. D. Sanderson, of Neuse township, dropped dead with heart disease while walking along the road Saturday morning. He was about 30 years old. —Mr. Joe H. Dixon died last Sunday at his home near Maple Cypress, Cravers county, aged about 70 years.

—Morgantown Herald: We are gratified to report that Gen. R. F. Hoke, who owns a large tract of land on Brown Mountain, adjoining the lands of the Caldwell Lumber Company, and who has spent a portion of the summer prospecting on his property, has discovered a large bed of kaolin. The lead has been traced across the mountain into Caldwell, and a valuable outcropping discovered on the lands of the Caldwell Lumber Company.

—Salisbury Watchman: The Richmond & Danville Railroad Company has made a contract with the Salisbury players who receive \$100 per month and over. Capt. Green, general manager; Sol Haas, general traffic manager; the general and chief passenger manager, all have their salaries cut 10 per cent; all the men under them are cut 15 per cent, and all those whose salaries are \$100 and over are cut 10 per cent.

—Wilkesboro News: Wilkes county can boast the oldest person in the State. She is an old colored woman by the name of Annie Parks who lives in Antioch township and is 115 years old, and has a remarkable memory for one of her age and race. She was just put on the paper list last Monday. Says she can remember things that happened one hundred years ago. As she does not die at 100 per cent, Washington we are inclined to believe that she is as old as she says.

—Louisburg Times: Mr. George Hines, aged about 80 years, died on Wednesday morning last, at his home in Cypress Creek township. It is supposed that he died of heart disease, as he was found dead in his bed early in the morning. —It seems that there had been a rumor about an inheritance of Jack Holmes, who lives about two and a half miles from Louisburg, took his family into one of these pits last week (last Tuesday) and was not seen since. One of his children was bitten by a moccasin while therein. If people will have pits it is very important to have them covered up, and the opening to keep away the serpents.

—Asheville Citizen: Gen. R. B. Vance and his son, J. N. Vance, who conduct the hotel at Alexander, assigned yesterday. The liabilities amount to about \$90,000, and the assets are about \$88,000, and the net result is a loss of \$2,000. The hotel tract, 133 acres; the Riverside tract, 240 acres; and the stock of goods at Alexander. —Yesterday while a painter was at work at Gray's pharmacy he found in the yard in rear of the building a worm that for size and formidable looks "takes the cake. His wormship is about six inches long, an inch in diameter, green in color, and with eight or ten ugly horns on its head. Dr. Grant showed the worm to a number of persons, but not one could name the find. The doctor then put the worm in alcohol, bottled it and labeled it "What is it?" and kindly contributed it to the Citizen museum.

—Wadesboro Messenger-Intelligencer: The only case of any public interest that has come before the Superior Court this week is the case of the State against O. M. Fort for the killing of A. J. Rhyne. O. M. Fort was charged with the killing of Rhyne on the 10th of October last. Rhyne had a fight in front of Mr. J. J. Little's stables in this place. Rhyne was drunk and was armed with a pistol. He was shot in the head. This was about dark. Dr. Grant showed the worm to a number of persons, but not one could name the find. The doctor then put the worm in alcohol, bottled it and labeled it "What is it?" and kindly contributed it to the Citizen museum.

—Charlotte News: Congressman Alexander has been invited to make a visit to the West which may have a most important result upon the agricultural interests of the State. It is said to be a trip that will be made in the States of Nebraska, Oregon, California and Utah, have invited him to make a personal inspection of the works and to look into the manner of the cultivation of the beet. They have their eyes on North Carolina as a profitable field for cultivation and are anxious to see Mr. Alexander's views. For that reason they have invited him to make the visit. They propose, in case he thinks the beet could be profitably grown in this State, to furnish him for distribution to the farmers a ton and a half of seed. Their only condition will be that each farmer will make them a report of the number of pounds of beet raised, and will furnish one dozen beets for analysis. If the experiment proves successful, the syndicate guarantees to build any number of beet sugar factories in this State. This would open up an industry that would lay cotton in the shade. Mr. Alexander will make the desired inspection and his report will be given to the State. Sugar beets will grow in this country without any more experimenting. Mr. John Meyer of Morehead street, has three acres of good beet seeds. He grows them for his cow. A few days ago a fifteen-year-old son of Mr. T. H. Beattie, of Paw Creek, was at school, and on a rainy day he was sent to furnish him for distribution to the farmers a ton and a half of seed. Their only condition will be that each farmer will make them a report of the number of pounds of beet raised, and will furnish one dozen beets for analysis. If the experiment proves successful, the syndicate guarantees to build any number of beet sugar factories in this State. This would open up an industry that would lay cotton in the shade. Mr. Alexander will make the desired inspection and his report will be given to the State. Sugar beets will grow in this country without any more experimenting. Mr. John Meyer of Morehead street, has three acres of good beet seeds. He grows them for his cow. A few days ago a fifteen-year-old son of Mr. T. H. Beattie, of Paw Creek, was at school, and on a rainy day he was sent to furnish him for distribution to the farmers a ton and a half of seed. Their only condition will be that each farmer will make them a report of the number of pounds of beet raised, and will furnish one dozen beets for analysis. If the experiment proves successful, the syndicate guarantees to build any number of beet sugar factories in this State. This would open up an industry that would lay cotton in the shade.
