A QUAINT RESORT. Represents a Ship on Shore and Manned

by a Crew In Uniform. There's a saloon located in the down town district where you can splice the main brace in the most correct nautical language. Here the thirsty are served by a ship's officer dressed in full naval nuiform. The bartender and his crew of assistants appear in naval dress, which includes swords and other side arms and any amount of gold lace. The novel erew comes on duty every evening. The daylight crew are garbed like the ordinary "beer slingers" of that part of town. Inside this quaint saloon so closely resembles an old time packet ship's cabin that one can stretch his imagina-tion to the verge of seasickness and onot half try. The entrance is from one of the city's busiest arteries, near Vesey tad Greenwich streets. Old brass nautical lamps, that have seen lots of service in all sorts of weather, hang from the ceiling by chains. Several ancient and dilapidated figureheads, which have faced the storms of, many years at sea, stare at the scenes of revelry from cor-

t The walls are hung with relics of many voyages. Pieces of rope, old marine prints, portraits of famous skippers of the long ago, models carved by sailor men, old flags, many of which floated from historic battleships, and other bric-a-brac of the brine, decorate this nautical taproom, whose proprietor is attired in the full uniform of a commodere of the United States navy. Her "erew" consists of representative officers usually found aboard a man-of-war; properly uniformed, as well as an occasional sailor who appears in the triple blue 'togs' of Uncle Sam's men who swing their hammocks in the forecastle. These are no imitation sailors, for every man Jack of them is a veteran of the ocean and rolls about as if on shipboard. The marine delusion extends to the old ship's clock which hangs over the bar. It reels off bells instead of hours, for here the time is passed in the choicest sea gibberish. If you should, even steer your craft through the low deerway of this nautical saloon, the

chances are that you'll clutch at some-

thing before you are anyway near half

Of course the old salts ashore here are the chief patrons of this old refreshment room. The custom of using only pautical terms in carrying on the ordinary business of the place fascinates Jack, and he'll walk a long way for the sake of being served in his own language. The commodore stands at one end of the bar and shouts his orders to his crew, as if he were stationed on the bridge of some man-of-war. One hears such orders as"Avast there!" "Stand by to let go!" "Hard a lee!" "Keep her off half a point!" and similar expressions that the sailor knows so well. Drinks are ordered in names which are absolutely unintelligible to landlubbers. The evening is never a success unless a great many of these orders are first given and obeyed. The favorite nantical term is, "Stand by. to let go!" This is given when the glasses have all been filled and are being held in the hands of a crowd of sailors. After Jack feels mellow, then the yarn spinning begins.—New York Letter in Pittsburg Dispatch.

What Is Fatigue? Fâtigue is the natural result of labor, and as such is a periodic symptom with which every healthy person is familiar. It is one of the laws of organic life. that periods of relaxation shall succeed periods of activity. The heart itself is normally in repose for about one-third of the time consumed by each beat-a fact in which there is something particularly suggestive and interesting, since physiologists agree that about onethird of the 24 hours should be devoted

Life is made up of a series of vibrations in which tension and rest succeed each other. The heart vibrates about 70 times a minute; the vibrations of the respiratory organs occur about 16 times in the same period, while the vibrations of the whole organism may be said to complete their cycle once in 24 hours. Abnormal fatigue, a state approaching exhaustion, occurs when one attempts to alter nature's rhythm, when the hours of tension are made to encroach upon those which should be devoted to rest, when muscle and nerve already fatigued are driven to further exertion. Fatigue. of a kind known as overtraining results, in the case of the athlete, in heart Weakness and shortness of breath-"loss of wind, "as it is called-while the long continued fatigue occasioned by excessive application to professional or business pursuits results in nervous prostration or even in paralysis.

While excessive fatigue is in itself un-Wise, one of the chief dangers which results from it is that commonly indicated by the term "catching cold." Thus the danger of sitting in a draft or on the damp ground is many times doubled after great exertion. The application of heat to the surface is a more logical procedure after extreme fatigue. Loss of sleep is one of the first sypm-

toms of abnormal fatigue. Habitual insomnia from this cause is to be treated only in one way, by absolute rest,-Youth's Companion.

Gender Epicene. Nurse (to young husband)-A beauti-

ful ten pound baby, sir! Young Husband (getting things mixed in his excitement)—Glorious! Am I a father or a mother?-Charlottestown (P. E. I.) Patriot.

An Unfailing Soporific. Husband (to his wife, who is going off on a journey)—And then, Emily, be so good as to send me a curtain lecture from time to time. I shall hardly manage to get to sleep without, you know.— Humoristiche Blatter.

BATTLE OF BIG HOLE.

REMINISCENCES OF A MAN WHO WAS IN THE FIGHT.

Warm In His Praises of the Courage and Goodness of General Gibbon Chief Joseph Was a Fighter Who Tested the Qualities of His Opponents. William Woodcock was with the late

General Gibbon the famous Indian fighter, for more than five years while he was the commander of the department of the Dakotas. He was a civilian in the service and was made a confidant of the general and the other officers in some of the councils to which only the favored few were admitted. Such a council was the one held the evening before the batthe of the Big Hole, when the command of General Gibbon engaged three times the number of warriors under command of Chief Joseph, the most crafty fighter who ever crossed the path of Uncle Sam. The battle was a victory for the whites. "If anybody tells you that General Gibbon wasn't a fighter, just tell him he lies and charge it to me," said William yesterday. "General Gibbon was all right. I remember the evening he called the officers together and advised with them about the battle of the next day. He had sent out sconts, and they had come back and said there were 'heap Indians' ahead. They hadn't found as many tepees as usual, but they had learned somehow that there were as many as 16 men to the tepce, and they estimated the Indians as several hundred, I don't remember just how many. General Howard was expected in a short time, and General Gibbon called the offi-

cers together and said to them: "Boys, the Indians are out there ahead of us and the question is whether we will go after them or not. You know, if we wait for General Howard

we may never have a chance.' "There wasn't a man in the crowd who didn't hold up his hand to show that he was in favor of a fight. That was the kind of a man Gibbon was, and that was the kind of men he had with him. There were 26 or 27 citizens who lived down in that country who were following the command and camping just a short distance from us. General Gibbon called them in and asked them what they wanted to do. He told them that if they were going to go into the fight there would be an understanding that they would be under his command. Out of the whole of them there were about a dozen who didn't turn back at that, and it is a remarkable fact that those who staid were nearly all killed. There were ten dead civilians the next day, and their leader was shot through the hips, and never did recover entirely from the wound. It was a real battle, and we lost 85 killed and wounded, out of a part of five companies of the Seventh regiment. There were 200 or 250

soldiers in the engagement. "General Gibbon was wounded through the thigh that day, and was taken to his tent, where I helped to take care of him. The battlefield was a couple of miles from the camp of the evening before. At the time I was with a party that had just lost a mountain howitzer to the Indians, but we never got it back, though we tried hard enough. The Indians had sense enough to destroy it, and a lot of ammunition besides. Some things happened that day that I wouldn't believe if I hadn't seen them. We were out on a skirmish line when just in front of me I saw an Indian girl with her hand over her eyes, just like she had been looking out to see

who was coming. "I called out to the officer near me that there was a little girl in front. 'All right, don't hurt her,' says he. And when we went up nearer we found that she was dead. She had been shot through and had died so suddenly that she hadn't moved a muscle. She looked for all the world as if she were alive. And there was an officer shot so that the bullet went into his skin near one of the soft ribs and came out in exactly the same place it went in, after going around his body and keeping under the skin all the way. The doctors ran a cord through it, and they used to pull it back and forth every day to keep it from healing too fast. He got well, and there was a black ring around him the rest of his life, one of the prettiest

things you ever saw. "We couldn't find any dead Indians to speak of after the fight, and we wondered what we had done. One of the scouts went out and came back and said. 'Heap Injun dead.' We didn't find any marks of it, but he showed us where there were bodies cached by the hundreds. You know an Indian will bury his dead if he has to take all kinds of chances to do it. There were over 100 bodies in one hole we found on the side of the bank

of the river. "Old Chief Joseph was a man to remember. There was never a general who was more brave than he was. He was a match for some of the best of them. When he was at the head, there was no such thing as one soldier being good for eight or ten Indians, as you hear people

'General Gibbon was a mighty fine man. I don't expect to meet a better one. He was as brave as they make them, and he was always as good to his men as a father would have been. There will be many a man who still' lives in this country who will be sorry that Gibbon is dead."-Helena Independent.

Ways of the Moose. Ambrose seemed to know a great deal about moose, after all. He told the boys how, back from the narrow valley and the swift, winding stream, the country was all a wilderness, hillsides clad with birches, maples and evergreens, and resting at their feet little lakes, so numerous that no man knew how many there were. Often, where these lakes were shallow, the yellow pond lily with its oval leaves crowded the surface. At other seasons the tender bark of mountain ashes and moosewoods are the favorite food of the moose, but now there is nothing he likes so well as the long tubular roots of the lily. In the very early mornings, and in the evenings, shout the time of the harvest moonthe full moon nearest Sept. 21-a hollow sound, not unlike the sound of distant chopping, may be heard. It is the sound of moose calling to their mates or the angry challenge of fierce rivals. It is this sound which the hunter imitates to attract the moose. But there are only a few places where the moose will answer, shallow spots in certain well known lakes, and it is said nearly useless to call anywhere else. -Tappan Adney in St. Nicholas.

Well Posted.

Some foreigners who appeared before a judge in May's Landing, N. J., the other day to be naturalized as American citizens showed the densest ignorance, To the question, "Who is the president of the United States?" a Russian answered, "The czar of Russia," and Atlantic City was his answer to the question, "What is the capital of the United States?" An Italian who has been in this country for more than ten years declared that George Washington was the president of the United States, and that he made macaroni.

In reporting a meeting in some of the hurches, the preacher said that "several hatchets were buried, handles and all." We like that. The trouble is too often that in burying hatchets the handles are left within reach,-Louisville Western

NEW YORK DEMOCRACY.

State Convention - Platform Declares For Maintenance of the Present Gold Standard, a Tariff For Revenue Only and Endorses Cleveland's Administration -Delegates to the Chicago Convention Chosen.

By Telegraph to the Morning Star. SARATOGA, June 24.-The town as-

sumed a convention aspect this moin-Ex-Secretary Whitney, Senator Hill and ex Governor Flower have each declared that the situation is not so bad as it has been painted. They express confidence of a victory for sound money t Chicago, and declare their belief that financial plank can be worded so that it will hold the gold standard Democrats of the East and all Democrats who favor bimetallism. The free silver defection, they claim, will be no greater than

the Republican party has suffered. At 12 47 temporary chairman Thacher, finished his speech and Secretary de Frest called the roll. The names of Whitney, Hill, Flower, Starchfield and other prominent delegates were greeted with applause.

The Shepard delegation from Kings county occupied seats in the rear of the hall. Charles J. Patterson, who sat beside Edward M. Shepard, presented their claim for admission to the convention. After the appointment of Committees

on Credentials, Resolutions and Permanent Organization, the convention, took a recess. The convention was called to order at 3.80 p. m. and the Credentials Committee reported that the sitting delegates from Kings, Queens and Richmond

countles are entitled to seats.

The report was adopted, and the Shepardites marched out of the hall amid a chorus of cheers mingled with hisses. The Committee on Permanent Organigation reported that the temporary organization be made the permanent or-

zanization. The platform was presented by Senator Hill and unanimously adopted. it declares in favor of gold and silver as the standard money of the country; favors the rigid maintenance of the present gold standard; is opposed to repeal of any existing statute which enables the Secretary of the Treasury by the issue of bonds or otherwise to provide for the redemption in gold of paper obligations whenever necessary; declares adherence to a tariff for revenue only; endorses President Cleveland's administration; Convention to vote and act as a unit, in accordance with the will of the ma-

The following resolutions were also

adopted: WHEREAS, party divison at Chicago on the silver question will endanger Democratic success at the polls; and whereas, Republican ascendancy in the National Congress would undoubtedly be followed by another attempt to establish majority rule in the Democratic Southern States by means of a force bill; therefore, be it

Resolved That the Democrats of New York appeal to the Democrats of the South, in the name of their political liberty and their properties, to avert the possibility of a force bill by uniting with he Democrats of the East and West in forming a platform on which all Democrats can stand and the united support of which will lead to a glorious Democratic victory.

Resolved, That we sympathize with the brave and heroic Cubans in their struggle to achieve their freedom and independence, and denounce and condemn the atrocities, the outrages and cruelties perpetrated by Spanish soldiers under the Spanish flag in the island of

Delegates-at-large to the National Convention were elected as follows: David B. Hill, alternate, Robert Earl; Roswell P. Flower, alternate, Smith M. Weed; Edward Murphy, alternate, Jacob A. Cantor; Frederick R. Coudert, alternate. William Purcell.

At 4.10, the business of the convention having been completed, the convention adjourned sine die.

ONE WOMAN'S INVENTIONS.

Mrs. Thomas Calkins Tells How She In cented What She Needed. Mrs. Thomas D. Calkins, wife of the editor of the Amador Record, gave a sectore and exhibited a number of her inventions for lessening the labor of nonsekeeping on Saturday before the Woman Caterers' club. A number of women interested in the culinary art were present and complimented Mrs. Calkins on the result of her experiments. All the articles which she exhibited

and explained were invented by her.

utensils suitable to her requirements The result is the invention of a self adjusting towel ring, convertible baker and roaster, a steam heater, pinless clothes rack and sponge holder.

Mrs. Calkins is the daughter of the Hon. M. Farley of Fresno and niece of Colonel Tom Ochiltree, who once represented Texas in congress. She is a woman of medium height, an expressive face, rich golden hair and looks little more than a girl in years.

"My labor is simply the result of necessity and the impoverishment of the market along certain lines," she said. "I never was satisfied with the old fashioned baking pan, so I sat down and planned a design for a new one. With the aid of adjustable partitions, which fit in a groove in the side of the pan, I have been able to construct an arrangement that is invaluable to people who bake their own bread. The partitions make the loaves a uniform size and form a complete crust. You can remove the partitions and the pan is ready to use for roasting meats. With the aid of movable handles, which form a lock, I can place two pans, one on top of the other, and in this manner get twice as much work out of an ordinary oven as

I could by using the regulation pan. "The self adjusting towel ring is a wire circle with a screw in the center which enables it to be attached to the wall without any trouble. The old fashioned rings bung on a nail or hook against the wall, and are, as a rule, more trouble than they are worth. "The pinless clothes rack is a very

handy affair. It is for the purpose of holding small clothes, such as handker. chiefs, napkins, etc., which are to be dried in the house. It is made of adjustable wires attached to a wooden frame. The wires are run parallel about an inch apart. At the ends they are bent and run close enough to form a catch when anything is placed between

In all Mrs. Calkins has invented 27 useful household articles. She is well known in California. Five of her husband's brothers conduct papers in this state, and her brother is a newspaper man of Fresno. - San Francisco Exam-

Expert Money Counters.

We have here at the treasury department four of the most expert counters of money in the world. They are women, and their names are Miss Calhoun, Miss Roff, Miss Cocks and Miss Burns. Each of these young ladies is able to count from 30,000 to 50,000 pieces a Foreign ... day, throwing out the counterfeits at sight. They are so clever at the work that it is hardly possible for a bad coin to escape detection by their keen eyes. The pieces are spread out on tables in such a manner as to lie flat, this being accomplished by two or three quick movements of the hands. Then they are counted two at a time, with two fingers of the right hand, throwing them into the left hand, which is held below the edge of the table. In this process all badly worn coins are put aside, to be sent to the mint in Philadelphia .-Washington Star.

New Woman as Elevator Girl. The new woman has invaded another field of labor. She is going to be an elevator girl. Strange that some bright woman did not think of it before. It is slow, conservative Philadelphia that introduces the elevator woman to an approving public. In the Young Woman's Christian association building, at Arch and Eighteenth streets, are two young women pioneers at this line of work. They like it, too, and say it is not nearly so hard or so unpleasant as standing all day in a store. The association building is eight stories high, and there is a large amount of travel up and down the elevators. The restaurant on the eighth floor is patronized not only by the permanent and transient boarders of the association, but also by crowds of

noonday shoppers. * A Woman Carpenter, Miss Webster of Boston is a carpenter. She is the sister of Albert Webster. a writer who was to have married Anna, a daughter of Nathaniel Hawthorne, and whose unfortunate death on a voyage for health was soon followed by that of his betrothed. Miss Webster a few years ago was thrown on her own resources. She had studied painting and possessed the usual accomplishments of women. None of these seemed available for bread winning, so, having a fondness for tools, she concluded to fit herself as a wood carver. "Better a carpenter for money mak-

ing," was her teacher's wise advice. She took it. Miss Webster has now a shop with a real bench and real shavings.

The Originality of Youth.

A pretty story comes to the Listener about a little boy whose elder sister is much interested in photography and who gives the family the benefit of many observations about her work. The little boy was taken to the courthouse to see the end of a certain trial. He came home and told his mother about it.

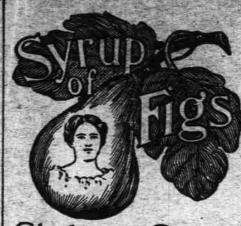

"The judge made a speech to the tury " he said, "and then sent them off into a little dark room to develop."-Boston Transcript.

Tough Eating.

Those who have partaken of peacock declare that gorgeous bird to be decided ly tough eating, while it is said of the swan that the fact of its ever having been a familiar dish speaks highly in fa-

vor of ancient English cutlery. More over, it should not be forgotten that when bustards' and boars' heads were as common as sirloins and saddles now are there were scarcely any vegetables to eat with them. Her Choice.

Mother-Jane, you must choose be-tween the two. Will you marry the man who loves you or the man who can dress you? Daughter-Mamma, as an up to date girl, I must reply to your question that, although love is a very desirable thing,

Gladness Comes With a better understanding of the transient nature of the many physical ills, which vanish before proper ef-forts—gentle efforts—pleasant efforts— rightly directed. There is comfort in the knowledge, that so many forms of sickness are not due to any actual disease, but simply to a constipated condition of the system, which the pleasant family laxative, Syrup of Figs, prompt-ly removes. That is why it is the only remedy with millions of families, and is everywhere esteemed so highly by all who value good health. Its beneficial effects are due to the fact, that it is the one remedy which promotes internal cleanliness without debilitating the organs on which it acts. It is therefore all important, in order to get its beneficial effects, to note when you purchase, that you have the genuine article, which is manufactured by the California Fig Syrup Co. only and sold by

all reputable druggists.

If in the enjoyment of good health, and the system is regular, laxatives or other remedies are then not needed. If afflicted with any actual disease, one may be commended to the most skillful physicians, but if in need of a laxative, one should have the best, and with the well-informed everywhere, Syrup of Figs stands highest and is most largely used and gives most general satisfaction.

Infants and Children.

MOTHERS

Do You Know that Paregoric, Bateman's Drops, Godfrey's Cordial, many so-called Soothing Syrups and most remedies for children are composed of opium or morphine?

Do You Know that opium and morphine are stupefying narcotic poisons? Do You Know that in most countries druggists are not permitted to sell narcotics without labeling them poison? Do You Know that Castoria is a purely

egetable preparation, and that a list of its ingredients is published with every bottle? Do You Know that Castoria is the prescription of the famous Dr. Samuel Pitcher? That it has been in use for nearly thirty years, and that more Castoria is now sold than of all other remedies for children combined? Do You Know that you should not

unless you or your physician know of what it is composed? Do You Know that when possessed of this perfect preparation, your children may be kept well and that you may have unbroken rest! Well These Things are worth know ing. They are incis.

A SECURITION OF STREET
