Invite the attention of the trade to their large stock of

party. On the third day they found him. He was lying in a hollow on a side hill, with both feet frozen. He was half covered with snow, but alive. Most of the sheep were lost. A farmer near Tewksbury, Vt., owned a large field of corn. He built fires around

the field to keep off the frost. Nearly every night he and his men took turns in keep-ing up the fires and watching that the corn did not freeze. The farmer was rewarded for his tireless labors by having the only crop of corn in the region. July came in with ice and snow. On the Fourth of July ice as thick as window glass formed throughout New England, New York and in some parts of the state of Pennsylvania. Indian corn, which in

some parts of the east had struggled through May and June, gave up, froze and died. To the surprise of everybody August proved the worst month of all. Almost every green thing in this country and Eu-

rope was blasted with frost. Snow fell at Barnet, 30 miles from London, on Aug. 30. Newspapers received from England stated that 1816 would be remembered by the existing generation as the year in which there was no summer. Very little corn ripened in New England. There was great privation, and thousands of persons would have perished in this country had it not been for the abundance of fish and wild game.

In direct contrast with 1816 appears the year 1827-8, when there was no winter. Captain Daniel Lyon, who died some years ago in Burlington, Vt., used to relate his experience in 1827-8. He was a walking encyclopedia of local events. He said: "I knew but one season when winter was al-most like summer, the winter of 1827-8. I was running the steamboat General Green between Burlington, Vt., and Port Kent and Plattsburg, N. Y., and during the year there was not a bit of ice in the whole lake from one end to the other. The old Lake Champlain Steamboat company hauled out the steamboats Phoenix and Congress, and hardly a bit of ice appeared in Shelburne bay, near Burlington, during the winter.

"The Phœnix had a new engine built in Albany, and the whole outfit had to be carried from that city to Shelburne harbor by teams through the mud. At Middlebury, Vt., the mud was more than a foot The Phoenix was rebuilt and ready to launch by Jan. 15. Jan. 18 was the day fixed for the launching, and I took over a large party from Burlington on the Gen-eral Green. The sun was shining with the warmth of a July day. The women who sat on deck raised their parasols."-New York Sun.

Highland Raids.

In one of the raids of the McGregora the farm of Burnfoot, at the back of the Gargunnock hills, above Fintry, was attacked by about 30 of the clan, and the cattle "lifted." The farmer was well advanced in years, and he and his wife were the only inmates of the house when the McGregors appeared. The sons, who were five in number, were away helping some friends who had been attacked and raided by another portion of the clan. The old farmer, who was a powerful man, in order to prevent his raising the alarm, was tied below the belly of an old mare with his head toward the tail, and, nearly choking, was thus carried off with the spoil. When the eldest son came home, he learned from his mother what they had done, and he called to her to give him his father's claymore, which hung above his bed, and which the robbers had

reglected to take away. Furious and reckless, he seized it, resolving to have revenge, and made after the McGregors at full speed. He came upon them at a steep place called Skian Dhu, where they were obliged to go in single file, and overtaking the hindmost

"Hold on there, No Heart; hold on !" cried Percival. "Lord bless you, Injun, you are chattering around there with a Sioux mixture of verbosity and long words that would drive one into a cyclone cellar for protection. Easy now, easy. Confine yourself to English, and 22 caliber English at that."

"In short," said No Heart, "I am going to take over to my camp a sewing machine, a set of popular authors and a double scated cutter. Seeing these, can you understand how my people can fail to be filled at once with the same ideas as the whites? Percival, how does one proceed to establish a banking business? I think Throws His Hatchet at His Mother ought to be cashier. We shall open next week!" Percival looked in awe and wonderment at this remarkable philanthropist and wished him well. Two hours later No

Heart, still clad in buckskin and rags, but driving a pair of dejected Indian ponies hitched to a most startling and gaudy sleigh, disappeared toward the frozen riv-er. He carried in the rear seat a sewing machine and about 50 handsomely bound books.

He was mounted on one of the ponies when next he appeared at the office of the newspaper. Gentle, patient resignation was depicted upon his face as he quietly moved into the editorial room and seated himself on a keg. He was silent for several minutes, and then, speaking meekly, he said:

"You have perhaps heard that Throws His Hatchet at His Mother, who was to have been cashier of the bank, erroneously mistaking the cutter for a new kind of folding bed, lay down in it to smoke himself to sleep. We buried some of Throws His Hatchet at His Mother, but there was not enough ashes left of the cutter to mention it in ordinary conversation. The books I distributed among the Two Kettle band, and I was called upon today by a deputation, who, representing that the books had made enormously successful fuel, requested that I get more. My squaws, I regret to say, are fools. They took the sewing machine out and cut a hole in the ice and dumped it into the river, for it was, they said, accursed."

One day in the summer No Heart ap peared before Percival and made a fina

"The man at the bank." he remarked. "says my money is all drawn out. It is very fortunate. I had intended to buy a banjo, a roll top desk and a gas stove, which I am sure would at last have brought complete civilization to my people. But I am thwarted"-in Sloux, o course-"and am fain to give up my enterprise. Percival, you have always been a good friend to me and my race. Will you be especially noble now?"

Percival said he would. 'Let me have 60 cents to get drunk on, said No Heart. And Percival gave him the money .-

A splendid Georgian clock, which rears its majestic head almost from floor to ceiling, is owned by Lady Alston. In the ormolu and silver repousse fao is a mysterious looking curtain, which, drawn up by an ingenious arrangemen every three hours, or at any time on touching a spring, reveals, with an appropriate village background, a set of tiny watteau figures, of which one in the foreground is dancing a jig to the beating of a drum and the music of violins. This old clock has an interesting histor-

ical record, it having been presented by George III to his sister, who became the bride of Christian VII of Denmark.

The story of poor Caroline Matilda is a sad one. It is said that immediately on landing she was required to exchange her English for Danish attendants, even her faithful dresser being taken from her.
