For some time the leaders of the Populist party were loud in their advocacy of the sub-treasury idea, to which they attach but little importance now, and of the Government ownership and control of the railroads, telegraphs, &c. We do not hear so much of this now and the probabilities are that if the Populist party survives long enough to go into another Presidential election we will hear less of it. Conceding that the advocates of such ownership may have been honest in their contention, it was based and; defended on the alleged fact that European railways, many of which are either owned wholly or partially by the Governments or are run under Government supervision and practical management, were better managed than our roads, that' life and limb were safer and charges for passenger and freight service much less than in this country, all three of which alleged facts have no foundation in fact.

Life is] not as "safe, on European railroads as it is on American railroads, although the European trains do not run as fast as ours, and charges for both passengers and freight are, counting mile for mile, less and considerably less on our roads than on European roads. We published an extract yesterday from the Boston Commercial Bulletin, giving the number of accidents, deaths, and injuries in the month of July in Germany and Bavaria, in both of the evidence points to his guilt. #### AN INTERESTING CASE.

The Luetgert murder trial watched with deep interest not only in Chicago but throughout the coun try, because of its peculiar features Possibly the attorneys for the de fence, who are managing the case with considerable skill, may add to the dramatic interest in the case by sen sational developments which counsel Vincent hinted at in a conversation Tuesday night, but it will take a mighty play to convince the major ity of those who have kept up with the case and the evidence that the man on trial did not murder his wife The only thing which could relieve him entirely from that suspicion would be the production of the miss ing woman alive and in the flesh

Many a man has been hanged on circumstantial evidence that didn't link nearly as closely as the evidence given against this man. The defence will try to show

conspiracy to convict Luetgert; this is one of their contentions, but if there was a conspiracy it was a skil tully planned one for which no plau sible motive has yet been assigned And yet the accused has a chance for his life and seems to have little fear of conviction, as strongly as

It Was Coutral Over This 8 atton La t Might But Bad Decreased Decidedly in Baergy. Yesterday was another bad one. There was a drizzing rain pretty nearly all day, and it was accompanied by wind enough to make it extremely disagreeable. The storm was the prevailing topic of conversation, quite as much so as if it had had really come. The residents of Wrightsville beach,

or those who hadn't abandoned their Summer homes the night before, hastened up yesterday in response to warnings from the Weather Bureau. There, were some eight or ten families who came up, some for good and others to remain until the stormy weather is at an end.

About 10 o'clock yesterday morning the weather at the beach was threatening. It was time for low tide, but there wasn't the slightest fall, and the sea was alarmingly heavy while the sky was overcast with clouds.

The tide was highest about 4 80 o'clock in the afternoon, though even then it was not high enough to excite any serious

At 8 o'clock last evening Mr. Strong local forecast official at the Wilmington station, said : "The West ladia storm has moved slowly north during the day and is central to-night over the Southern North Carolina coast. It extends in narrow trough from Augusta to Hatteras, with the centre nearly over this locality. Heavy rain has fallen during the 'day over Eastern Georgis and South Carolina, and moderate ago, was a daughter of the late Rev. Jas. raids over North Carolina. The storm has decreased decidedly in energy, and winds are light to brisk around it. The high area continues over the Northeast portion of the country. A low area is developing over the western portion of the Ohio valley, with high temperatures prevailing under it over Illicois and Missouri. It is generally fair and warmen

over the interior of the country. The storm will probably continue nearly sta tionary over this section to night, mov ing off Thursday, increasing then in torce."

Mr. Faison's record as an official was bright one and up to the date of his reirement last Spring was pointed out as triumph of the fullest application of the civil service reform principle. He was appointed in 1886 from North Carolina, after a competitive examination, to \$1,200 clerkship in the consular bureau, which he administered with signal ability. Upon the resignation of Solicitor Dabney, Mr. Faison was promptly installed in the solicitor's office by Secretary Olacy. who had a keen appreciation of his legal abilities.

RICHMOND, VA, September 23 - The conference committees of the Southeastern Freight Association, controlling all transportation lines south of Chattanooga, east of Birmingham and south of the Potomac, and the Southeastern Missisippi Valley Association, controll ng the lines south of the Onio cast of the Mississippi, north of Chattanooga and west of Birmingham, are in session here, and the probabilities are that they will remain here until Friday, though they may conclude their business to morrow.

There are 120 matters of classification and twenty-odd cases of rate disagreement to be adjusted and the committees are busily at work upon them. They bave been engaged on the classification matters ever since their arrival here, and have about completed their labors in

this direction, though they have been lorced, in order to do so, to sit almost continuously.

the latter part of November, the board will make a tour of the South, and will visit the steel works at Richmond, Birmingham, and at other points. At present the board is engaged in considering the cost of the establishment of an armor plant, and will make its report on that po nt by December 1at. The question of location will be subsequently considered. Its consideration will necessarily include a trip of the steel producing districts of the South. The board has already inspected the steel plant at Bethlehem, the Carnegie works and the plant of the Illinois Steel Company, of Chicago. The question is a big one, and
