ea inrougnout in day and several times bitter words were used. The excitement reached its climax in a highly dramatic scene between Mr. Hepburn and Mr. Cannon, when the former used the words "lie aud liar," as he denounced the distinguished chairman of the Appropriations Committee for attempting to "dishonor" him. The House was in riotous confusion during the quarrel. Members crowded the aisles and the situation at one time was so threatening that Mr. Wheeler, of Kentucky, sought to pour oil on the waters by raising a point of order. But he was not upheld and the two irate members carried their war to the very hilt. There was a show of peace at the close of the incident, but the feeling between the two men ran so high that the mutual retractions with which such incidents generally end were but the cloaks for the keenest and most cutting sarcasm.

The bill as it passed the House is as follows:

"Be it enacted, etc., That the President of the United States be and is hereby authorized to acquire from the States of Costa Rica and Nicaragua, for and in behalf of the United States, control of such portion of territory now belonging to Costa Rica and Nica ragua as may be desirable and necessary on which to excavate, construct, and protect a canal of such depth and capacity as will be sufficient for the movements of ships of the greatest tonnage and draft now in use, from a point near Greytown, o the Carribean sea, via Lake Nicaragua to Breto on the Pacific ocean; and such sum as may be necessary to secure such control is hereby appropriated, out of any money in the treasury not other wise appropriated.

"Section 2-That when the Presi dent has secured full control over the territory referred to, he shall direct the Secretary of War to excavate and construct a canal and waterway from a point ou the shore of the Carribean sea near Greytown, by way of Lake Nicaragua to a point near Breto, on the Pacific ocean. Such canal shall be of sufficient capacity and depth as that it may be used by vessels of the largest tonnage and greatest depth now in use and shall be supplied with all necessary locks and other appliances to meet the necessities of vessels passing from Greytown to Breto; and the Secretary of War shall also construct such safe and commodious harbors at the termini of said canal, and such provisions for defence as may necessary for the safety and protection of said canal and harbors.

"Section 3-That the President shall cause such surveys as may be neces sary for said canal and harbors, and in the construction of the surveys shall employ such persons as he deems necessary.

"Section 4-That in the excavation and construction of said canal, the San Juan river and Lake Nicaragua, • or such parts of each as may be made available, shall be used.

"Section 5-That in any negotiations with the States of Costa Rica or Nicaragua the President may have, the President is authorized to guarantee to said States the use of said canal and harbors upon such terms as may be agreed upon for all vessels owned by said States or by citizens thereof.

'Section 6-That the sum of \$10,-000,000 is hereby appropriated out of any money in the Treasury not otherwise appropriated towards the project herein contemplated, and the Secretary of War is further hereby authorized to enter into a contract or contracts for materials and work that may Hemming in the Boers.
