The military wer hopiog that Tinio would form another army because an army can be located and followed, and if it will try to make a stand can be defeated, such good fortune is improbable For one reason that the Americans are so disposed, covering most of the important roads and passes that i would be impossible for more than few hundred Filipinos to attempt to assemble without many of them being discovered, and, he added, for another reason that the Filipinos have learned that they can handicap the Americans progress more effectively by irregular operations.
