I stood near enough to touch "The guns had not been fired fo Commodore Schley at that time, with some time, had they?" in five feet of him. The Spanish ships "Not since we had passed the Vis had gotten out and the Viscaya, the

"Do you know whether there were

"Hence, you were not in range?" "No. sir.

"How did the Brooklyn bear?" "I should judge she was about be ween two and three points, nearer two points, forward on the port beam and certainly a mile away."

"How did she appear to be heading relative to the Oregon and the Spanish vessels?"

"There was only one vessel left a that time, the Colon, and I think her course was slightly divergent from starboard hand and she was fully a that of the Oregon, which led to the third of a mile from us. There was opinion that she was heading for never any question in my mind about the headland beyond the Colon with striking her. We did not cross her the intention of cutting off that vessel

"Which vessel, the Brooklyn or the Oregon, was nearer the Colon when it went ashore?"

"That is very difficult to say. Pracically the two vessels were on the same circle. Probably the Brooklyn was a short distance nearer, but the difference was hardly appreciable. The Brooklyn, however, was 9,000 yards or more from the Colon. This know from our bearing and range." In response to a question from the court, the witness said that he knew of the receipt of no signal from the Brooklyn until well after the chase

had begun, when he had understood that the Brooklyn had signalled to Ellis raised the stadimeter to his eye close up.

and as he did so a shell took his head Lieut. Ackerman was succeeded on the stand by F. T. Applegate, who was a gunner on the Brooklyn. The witness said:

> "Before the battle the guns and the auxiliary machinery attending them were in excellent condition. After the battle we found all of the five-inch guns on the starboard side broken in some part, or the lifting gear of the guns carried away. The bores of the guns were pitted and the muzzles of two of the guns were so swollen they had to be removed from the ship.' "Can you tell me anything about the ammunition expended on the Brooklyn on the day of the battle?" "We used up 566 five-inch shells, 164 eight-inch, 1,200 six-pounders and

400 one-pounders.' "During the battle was there any time within your observation that some of the guns of the Brooklyn could not have been trained on the enemy?"

found it necessary to pound his gavel "No, sir." on the table and admonish the au-"Some of them were al tys in use?" dience against such demonstrations. paid the bill and gone away some 15 minutes before, that he had put his hat on as he went out and that he (the clerk) had not noticed anything peculiar in his actions. The bank president congratulates

himself that he can be trusted to behave like an ordinary mortal even when he doesn't happen to have his mind with him. An editor of a daily paper has laid himself open to unkind remarks by trying to take up a collection in his office. Happening to want a small

coin, he turned to his fellow worker and asked for a quarter. "Haven't got it, but here's a dollar, the man replied as he tossed it over The editor put the dollar in his pocket and immediately turned to a special writer at the next desk and said:

"Miss ----, could you lend me a quarter?" Then, seeing the man from whom he had got the dollar grin, he added hastily: "Oh, never mind. I just got a dollar from Brown." In analyzing his conduct he said that Brown's reply that he did not have a quarter was apparently the only part of the transaction that made any impression upon him. But he is under suspicion in that office and will probably never be able to live it down.

HOW ZULU WOMEN SEW.

They Use Skewers For Needles an Giraffe Sinews For Thread, The skill of the Zulus of South Africa

in sewing fur is a household word in South Africa, and some of the other tribes compete with them. The needle employed is widely different from that used by the ordinary needlewomen. In the first place, it has no eye; in the second, it is like a skewer, pointed at one end and thick at the other.

The thread is not of cotton, but is made of the sinews of various animals, the best being made from the sinews in the neck of a giraffe. It is stiff, inelastic, with a great tendency to "kink" and tangle itself up with anything near it. Before being used it is steeped in hot water until it is quite

soft and is then beaten between two smooth stones, which causes it to separate into filaments, which can thus be obtained of any length and thickness. Thus the seamstress has a considerable amount of labor before she commences with the real work in hand. Finally she squats on the ground (for no native stands to work or do anything else who can possibly help it) and, taking her needle, bores two holes in the edges of the rug or garment on which she is working. The thread is then pushed through with the butt of the needle, drawn tight, and two more holes are made with

a like result, the skewer progressing very slowly, but fast enough for a country where time is of no value whatever.

The skin upon which the seamstress is working is damped with water before she commences, and as the damp thread and hide dry out they bring the work very closely together.

Purify the Blood

By taking the old reliable Botanic Blood Balm (B. B. B.); cures ulcers, scrofula, eczema, pimples, itching skin, aching bones, boils, carbuncles. If you are all run down take B. B. B.

ordered the e ieer to return and get his train. The train arrived here at 7:30, about four hours late. The news was wired from Sagiraw and officers were out in search of the robbers early this morning, but as yet have secured no trace of them. They are handicapped by having no de scription of the men. Posses from both Lave and Douglas counties are

searching for the bandits. The Messenger's Story.

PORTLAND, ORE, October 23.-The Southern Pacific train which was held up near Eugene this morning, arrived here this evening. The express car is badly shattered but it was brought in with the train.

"The first i. timation I had of any thing wrong," said C. F. Charles, the express messenger, "was when the train began to slow up near Walker's station. It was 2:45 o'clock, as near as I remember. Shortly after the train came to a standstill and I was ordered to open the door. I refused to move.

"Open up this car or we will blow .you to hell," commanded one of the robbers. I made no response and was given a salute with dynamite. The first charge blew open one of the doors and knocked me down. My overalls were blown into shreds and my legs scratched somewhat, but otherwise was unhurt. Further commands to open up and threats followed, but without avail. I made no reply, knowing that the object of the tobber was to locate me in the car and then try to put me out of the way either by dynamite or bullets. I changed

my station to the other end of the car. A second shot blew open the door a the other end of the car. The third shot failed to go off, as I had removed my shoes and quietly walked over to the dynamite and detached the fuse. Two more shots exploded, each of them blowing a hole in the floor of the car. All told, four shots went off in the car, two failed to explode and one I prevented from exploding by removing the fuse. All efforts to compeme to open up or leave the car failing the engineer was sent in through the opening blown into the side. I ordered him to get out and fired a shot over his head with my shot gun. The entire ceremony lasted about forty minutes. The engineer retired after I fired the shot and ordered him to leave, and I was not molested further.

Reward Offered.

SAN FRANCISCO, Oct. 23. - The Southern Pacific Company has offered a reward of \$250 for the arrest of each of the robbers implicated in the Sugene, Ore., hold up.

LOUR-# D-EUGENE, ORE., Oct. 23.-Officers who have been searching for the train robbers to-day have been unable to secure any trace of the men. Their GRAINtracks show that they started toward Eugene after leaving the engine. There is absolutely no clue to their identity.

Dr. C. J. MOFFETT-My Dear Sir: Justice to you demands that I should give you my expe-rience with your excellent medicine TEETH-INA. Our little girl, just thirteen months old, has had much trouble teething. Every old, has had much trouble teething. Every remedy was exhausted in the shape of pre-scriptions from family physicians. Her bowels continued to psss off pure blood and burning fever continued for days at a time. Her life was almost despaired of. Her mother deter-mined to try TEETHINA, and in a day or two there was a great change-new life had re-turned-the bowels were regular, and, thanks to TEETHINA, the little babe is now doing well. Yours, etc. D. W. MCIVER, Editor and Proprietor Tuskages (Ala) News. Editor and Proprietor Tuskegee (Ala.) News
