Pleasant Dreams she retires to rest. The mother smiles, but sighs. She knows that the pains that rack her will not stop for darkness,

and that if she sleeps her dreams will only be echoes of the sufferings of the day. Why not sleep soundly and rise refreshed at morning, with strength and courage for the day's duties? Weak, nervous sufferers from backache, bearing-down pains, and other womanly ailments, have found a perfect cure in

EP. Dr. Pierce's Favorite Prescripwomanly diseases

which cause the pains and nervousness. It makes weak vomen strong and sick women well. women strong and sick women well.

"I deem it my duty to express my heartfelt gratitude for having been the means, under Providence, of restoring me to health," writes Mrs. B. H. Munnøof Springhill, Leon Co., Fla. "For nearly two years I suffered from female weakness so I could not stand on my feet any length of time; could scarcely walk at all. Appetite was much impaired; I had bearing down sensations; can't express how badly I did feel. Had tried several kinds of medicine which did me little or no good. At last decided to try Dr. Plerce's Favorite Prescription. I had not taken all of two bottles before I saw it was benefiting me, so I continued to take it until I had taken seven bottles, when I felt entirely oured. Did not feel a touch of my old complaint. It has been over a year since I took your medicine, and I can truthfully say that my health has been better for the last year than it had been for four years previously.

"You may publish this as a testimonial."

SUNDAY SELECTIONS.

- God picks his own messengers, and his own time and place of sending

-The devout soul is likely to

meet with God even in the most unexpected places. - Christianity is the religion of a living Christ, one who can sympathize with us in our infirmities

- No matter how weak a man may feel himself to be, he grows strong in associations with God. - Take away the living, personal

Christ from our religion and it be-comes nothing but an empty form. - Repentance must be something far more than mere remorse for sin; it comprehends a change of nature be-

- Worry makes headache and the blues and a heavy heart. Christian tolerance and charity, born of love, make toward contentment and joy.

Which is better? - The Holy Spirit prepares the soil—the heart—for the reception of the seed-the word of God-but with-

ovt the seed there can be no fruit bear-- Worrying is one of the greatest drawbacks to happiness. Most of it can be avoided if we only determine not to let trifles annoy us, for the largest amount of worrying is often caused by the smallest trifles.

- Am I to thank God for everything? Am I to thank Him for bereavement, for pain, for poverty, for toil? Be still my soul; thou hast misread the message. It is not to give thanks for everything, but to give thanks in everything. It is not to praise God for the night, but to bless Him that the not is not deeper.— George Matheson, D. D.

Modern Meatmaking.

The great heavy bullocks and thick sided porkers that were once such favorites are now not desirable, says a writer in American Agriculturist. They have given place to the young, quickly grown animals. In order to avoid an excess of fat an animal must be continuously grown. If it is reduced to a mere shadow during the winter months and then the following season allowed its freedom on the rich range grass of the west, it will lay on too much fat and not enough meat. Tallow is not what is wanted; it is meat that the present generation desires. The eastern feeders are fully aware of that fact, for they never allow an animal to stop growing from birth until it reaches the slaughter house. They will cultivate the taste of the meat eaters to such a degree that it will force those who cannot procure sufficient feed to keep their animals in good flesh through the winter to sell them at weaning time.

Holstein-Friesians For Beef. Here on the range I have Shorthorns, Herefords and Holsteins, not pure breds, but high grades, says a Montana man. I butcher usually one or two beeves a week and find that the Holstein will average with the other breeds. In fact, the heaviest, fattest animal I have butchered was a Holbefore last, wintered herself the following winter and dressed out nearly 800 pounds of good beef last September. This was all done on the range grasses. She was never fed a pound of inything but salt.

Make fat cattle as comfortable as pessible in every way, and for your sains the weight of beef made will ambly repay you when you sell them to

— Maud—When are they to be fected, which will not be long. If they married? Ethel—Never. Maud— do not lick it readily from the hand, put it in their months, and they will will not marry him until she marries him.—Tit-Bits.

the Kind You Have Always Bought

HOW THEY SHOULD BE TREATED WHEN IN FOAL.

Ioderate Work Is Beneficial-Feed Onts and Clover Hay In Plenty and but Little Corn-Points on Rearing the Youngsters.

The dam should have good care at all

times, but especially for two or three months before foaling and at foaling time, says C. L. Hardman in Prairie Farmer. The brood mare should have but little corn the last two or three months she carries the foal, but be fed plenty of oats and clover hay. The foal will then be thin in flesh but strong in bone and will fill up and grow rapidly from the start if the dam is fed and cared for rightly. The dam is all the better for being worked moderately right up to within a few days of foaling. If you have more brood

mares than you can work, be sure to give them proper exercise by turning them into the field or lot during pleasant days, but always stable at night if the weather is at all cool or wet. I like a box stall not less than 14 feet square in which to turn the dam loose. You can tell at least several hours beforehand when the dam is going to foal. When the milk is plentiful in the bag and begins to drop out, you may expect the foal soon. I have kept close watch over my brood mares for several years, and they have invariably foaled between 2 o'clock and 6 o'clock p. m. or 2 o'clock and 6 o'clock a. m., and I always aim to be on hand, so as to render assistance if necessary. I have raised a good many colts and have never lost one at foaling time. The dam will be ravenously hungry and should have a pail of water and a wisp of bright hay immediately after foaling.

She will eat as though starving. She should not have any corn for several days and but little oats the first two or three days. The oats can be increased gradually until the dam is on her regular feed. Watch the bowels of both dam and foal. The danger from this source is much greater than most men think, for many foals die when 2 or 3 days old if their bowels do not move all right. They will refuse to suck and dwindle along a day or two till they die. When you notice the first symptoms of trouble, give an injection of one or two quarts of warm soapsuds. I use tar soap, which I have always found satisfactory. If this does not give immediate relief, give as a drench one-half pint of raw linseed oil. I have never known these remedies to fail if used in time.

If the foal does not come until after we have grass, turn the dam on grass, and the danger from bowel trouble will be greatly lessened. But I much prefer my colts to come by the first half of April than later. I do not work a mare for ten days after foaling. When the foal is 10 days old, the mare should be bred again, or if the tenth day happens on Sunday I breed on the ninth sooner than that. If you find it will throw your colts too early to breed the mare the tenth day, you will doubtless find her in season some time between the twenty-eighth and the thirty-sixth

Do not work the mare until dark and then run her off to town and breed her when the horse also has probably had all he ought to do during the day. Do not run her four or five miles back home after breeding her and put her into the harness next morning, with but little or no rest, and then wonder why she does not get with foal. In such cases I drive the mare slowly and work her moderately or give her a day's rest, and I seldom have to breed her a second time. I aim to take my mares to the horse from the eighteenth to the twenty-first day to make sure they are

FEEDING YOUNG BULLS. Breeders Cautioned Against Giving

Too Much Corn. I have for a number of seasons fed young bulls, both Shorthorns and Herefords, although I never before weighed their daily rations until in the present instance of three young Shorthorns which I bought last December in Illinois and Kansas, says a Colorado grower in The Breeder's Gazette. Their ages follow: Clarence, calved Dec. 30, 1899; San Juan, calved Feb. 11, 1900; Bartlett, calved Feb. 6, 1900.

The three bulls weighed when I commenced to feed them Dec. 27, 1900, 2,180 pounds. On Jan. 10, 1901, they weighed 2,240 pounds; Jan. 23, 2,830 pounds, and Jan. 31, 2,375 pounds. I fed them from the beginning 8 pounds of wheat bran, 6 ponds of oats and 40 pounds of alfalfa hay per day for the first 14 days. The rest of the time from Jan. 10 to 31 they got 8 pounds of wheat bran, 4 pounds of corn chop and 40 pounds of alfalfa hay each day. Prices of foods are: Alfalfa hay per ton, \$8; wheat bran per ton, \$16; corn chop per ton, \$16; Colorado cats per

I find that oats and bran produce plenty of muscle and bone. A little corn chop added makes the cattle flesh up in good shape. I think if breeders would adopt this way of feeding they would not burn their young stock up inside as is the case with so much corn. Everywhere I went it was either shelled corn with blue grass pasture or corn in the ear with sugar cane or Kaffir corn. Some feeders in Kansas feed corn and cob meal and sugar cane or Kaffir corn, which I think is better than straight corn.

The Care of Brass.

Lacquered brass needs care if it is to last and look nice long. Of course it must not be cleaned with brick dust or any of the advertised polishes. It must never be touched with a damp cloth, but in damp weather the brass should frequently be rubbed with a dry duster or chamois leather, says The Evening Star. Damp destroys the lacquer more quickly than anything. Painting ordinary brass over with a solution of shellac after cleaning helps to prevent it from tarnishing.

Stewed Potatoes. Cut six or seven medium sized potatoes into half inch squares, put them in a saucepan with enough boiling water to cover, heat thoroughly and then pour off the water. Put half a pint of white sauce into a stewpan with salt, pepper and nutmeg and simmer very slowly for about eight minutes. Melt two ounces of butter, put in two tea-spoonfuls of chopped shallot and fry for a few minutes, but do not

Scours In Calves. For scours in calves give two or three tablespoonfuls two or three times a day of powdered charcoal until a cure is efsoon take it freely.-Farm and Home.

ABOUT BROOD MARES THE GOVERNMENT

CLOSED ITS CASE.

Defence Made Preliminary Statement in Behalf of Mrs. Bonine, the Prisoner.

AYRES' FATHER TESTIFIES.

Told of an interview With the Prisoner She Was Cold and Unsympathetic The Nerviest Woman fie Ever Saw-Other Witnesses.

By Telegraph to the morning Star. WASHINGTON, November 30 .- The government to-day closed its case in the trial of Mrs. Lola Ida Bonine for the killing of James Seymour Ayres, Jr., and Attorney Keene, of counsel for the defence, made a preliminary statement in behalf of Mrs. Bonine. It was made evident from Mr. Keen's statement that the effort will be made to show lack of a mo tive for the crime on the part of Mrs. Bonine, and to support her plea that Ayres was killed in a struggle after he had tried to intimidate her with a re-volver. The principal witness on the stand to-day was Prof. Schaffer, a chemist, who made a microscopical examination of the wrapper worn by Mrs. Bonine on the night of the tragedy, and who said that he had found no traces of blood upon it. He also said that he saw no blood on the slippers which she had worn on that oc-casion. Another witness of the day was Ayres' father, who told of an interview he had had with Mrs. Bonine three or four days after the killing. He outlined his efforts to arouse her sympathy but he said that she did not

The court room to-day presented somewhat the appearance of a junk shop, from the fact that a number of the belongings of Ayres' room in the Kenmore Hotel were exhibited. These included the blood-stained carpet which covered the floor, Ayres' two trunks and a section from the inner part of the wall of the room, belong ing under the window, showing blood upon plaster and washboard. The wrapper worn by Mrs. Bonine on the night of the tragedy also was shown. Lieut. James A. Moore, of the police force, was the first witness. He identifiled this miscellaneous assortment of chattels.

Pather of the Victim.

When Dr. Schaeffer was excused, James A. Ayres, father of the victim, was called to the stand. He told of coming to Washington the day after the tragedy. Mr. Ayres said he had sought out Mrs. Bonine "and," he said. "I told her about my boy who had been murdered." He then went day. I do not think it advisable to on to say that he told her how his son three years old, and how near and dear he was to him because of the care he had given him. "I tried," he said, "to be as sympathetic as I could, be cause I had it in my mind that Mrs. Bonine was the destroyer of my son's life and I wanted to find the guilty one. I really opened up my heart to her, telling her how when he had left me in Detroit he had thrown his arms about me and kissed me on the lips as a daughter would have done. I told her how I had admonished him to pro tect his reputation, saying to him that he was going to a tough

In response to a question from Mr. Gould, Mr. Ayres said that Mrs. Bonine had made no response while he was talking, but that when he concluded she said something which he would never forget. What this something was Mr. Ayres' statement did not reveal and no question was asked to bring it out. "I thought that Mrs. Bonine, being a wife and mother," he said, "would manifest some sympathy for me in my distress, but she mani-fested no emotion whatever and interrupted me only once. Then she looked up and smiled in what I thought was the attacking party at their points.

a deceitful manner and recited a quo-Mrs. Bonine Unsympathetic.

In response to another question from In response to another question from Mr. Gould, Mr. Ayres said that in this interview Mrs. Bonine's manner was calm, self-contented and non-committal. "I thought," he said, "that she was the nerviest woman I ever saw. She manifested no emotion and expressed as a suppose that " pressed no sympathy."

Mr. Douglass announced, when Mr.

Ayres had concluded, that out of respect for the defence and the feelings of the father of young Ayres they would ask no questions of him on cross-examination. He also said that for the same reason he had not interrupted Mr. Ayres in making his statement, not withstanding it was in many respects a violation of the rules of evidence. Mr. Gould then announced that the prosecution had closed its case.

Defence Outlined.

After recess Attorney T. W. Keene, of counsel for Mrs. Bonine, made the preliminary statement, outlining the defence. He contended in the beginning for due consideration of the presumption of innocence. This, he said, was evidence, not a mere formality. It was not the purpose of the defence to minimize the offence of which his client was charged, for it was undeniable that the tragedy had fallen heavily upon two families. Many guests of the Kenmore were to be introduced, said Mr. Keene, and he believed it would be shown that the character of the people living there was good. Mr. Keene called attention to the fact that Mrs. Bonine was hosen as a leader in the social festivities of the hotel, and this choice, he said, fell upon her because of her capacity. The defence would show that she had taught seven young men to dance. In December, a dance of more than ordinary importance had been given and young Ayres had appeared there so much intoxicated that he was offensive to those in attend ance and Mrs. Bonine had been compelled to ask a friend of the young man to get him to retire. This incicident had, he said, led to some dis-

Relations with Ayres. Continuing, Mr. Keene said it would be shown that in getting up the dances Mrs. Bonine had visited the rooms of all persons, regardless of sex or age, who could dance, to get them to parti-cipate. It would also be shown that Mrs. Bonine was fond of medicine and that this fondness had served in minis tering to the sick, and that she did visit many of them. Another point that would be developed was that the relations between Ayres and Mrs. Bonine were not such as to cause them to feel unwilling to break them. Proof also

would be given that on March 4th Mrs. Bonine had reproved Ayres for drinking, and that while some coolness resulted, there was no strong feeling between the two, as was shown by the fact that on the Monday before the killing she ate ice cream with Ayres. It would also be shown, he said, that on the evening before the tragedy Mrs. Bonine's manner was not that of a person with murtimony, he said, that would show the window shade in Ayres' room had been run up with a bloody hand, and that hand was Mrs. Bonine's. Evidence also would be introduced to show that Ayres owned the pistol. He referred to the four or five statements made by Mrs. Bonine and said there was no inconsistency in them. His client did not desire to modify or change them, but would stand by

When Mr. Keene concluded the court adjourned until Monday. BOERS REPULSED.

Attempted to Break British Cordon of Block Houses Along the Railway. By Telegraph to the Morning Star.

PRETORIA, November 20.—The Boers on the night of November 26th made a general attempt to break the block house cordon along the railway west of Middleburg, but were repulsed with, it is thought, considerable loss. An armored train turned back the main body of 200 of the enemy and garrisons of the block houses checked PUZZLE PICTURE.

Locomotive Engineering describes new compound rack locomotive, the latest product of the Baldwin Locomotive works, built for the Manitou and Pike's Peak railway. The engine is unusually powerful for a locomotive of this kind, weighing 62,455 pounds in working order, of which 44,155 pounds are on the drivers. The cylinders are 10 and 15 inches by 22 inch stroke. The

NEW ENGINE FOR PIKE'S PEAK RAILWAY. poiler is 44 inches diameter and carries a working pressure of 180 pounds The Manitou and Pike's Peak railway is built on what is known as the Abt system of rack rail and climbs a grade of 25 per cent. This latest production of the Baldwin Locomotive works is said to be the heaviest rack rail engine used anywhere.

This engine has a device for automatically applying the brake, should speed become excessive in descending. At a test the engine was started down alone and stopped itself exactly as planned.

Electric Disinfection of Cars. Nothing sweetens or freshens stale air better than ozone, says The Lancet, and now that most of the railway companies have successfully adopted a system by which each carriage on its journey develops by means of a dynamo attached to the axletrees its own current of electricity for lighting purposes there is no reason why the same current should not be utilized at the same time to ozonize the air of the compartment. The quantity of ozone required is small. The result would certainly be good, since the ozone has a remarkably destructive action on aerial impurities and unpleasant smells and gives the air a degree of freshness similar to that of the sea breeze.

Electricity For Mountain Climbing. The Canadian Pacific railway is about to install electric power for hauling its trains when they cross the Rockies. It now requires about four locomotives to pull and push a train over the heaviest grades. The railway proposes to use the enormous water power right at hand.

American Chickens In England. To the many American commodities with which England is supplied there is now to be added the United States chicken, in which already an enormous import trade is being done. As yet the industry is, comparatively speaking, in s early youth, but so great has be the demand that one firm alone is already sending 150,000 dozen birds yearly to this country, and the trade is in A Daily Mail representative who

made inquiries in the Central and Leadenhall markets was informed that the American chickens were doing well in England mainly because the birds were of good quality and, furthermore for the reason that they were packed in a handy way for the buyer. It was also pointed out that the many advantages offered by the American railways for the conveyance of live birds from the breeding places to Chicago resulted in the poultry arriving at the slaughter place in prime condition. When frozen, they are packed in cases of one dozen each and sent right on to Lon-

The view is very general among importers that the American chicken will not compete to any extent with the English product, but with the Russian fowl, which is already finding a dangerous rival in the United States bird. In proof of this there is the assurance of one firm that yearly imports immense quantities of Russian poultry to England that next year great improve ments in feeding, selection and packing are to be made in the Russian trade. Meanwhile the consumer will wonder why no one has ever seen a chicken labeled either "Russian" or "Ameri can," and the inference must be that both are sold for whatever the customer may like to think them.-London

Calffetter.

By Telegraph to the Morning Hist WASHINGTON, Nov. 80 .- Tue President to-day appointed Thomas B. Ferguson Governor of Cklahoma, vice William M. Jenkius removed. In taking this action the President attached to the papers the following memorandum: Gov. Jenkins, of Oklahoma, is

kins, Removed-Cause of Change.

hereby removed because of his im-proper connection with a contract between the territory and the Oklahoma Sanitarium Company. The decision is based purely upon his own written statements, and his oral explanations of them at the final hearing. One of the duties of the territorial governor is to enter into a contract with some person or corporation for the keeping of the insane of the territory. Gov. Jenkins made such a contract with the Oklahoma Sanitarium Company, a corporation, the promoters of which reserved ten thousand dollars of its stock for the Governor and subject to his orders. The stock was delivered to s banker, subject to the Governor's orders, and was turned over to friends whose political services the Governor thus sought to reward.

The governor's confessed relations to the matter discloses such an entire lack of appreciation of the nature of the duties of his office as to unfit him for their discharge.
A sound rule of public policy and morals forbids a public servant from seeking or accepting any personal benefit in a transaction, wherein he

has a public duty to perform.

A chancellor would not for one moment retain a trustee who, in dealings for the trust, reserved an advantage to himself. The thought is not to be tolerated that the President can be less vigilant and exacting in the public's
