Reported to War Det .. ment from Phil ipplace--One Postmaster Carried Off

Safe as Well as the Money.

By Telegraph to the Morning Star. WASHINGTON, May 27 .- The Philippines are having their postal scandals, as well as Washington. Two cases are reported by mail to the War Department to-day. One is that of former Postmaster Milne, at Tacloban, L vie, who is accused not only of taking \$2,000 current coin of the United States, but even the four hundred pound safe which is supposed to have contained the money.

ty space at the thick end by evaporation of water from the white; hence the egg takes a different position in the water. Fresh eggs remain hori-

zontal, an egg three to five days old makes an angle of 20 degrees with the horizon, one eight days gives an angle over 45 degrees, and at the end of fourteen days the angle is 60 degrees. An egg three weeks old lies at 70 degrees. One three months remains vertical, and when it is older still it floats.

How to Destroy Cooking Odors. If the cooking of the turnips, onions or even the turkey has left the least suggestion of its preparation in the dining room, pour a few drops of oil of lavender in a vase or bowl and half fill with hot water. This gives a delightful freshness to the air, which is most desirable when the house is stuffy and doors and windows cannot be thrown open at the last moment.

### How to Destroy Moths.

Make a mixture of gasoline and one fourth as much wood alcohol, in which has been dissolved as much corrosive sublimate (bichloride of mercury) as it will hold. Inject this with a syringe into the cracks of a wall and floors and spray "infested" furniture with it, behind and under upholstered seats, etc. Take one room at a time, being careful to have no fire or artificial light about. and shut the room up closely for eight hours. The process may have to be repeated once a month for perhaps three months if the infliction be grievous, but if faithfully done it is sure death to all vermin.

How to Clean Enameled Shoes. Enameled shoes can be kept in good condition by washing them in sweet milk. All dust and mud should first be removed: then the shoes should be thoroughly washed with the milk and then wiped dry with a soft cloth. This will give them a polish almost equal to new and will help them to retain their smart appearance for a long time.

### How to Stew Lobsters.

For luncheon or for a late supper stewed lobster is a delicate dish. It is not difficult to prepare, and if the lobster is boiled in advance it can be got ready in a few minutes. First extract the meat from a boiled lobster, cut it up into small pieces and put in a stewpan. There should be just enough water to keep it from burning and to make the gravy. Cook it slowly for five minutes, and add one tablespoonful of butter, a little pepper and salt and then heat to boiling. Pour it into a dish and serve hot.

How to Keep Flatirons Smooth. To prevent irons from sticking rub them with a piece of beeswax tied up in a bag of cheesecloth. This will make them both smooth and clean. Salt spread on pepper and the iron rubbed over vigorously is also a very good way of cleaning them.

# How to Make Olive Sauce.

An olive sauce is an excellent relish to serve with warmed over meats. Brown one tablespoonful of butter, add one heaping tablespoonful of flour and brown again. Add half a pint of beef stock (that made from extract of beef may be used) and stir until smooth and thick. Season to taste. Add one tablespoonful of worcestershire sauce and one dozen olives chopped fine and simmer five minutes.
