What use et," the accomplished liar who tells us that we are getting so much more wages that the cost of living looks like 30 cents, had better look out for the blow that cut off the mundane career of Colonel Ananias. North Carolina amateur soldiers on If the cost of existence keeps on the return, gave the people along the soaring, the people will get mad Southern railway one more argument after awhile at the attempt of the Bureau of Statistics to filmflam us with false pretences about the increase is our pay. If we just had those statisticians by the nape of the neck, we would make them know better than to make a lot of figures monkey with the truth.

crop, but the increased demand for corn bread would also cause

The high jinks which wheat has been cutting up at Chicago is no joke. The soaring prices have been due principally to the pessimistic report issued last Saturday by the Agricultural Department. The speculators interpret the report to their advantage in keeping up the price of wheat to the highest level. The short crop of this year and the government report as to damage to spring wheat is used by the dealers to send up the price. On the Chi-_cago Board of Trade on Monday there was no end of talk about an insufficient supply of wheat for consumption in the United States, much less for exporting purposes. The fact is, there was talk of the necessity of our having to imr port wheat from Canada to meet the demand of consumors in this county. Of course the bulls use that kind of talk to boost prices, but nobody is prepared to believe the situation is that bad. It, however, price of wheat and correlatively ad-
