Rumor That Chinese Massacred Eighty Poreigners, Including American Correspondent, at Makden-la Tie Pass Captured?

Meagre reports have been received from a Russian source of a fight eight miles south of Tie pass between & Russian force, under General Mistchenko, and a Japanese column, the identity of which is unknown. The latter was repulsed, it is said, with a loss of 1,000 killed. The rumor that after the evacuation of Mukden eighty foreigners, including an American newspaper correspondent, had been murdered by Chinese is discredited by the fact that the correspondent in question reported to his paper on March 14 h that he had been captured by the Japanese and was being taken to Kobe. A steamer arriving at Singapore reports having passed a squadron of twenty-two Japanese warships about twenty miles east of the entrance of the straits of Malacca. Two Japanese cruisers and two auxiliary cruizers previously arrived at Singspore. Presumably these vessels are on the way westward in search of the Russian second Pacific squadron, last reported in Madagascer waters.

ST PETEBSBURG, March 16, 2 A. M. -Flanking tactics by the Japanese apparently are in progress again. The Associated Press correspondent wio remains at Tie pass telegraphs that Gen. Misichenko on March 14 engaged a Japanese force on the Russian right. It is possible that the attacking force was a Japanese column which disappeared from observation during the battle of Mukden. The Japanese do not appear to have renewed the frontal attack up to noon yesterday, the demonstration on Tuesday having shown that the Russians were prepared to make a determined resistance.

The Associated Press correspondent though saying nothing regarding the commissariat arrangements; for the troops, declares that the newspaper correspondents have practically been arraved out of Tie pass. Russia's disinclination to consider prace appears to have induced the decision of the financiers not to proneed with the contract for a loan and accordingly the signing of it, which was expected yesterday, has been postponed and all the pending negotiations are also postponed. According to the Russian view this does not mean that the negotiatiations have been broken off, but merciy that they are adjourned, as the Russian authorities as; the syndicate holds itself bound to wards Russia now as before. However the circumstances of the adjournment tend to show that the syndicate toclines to wait for some definite development of peace before proceeding

any further. It is significant that the postponement of the loan is coincident with a strong movement of the influential Freuch press favorable to peace. The Matin prominently displays a statement believed to reflect the views of financial circles which declares that if Japan is ready to adopt a generous attitude by waving an indemnity or impistog any humiliation upon Russia, then Russia's policy of war to the bitter end will cease. It is notable that some of the Russian officials speak approvingly of the latter propositions. They say peace is impossible if an indemnity or any humiliating conditions are asked, so that the eliminition of these two points will go far towards securing favorable consideration of peace.

THE RECUTIVE SESSION. WASHINGTON, March 15 .- Republican leaders of the Senate are all at sea respecting the action advisable to take in regard to the Santo Domingo treaty. Recognizing that the Democrats coutrol more than one-third of the votes and that two thirds are required to ratify the convention, the that the treaty should be withdrawn by the President. On this subject the Senate and the President do not agree and the idea provails that after one or two days more of inconsequential dis cussion the special session of the Ben ate will be allowed to adjourn without date and the treaty lapse. But this plan is not popular in the Senate and a way to avoid it is being sought. One alternative which in the discussion concerning it was termed merely an excuse for inaction is that Senator Cuilom, as chairman of the committee on foreign relations, should offer a resolution directing the President to appoint a commission to make an investigation of the Santo Domingo debt and other questions involved in the protocol. This plan was agreed on tentatively as the programme most de sirable under existing conditions, especially as it is believed that such a resolution could be adopted without debate. No decision was reached however, and other plans have been

suggested or are brewing. The debate during the day was uniformly uninteresting, in spite of the fact that it was broken up by ques tions from both sides of the chamber. As in the preceding discussions, party lines were drawn. The Republicans supported the treaty and the Democrats opposed it. Among those who alked for the treaty were Senators Spooner, Hepburn, Platt of Connec ticut and Fulton, while those who op posed it were Senators McCreary, Morgan, Culberson, Newlands, Ma

lory, Clay and Bailey.

Hope has been abandoned of ratify ing the Santo Domingo treaty at the present session of the Senate. The treaty is not dead, but will be laid aside a few months. Senator Cullom and several other Senators talked with the President to-day about the matter and all the indications are that no definite action on it will be taken at present.

WASHINGTON March 15.-Greater care in the selection of the Federal judictary was urged in executive session of the Senate to-day. The subject was introduced by Senator Batley who commented on the fact that the President was not a lawyer and therefore not likely to always weigh a candidate's legal knowledge as thoroughly as would be done by a lawyer-president He mentioned the case of ex-Representative Dayton, of West Virginia, who was confirmed yesterday for the northern district of his State. The Senator spoke of criticisms that had been made because of this appointment and said that while they may be entirely groundless it was the outy of the Senate to scrutinize closely all appointments to judgeships, and get away from partisanship in considering them. The discussion became general and Senator Bailey's sentiments were echoed by a number of other Senators. Many sulogistic things were said of former Representa tive Dayton, but at the same time the plan of filling the judiciary from members of Congress whose finess had not been proven was criticised severely. Objection also was made t the rewarding of defeated members of Congress by giving them places on the beach.

> CASTORIA. The Kind You Have Always Bought

Not Nearly as Dangerous as It Is Popularly Supposed to Be. "There is a good deal more fright about the bite of a rattlesnake than there is actual danger," said a well known physician recently. "I do not mean to say that the bite of a rattler is not a very serious thing, but I do mean to say that this particular sort of snake is really not so ready or apt to 'get in his bite' as some others. "In the first place, there is the now generally credited fact that the rattler is the most honese of snakes. He doesn't 'pick a fight.' He doesn't lay in walt for any one. He won't run away, of course, for he is a plucky rep-

of the reptile. The snake was curled and ready for my borse in case the animal side stepped, but as we did nothing of that sort we were allowed to pass in peace. "Again, the truth is that the poison of the rattler does not get into the wound inflicted by the fangs in the average human being. For the average human being nowadays is clothed, and the holes in the fangs through which the poison comes are rather far up toward the roof of the mouth. Con-

sequently very often the point of the fangs may enter the skin, while the poison dribbles out harmlessly enough upon the tronsers or the boot. It is then that the 'victim' gets scared, fills up on whisky-a bad thing in bona fide cases of rattlesnake bite-and believes himself marvelously cured when he wakes up next day."-Philadelphia

Galileo's Wit. Galileo's wit, according to a biography, got him into trouble when he put into the mouth of Simplicio, the foolish opponent of the Copernican theory in his "Dialogues," an argument that Pope Urban VIII. had himself devised and insisted on Galileo incorporating in the work. Gallieo made Simplicio quote it as an argument he had from a "very eminent and learned personage." The

enemies of Galileo persuaded Urban that he had been "made game of," and this was the offense of which Galileo was guilty. It was not for upholding the theory that the sun stands still and the earth moves that Gallleo was tried by the inquisition. Urban himself had supported the Copernican doctrines both as cardinal and as pope. A Continuous Smoke. In the Philippines the use of tobacco is universal. The native child acquires

the tobacco habit as soon as it is able to walk. In the northern provinces especially it is no uncommon sight to see a child five or six years old puffing vigorously at a big cigar. The women smoke fully as much as the men and commonly smoke cigars where the men use cigarettes. In the northern parts of Luzon immense cigars often a couple of feet long and as thick as the wrist are used. Such a cigar is suspended from a rafter of the house by a string and smoked during the day by all the members of the family as desired.

- It took the combined efforts of two sheriffs to keep two women from engaging in a hair pulling match while the Superior Court was in session in Charlotte Tuesclosing: Wheat-No. 3 May \$ 113 4 @ day afternoon. The parties to the affair were Mrs. A. J. Groner and her daughter, Mrs. L. D. Benfield, and the trouble arose over a fourteen-year old girl, the child of Mrs. Benfield, who had been making her home with her grandmother, Mrs. Groner. On a writ of habeas corpus the case was brought from Catawba county and was being argued before Judge M. H. Justice in chambers. The writ was denied, and the mother who sought possession of her child was told that it was in better hands and therefore the court would not take her from her grandmother. Just as the litigants were leaving the court room, Mrs. Benfield, defying the order of the court, rushed on her aged mother and attempted to grab her by her hair. The child clung closely to her grandparent and raised her hand to ward off the blows that her mother would have struck, had it not been for the interference of the two sheriffs.

- At Raleigh on Tuesday there alighted from the afternoon train at the union depot a party which attracted the attention of all. Two young fellows handcuffed together, an elderly woman close by them, and two officers in charge, made up the party, which started down the track towards the State's prison. The prisoners, all of whom are white, are sent to the pen for burglary. They are a mother, her son and a nephew. The woman is Laura Cody, in for two years, James Cody, her son, in for ten years, and Loyd Cody, her nephew, in for seven years. They are from Madison county.

Wood's Seeds.

New Era Cow Peas are rightly named. They are the best of Cow Peas, whether for northern, western or seuthern planting. They are early to ma-ture, upright in growth, enormous-ly productive, both of vines and

peas, and are altogether the most satisfactory and sure croppers grown. We are headquarters for Cow Peas; had over forty different varieties in our exhibit at St. Louis, on which we were awarded

the Grand Prize. Wood's Descriptive Catalogue gives the fullest information about Cow Peas and all Garden and Farm Seeds. Write for it and special price list of Farm Seeds. T. W. Wood & Sons, Seedsmen,
