#### OLD TIME FOOLERS.

The old line Republican organ ization of Philadelphia, "the machine," which is responsible for the rottenness in the Quaker City, is out with a full ticket to fight the reform nominations. The machine nominations have been made on the promise of "accomplishing reform within the party."

The reeking old organization's promises are on a line with the pretences of the national Republican party which fools tariff reform Republicans by telling them that the tariff should be reformed in the house of its friends. When the G. O. P. sweeps the deck with a landslide it holds on to the high tariff with renewed grip and its answer to the tariff reform Republicans is that the country gave them an overwhelming vote of confidence with the understanding that they would "let well enough alone."

As an instance of how the Republican party makes the consumers pay the taxes, it proposes to relieve the deficit in the treasury by putting a tax on coffee. The Republican "statesmen" are bestowing a great deal of serious attention on the problem presented by the growing deficit in national revenues. That problem must be met in two ways-either by more taxes or curtailment of United States exported, in round expenditures. These are the althe value of \$614,000,000, or more them.
