Something New under the Sun!
NEW ERA IN PHOTOGRAPHY.
Mr. J. S. WEAR, Photographic Artist, WOULD respectfully announce to the Ladies and Gentlemen of Fayetteville and vicinity that he has returned from the North, after having spent much time assiduously, in the advancement and progress of his art, and at considerable expense in getting up apparatus, &c., for the prosecution of that beautiful and exquisite branch of Photography, which he will now present to the inspection of his former enlightened and discriminating patrons. The science of Photography, or as more commonly known under the appellation of Daguerreotyping, has until very recently remained in its infancy, but from the persevering and energetic researches in Actinic Chemistry, of many of its numerous and eminent votaries,—gentlemen both of this country and Europe—it is now shining forth in all the refinements of the most sanguine imagination, and is destined to contribute much to the advancement of the arts and sciences generally, as well as in faithfully and truthfully delineating the Human face divine. Pictures by this process are considered far superior to Daguerreotypes.
