\$500,000 more, making its entire assets ever \$300,100 invested as detailed in the statement referred to. These results indicate that during the period of nearly farty years since its organization, (without a single change of its chief officer,) its business has been conducted with judgment and prudence. It has been thus far successful in an eminent degree, discharging, as we are informed, all its obligations by the payment of about ten million dollars for losses, without asking a lay's delay in any instance. It has had but little lit-gation, notwithstanding the immeuse number of transtions made. In order to attain as much certainty as ossible in such a business as insurance, it has been the practice of the Company, for several years, at great labor, carefully to classify and arrange their risks into about fifty distinct classes, so as to ascertain the amount insured on each class, the amount of premiums received thereon, and the amount of losses upon each. This classification, extending over a long period, and covering property to a very large amount, furpishes reliable data, and presents a sound, substantial pasis of actual experience, upon which to conduct its siness. Insurance is not a matter of luck or chance, as many suppose; its hazards are ascertainable, and is principles capable of being reduced to a system, the ctical working and results of which are as certain that of any other business. The Etna Company, by adhering rigidly to its system, and placing its business upon a healthy basis, has obtained the confidence ther companies less cautious in their business. It is REFERENCE GIVEN AND BEQUIRED. a system like this, based upon experience, which gives stability and soundness to a company, and to the assured confidence and security.—Ballimore Patriot.
