Insurance is not a matter of luck or chance, as many suppose; its hazards are ascertainable, and its principles capable of being reduced to a system, the practical working and results of which are as certain as that of any other business. The Ætna Company, by adhering rigidly to its system, and placing its business upon a healthy basis, has obtained the confidence of the compunity to an extent experience, upon which to consider the confidence of the company to the company of the company of the company to the company of the company to the company of th borders and of Scotland: DeTocqueville's Democracy in America; Knight's Half Hours with the best Authors; Bulwer's Novels, complete in one vol; Plutarch's Lives: Modern British Essavists: Lyell's Principles of Geologistribation of its risks—a policy which it pursues with great strictness—limiting the amount to be covered in each locality. By this course it has passed, with comparative impunity, through some of the most with comparative impunity, through some of the most sweeping and destructive fires, which have swallowed up other companies less cautious in their business. It is a system like this, based upon experience, which gives stability and soundness to a company, and to the assured confidence and security.—Baltimors Patriot.
