STANDARD SCHOOL BOOKS, PUBLISHED BY THEM, AMONG WHICH ARE

The National School Readers, in 5 Nos., and Pronouncing Speller.

These are the latest reading books yet brought out,

and it is confidently believed surpass all others in general plan and arrangement, beauty of illustrations and typography, character of selections, and adaptation to the warts of schools. They are already in extensive use in the Public Schools of New York, Brooklyn, Albany. Newark, Lancaster, and other important places. Davies' Revised Arithmetics and Higher Mathematics.

Davies' University Algebra, Price \$1 25. An entirely new work, designed to occupy an interand Bourdon. It teaches the Science and Art of Algebra by a logical arrangement and classification of the priniples in their natural order, and by illustrating their apolication in an extended series of carefully arranged and graded example. It is Prof. Davies' last and best

Monteith and McNally's Series of Geographies, Prices 25, 40, 60 cents, and \$1.

Seem to be fast superseding all others. The plan on which they are arranged, their intrinsic merit, conciseness, beauty, and peculiar adaptation, render them great favorites with both teachers and pupils. They have been officially recommended by the Superintendents of Public Instruction of very many States, and by numerous Teachers' Associations and Institutes throughout the country, and are in successful use in a multitude of puble and private Schools in every State of the Union. Clark's Grammars, in two Nos., prices 40 and 60 cents, and Welch's Analysis, price 75 cents, It is believed present the only true and successful method of teaching the science of the English Language. They are the Standard Text-Books in the New York,

Michigan and other State Normal Schools, and in very many of the best Schools and Academies in the country. Parker's School Philosophy, price \$1, Is regarded as the most complete, concise, and practical Class Book on that subject yet published. It is more extensively used than any other, which fully de-

monstrates its pre-ciginent worth and superiority. Porter's School Chemistry, price \$1, Is one of the most admirable works prepared for Schools, and requires only a limited amount of apparatus to illustrate all the experiments described.
