Intimidation .- Tuesday merning, Mr. O'Neil, of Salisbury, commenced work on the wall of the Williamson, Upchurch & Thomas building on Fayetteville street, bringing with him from Salisbury all the hands required, numbering about thirty. Yesterday morning two of his hands come to time much delayed. Upon enquiry as to the cause of their delay, Mr. O'Neil was informed that they had been waited upon by several of the city mechanics and told that they would be mobbed if they did not conform to the eleven hour system that the Raleigh mechanics had exacted from their Bosses. Mr. O'Neil told them they could do as they wished as he brought about two hands too many along with him. The hands commenced work stating that all they wished was his protection.

Later in the day several rumors reached Mr. O'Neil that the city mechanics would pull down his work at night if he did not at once put his workmen on the 11 hour system of work, and he was even so informed.

Mr. O'Neil has a perfect right to work fourteen hours per day, and to employ his hands- accordingly, and any combination of men or measures to break him up or interfere with his business should be put down at once and

This place was suggested to them by his Honor, the Mayor, but the experiment Wednesday illustrated the fact that the place is badly selected. If we were all 'up among the stars, sailing around the moon," the position would do quite well.

It a stand cannot be erected, we would suggest that the music would sound much better if the band will stand somewhere pear Washington's Statue on the elevated ground, in front; or if this be objected to, on one of the porticos, Eastern or Western, of the Capitol. The roof is too high, and music from there reminds the passers by of the 'horns of Elfland faintly blowing."

The object of the Mayor was commendable-to afford all of our citizens in every portion of the city an opportunity of listening to the dulcet strains of the Cornet Band-but the roof of the Capitol does not answer the purpose.

IT IS A FACT.—There are standing contracts for buildings in this city, to be completed before January 1st, 1874, that will amount to over one and a half milwork on the Williamson, Upchurch & Thomas building on Favetteville street, with a set of hands all of whom he brought from Salisbu.y-did not draw on the city for a single workman.

It is a fact, furthermore, that two hundred good mechanics can find constant and steady employment here on application.
