THE DECISION OF THE SUPREME COURT IN REGARD TO THE DRUMMER'S LICENSE TAX .- The following decision of the Supreme Court of North Carolina was rendered a tew days since : Sinclair et al., vs. State of North Car-

The oplnion of the Court in this case referred to is clear and explicit. We will not repeat the reasons upon which it is founded, deeming it sufficient to say that the act in question imposes a tax which discriminates against traders who are pon residents, and in doing so violates the Constitution of the United States, which ordains, Article 4, Section 2, "the citizens of each State shall be entitled to all the privileges and immunities of citizens in the several States."

And, further, it would seem to be an infraction of Art. 1, Sec. 8, which ordains that, "Congress shall have power to regulate commerce among the several

States." We have thought proper to say this much upon the question of law raised by the pleadings, but we are inclined to regard the present application as an abuse of the jurisdiction conferred upon the Court by our State Constitution, which ordains Art. IV. Sec. 11, that "the Supreme Court shall have original jurisdiction to hear claims against the State, but its decisions shall be merely recommendatory; no process in the nature of execution shall issue thereon; us we mean no disrespect to any one in they shall be reported to the next sesdoing so, but only to carry out our deter- sion of the General Assembly for its ac-

> LIBERAL CONTRIBUTION. - We learn that the Raleigh and Gaston and the Raleigh and Augusta Air-Line Rail roads are contributing to the State Agri cultural Society the freights on the lumber over these roads, and as but little less than a million of feet of lumber will pass over these roads for the Fair Grounds, this contribution will amount to a handsome sum should these roads continue to be thus liberal. In addition to this, the Raleigh and Augusta road is now engaged in running a railroad track from its main track into the grounds. These contributions are most acceptable to the Society in its present condition, and exhibit a most commendable spirit of liberality on the part of the managers of these roads, while the immense amount of work to be done will be greatly furthered by such action.
