THE SENTINEL.

WM. E. PELL, PROPRIETOR.

THE EFFECT OF THE REACTION. It cannot be doubted that the unwise and extreme measures of the Radicals towards the South, as well as the very plain intima rion that similar measures would be forced upon the North, have produced, to a great extent, the mighty reaction in public wntiment now going on among the masses of the white people of the North. The explanations of the Republican press, and of their candidates for office last year, which they put upon the Howard a nendment, leading the Northern people to regard the amendment as a humane and wise measure. while its real character was kept from pub truth is now breaking forth upon the public mind, revealing the fact that the Howard amendment, if incorporated in the Constitution of the United States, in the hands of the Radicals contains every essential element necessary to force negro suffrage, negro equality and superiority upon the whole country, and at the same time furnishes the fulcrum for the entire absorption of all the powers of the States into the Congress, breaking down the essential protectives to | bus (Ga.) Enquirer has the following confreedom, held by the States and never sur rendered to the general government, and for the utter subversion of the Republic.

It has been perfectly astounding to us, that sane men, lovers of liberty and of the conservative powers of our Constitution, could have been so blind to the destructive and victors character of the amen iment, in Radical bunds as ever to have countenanced, for a moment, the voluntary acquiescence of the Southern people in so iniquitous a measure. For some time the same delusions were fistened upon the public mind in regard to the real purposes of the Reconstruction Acts | Halther verified of these laws been placed in the bands of purely military men, perhaps, even to the day, the trap set for the destruction of the Republic would not have been discovered The Reconstruction Acts simply contain the chimentary principle, of anyterial negtosuffrage, enforced upon the sound to the bayonet, and then must tollow the Products . box, the Howard amendment, out of which must come all the rest the destruction of all State authority, the cutif sales inhered the interests and domestic affairs of the tree ple of the States into the hands of Congresand then negro equality, civity, politically and socially

When it was suggested to then Sawles, some months ago, that be condition that in the Reconstruction Austhorary - was that negroes must risk in first class condualong with balics, that negroes should sit on juries to try white men, upon the simple condition that they had paid public tives. and that they were entitled to seats in Convention and to hold office, simply because said be, "all these will surely tollow, and I does it less to familiarize the Southern people, in advance, with these things, and , the Southern people will not with true plus losophy only when they determine to make the best of it."

What has been the effect of all this upon the colored people : In many cases, they have grown daily in arrogance and in-ulincreasing their demands upon the whiteinsolent, in their language and demeanor, to continuen and ladies, who had been their best triends, demanding office as a means of living, instead of labor, vaunting their claims to seats in the Convention, to water in Congress, in the Legislature, and to all important offices, and frequently accompanying these demands with incendiary threats. We rejoice to say that mone of our colored population have acted as if unaffected by these things, and hence, white the noise and vaunting have been shanned Do the whites three who have demeaned themselves well have been respected and kindly treated.

All these things in the South have helped to increase this reaction, and it will go on, we trust, until truth and justice and civil liberty shall be re-established upon this continent. But many Southern blacks are whome? discouraged and downcast at the relaction in the North. Paise and unfounded statements are made to them, and many have enterprising mediate, Madame Demorest's

WHEN WILL CONGRESS MEET (-On Thursday the 21st of November.

Gov. Oan has addressed a letter to President Jourson, asking him to revoke General Canby's recent order on the subject of Juries. He says:

"To show the ruinous results, however, that will follow from this order, if it is allowed to be executed, I beg leave to call in this State.

There are white majorities in but six districis. In two districts the numbers are about equal. In each of the remaining twenty-three districts of the State-there being altogether thirty one-the registration shows a colored majority. In Charleston the colored majority is 1,812, the registered whites being 3,286, and the blacks 5,008. Of the whites 118 were unable to sign their names of the colored, 2,866. In Charleston and Columbia a larger number of the latter class of persons can read and write, than in any other portion of the State; a very much larger number, because they have had facilities before and since emancipation of obtaining some education not enjoyed by their class in all the rural region of the State, to which I shall advert more particularly bereatter. In organizing a jury Charleston, therefore, assuming that all have paid their taxes, this proportion would give nearly eight colored jurors to four the extension of negro sufface to all the whites, and five of these eight would not be able to sign their names. In Beaut ort Georgetown, Colleton, Berkeley, and other districts, the showing is even worse. Partial returns from Beaulort indicate that there are 2,550 colored, and but sixty-five white voters registered. This proportion would furnish but one white man to every fourth or). Of the colored voters registered in the rural districts. I estimate that not more than five per cent of the whole number are dile to read and write, and very many of them have not intelligence enough to count one has ired in Georgetown district there are 418 whites and 3,418 colored voters registered. One white man might be drawn upon each jury. and in all probability not one of the remaining eieven colored men would be able to

resultand write To sum up, there will be in twenty three districts of this State a majority of colored juries for the trial of all classes of cases, ivil an I criminal, and only five per cent of their number will be able to read or write. Due any country which has estab lish of the right of trial by jury, fail, by its to secure a proper degree of intelligence among the jurors f. These rules, if applied to the State courts, will, I presume, be likewise applied to the Federal in I the proportion upon such Federal juries in Charleston, eight colored to four whites, in Columbia, nine colored to three whites, and in Greenville, eight white to four colored juters. These are the three points where the United States Court sits in South Carolina

Can these colored people discharge the

duties of outers either to the United States tare, to the litigants or to public With such instruments, war not effort to administer justice be a mock ery? Now, it the order had provided that no jees to shall be allowed to sit upon a jury who is unable to read or write, or it a report, qualification had been annexed, or in cases, civil or criminal, in which coland persons may be interested, a certain proportion of the jury should consist of their own color, it might not have been objected to seriously; but in its present bearings the order is to lead to results which must be universally deplored by those who desire to see even and exact justice meted of to all men. Nearly all of the litigation, certainly all of the important litigation, on the civil side of the court, is between white citizens, and involves intricate issues of law nd fact, as well as sums great and small. What projection can the white, or even the lored man himself, have, if his case is to be decided by a jury made up of persons possessing so little intelligence that they are imable to read, write, or cipher? With what satisfaction would a Northern claimant regard an adverse decision made by a jury, a major to of whom were colored, when the same case, measured by intelligence and submitted to the judgment of men of experionce and education, would, perhaps, pave been decided in his favor suppose that he is a patentee whose rights have been niringed, and whose interests-involved to the amount of half a million of dellarsare dependent upon the keen discrimination or an intelligent jury called upon to deter-mine some material difference between machanging or processes of magnifacture; is it not preposterous to suppose that a colored july, constituted as I have dos ribed, possess the equisite qualifications to render a just and intelligent verdict? Yet this is but one of the many classes of cases, which the Northern as well as the Southern man will be compelled to submit to the judgment of the ignorant and unwise parors created by
