## THE SENTINEL.

VERY SLIGHT TENURE.

The Newbern Times says, "one of the The Sewhern The Republican party has simple and childlike in character, all adout as the people, is its reputation for justice and homer " It that be its "greatest claim." its tenure i-n't worth a f urp-nee ha'psenny. Lock at its exhibition of justice and honor m Nor h Carollea.

Through the influence of Holden and other leaders of the party, the political disabilities were removed from these who gave in their a therence to the Radicala, though meter a therefore to some of the most noisy. Mix of this injured woman, among them were a sine of the most noisy. Stong it may be, by an irresponsible feel. sycssicmets and bloody rehels of the States. while the same influence was ex rived against the temoval of the destablities of others, is cause they were not of their party, though original and consistent Union men.

vided out, the winte leaders get all the Lit ones, while their colored brethren, who did real affair; the Reniteritary switchie, the sale of N. C. Radroad bonds; the bribery and comprisin practical on the Legislature, resent radional process days, as complained medialections, (which we expect to venilate more fully in a few days of the extravagant expenditure of the people's money generally, -all those things, and a thousand Sthers that might be named, are sufficient commentation on the "Hebrity" feature of the hold which "the party" has on the pen-

But there is no necessity for us to pursue thresultout; the Times is making a very satisfactory expose of the honor of some of the officials of its party. It has already made satisfactory progress that way, and says, "the truthe is not through yet." We shall await further developments from the Times.

## ----THE RAILROAD RING.

When the other day we made hasty re fennce to the proposed branch Road of the Western North Carolina Railroad, leading trom Calawlia Station to the lime beds in Catawba county, we were not aware of the importance of the suggestion we then made. It turns out to be a matter of some moment, and for an intelligent account of it, er our readers to the communication "Burke," Let the people read it and sevhow their money is appropriated and lavishly squamlered with a view to private ends. We are and have always been the advocates of a liberal system of Railroads, and especially the advocate of the Western North Carolina Raifroad, but this "lime bed branch" caps the climax of Railroad enterprise by the State. It is a criminal mackery of public enterprise, and we are sare the Western people are not aware of it, nor do they approve it.

We are astomished at the absurdity of the project, and we are not less so at the extr. ordinary and unheard of action of the Board of Directors, in letting the proposed road to contract. No notice of the letting is given; the contract is let to a favorite of interested parties at the Engineer's estimates, and against the protest of the Directors elected by the private Stockho'ders-all the Stockholders appointed by Gov. Holden voting for the letting. No won ler the Governor and his friends desire to exclude ex Governor Vance and Judge Merrimon and Dr. McDowell from the Board of Directors! No wonder the Standard shouts at the triumph of the Governor and the "Rail road Ring." Can't any one, with half an eye, see the workings of the "Radical Railroad Ring" as it is aptly called! Hurrali for the Governor! Harrah for public boncaty! Harrah for the Standard !

Will not some public spirited citizen put a stop to this beautiful little scheme of the "Ring" by appropriate application to the Courte? We trust so. And we trust the immediate true triends of the great project of the Western North Carolina Railroad will frown down such effects to squander and misapply money that ought to be used to tunnel the great mountains over and though which the road must pass before it reaches the Valley of the Mississippi.

----WELL NAMED,-The announcement by telegraph that the President is again off for Saratoga, reminds us of a remark of the Standard a few days ago, in characterizing the President and his Cabinet as "the peripatetic administration." We had not heard of , any of them going down to Alahama, but from the term "Tallapoma ing" used by the Standard, we suppose some of them have wandered off to

that inland town of the South A Pittsburg inventor has constructed a furnace in which a pan of water has been so arranged that water is decomposed and the oxygen ejected into the fire, rendering combusion complete, and saving fifty per cept, of the tund. It is antimated, however, that a similar arrangement was invested in Europe a few years ago, but failed to save fuel, because it required as much heat to decompose the water as was gained by the

WINE-MARING IN FRANCE - To the Editures the N. F. Tribune: -Your California correspondent, writing of wine-making in France, sufers to the practice the naked wo men have of going into the wine vats up to their waists, to stir the find, and thus facittate the process of fermentation ! I have often heard of such a practice, but was an unbeliever until a late visit which I made to the vineyards on the Rinne, and in Champaign, France, where I found the custom was universal, and, on reletting to authorities, I found the statement fully confirmed Writers disagree as to the object of this practice, some claiming that the natural warmth of the tody hastens fermentation and others asserting that the stirring about and mixing up of the pomic in this way, gives the wine a "fuller budy," a deeper

olor, or a superior boquet.

As it is now estimated that, we have aldy planted in the United States 2,000,000 neres of vineyard, or an area stunal to twofifths of that devoted to vince in France, it is to be hoped that the French mode of making wine will not be introduced into this country-at least until Yankee inge of puity has been exhausted in finding a sub-

FOURSE PERSONS - The first Araboun horse of celebrity was bought by James the First of a merchant for £500. It did not succeed as a tacer, and the oreed, for a time, into disrepute in Great Britain. Charles the First's reign, a lighter and switter horse began to be bred. Oliver switter horse began to homwell a true country wentleman at eart, and very tond of racing, hunting, and all active sports, kept a racing stud. The manager of this establishment, Mr who ar descendants were valuable in imof the Second, an excellent rider, had several valuable mares sent him from Tanders. The barb mure was given by the Emperor of Mor coo to Lord Arlington, secretary to Charles the Second. The Turk was brought into England by the Duke of It was part of the Duke's spoil at the siere d Buda. The S latty Turk was toe property of Mr. Marshall the s ud groom of William, Queen Anne and George I. After Queen Anne's time many valuable castern stallions and mares were imported, our were added to Lord Northumberland's arrived in New York the same year. The Cullen Arabian was a somewhat early importation. Racers now cannot do what heir predecess its did. They have neither the speed per the staying power. That patriarch of the turl, Sir. Char es Dunbury, med won the first Derby stakes at Epsom in 1780, introduced the running horses at two years old, before their full strength had ripened. Lighter weights at once became necessary, and the horses, prematurely enervated, left offspring interior to themselves in speed and endurance. ---

LACE MAKERS.-The lace makers in France, it is estimated, are women and girls, and number about 200,000. Their ages are on the average twenty-four cents per day; some who are particularly skilltul and industrious carn sixty seven cents for ten hours' hard work. Luce nakers are mostly peasant women, who work in their own houses. The raw materials used in the manufacture of tace in France are spun specially for it. The price of the raw material amounts to from six to wenty per cent of the value of the production. Pitlow lace is made on a sort of frame, light and simple in construction, and is held on the knees of the lace maker. Lace generally takes the name of the town in which it is produced. The annual production of lace in France is valued at \$19,-Great Brillau. Brazil, Romia, India and other countries.

White vitriol-Give the patient plenty of

BISCOVERY OF TREASURE. Recently two youths were sugaged in garching for muscula in the falls of the Shrinanioah, just below Berry's Ferry, Clarky County. One of the boys feeling a hard and sirek substance, brought it to the surface, when he found it to be, as he supposed, a tin bex, some six inches long, four teches broad and two inches deep. Its weight excited their corrosity, and observ-ing a clasp to it, they made for the shore, and upon opening the box found within one elegant god water and twenty six rings, nineteen of their solid gold, and seven dia-ment. They took their treasure and sub-mitted it to component interests. mitted it to competent judges, who put the value of the diam of lines at \$125 to \$150 spiece, and the gold rings, which are very heavy, at \$10 wath. The watch is valued at \$200, and all were in a perfectly dry state of preservation. The boys made a second soutch about the shoals, and this time succorded in finding a heavy silver table spoon. The box containing the valuables, upon ex amination, proyed to be a beautifully chased and engraved allver one, and its value cannot be less than \$50. Our triend Mr. M. Harris, examined the box and one or more of the gold rings, and informs us there is no mistake about their purity and value, He did not see the diamond rings, but was assured by Mr. Sherer, Mr. T. S. Smith, and other citizens of Millwood, who had examined them, that they were of great, bril-

and variou.

The supposition is that the box was lost
y some of Blenker's Dutch during the war, was found only a tew hundred yards below where some eighty three of Blenker's dression were drowned, while attempting to of the Suchandosh at Berry's P. calls, during the high waters of 1863. The bux, rings, watch, &c., were doubtless stolen property, as the thicking propensities of Bleaker's men were manifested wherever the command was ordered. If this supposition in regard to this matter is incorrect, what hypothesis can be offered in regard to the matter? =

(If the fact of its finding, we entertain no doubt, as Mr. Harris and the other gentlemen quoted are perfectly reliable. - Winchester ismes.

A LOST NATION.

A writer to the Natal Mercury, under date of February 2, 1869, says, when treating of the rains of Simbaoc

A day's march from Andows, between two hills at the end of a vast and fertile valley, are the ruins of Axum. To this day incredible flights of stone steps conduct the traveler up to the summits of the bills, in one of which are bound deep grottoes and vast hills, cut out of the rock and ornamented with columns. There, according to the traditions of the country, is the tomb of the Queen of Saba. The adjoining valley, shaded by majestic trees, is filled by the remains of the city, consisting of buge blocks of some. Very little of the debris reveal their former purpose. There may, however, be distinguished two groups of louricen or fifteen obelisks, thrown down. Seven of them are discovered with ornaments, and are not less than thirty six feet in length. These emisterpieces or ancient architecture reveal to us the fact of an accient civilization in the heart of Africa, which has disappeared again thousands of years since. Niebuhr telis us of a telebty Abysinman empire existing here, mentioning in particular Saba, and says it was so powerful that even the Roman and Parthian strength could not prevail against it. This list statement was taken from a engraved in stone. On the reverse side is another engraving in some ancient language, which has not yet been deciphered. The savage tribes guard these ruins with aloas care. No aving animaje is allowed to be killed in them, no tree permitted to be destroyed, every thing connected, with them being held sacred, as belonging either to a good or evil power. - A-massoc ary who penet a ed within a short distance the ruins writes : "In this emuntry were . also found some very old gans, in a hole in the mountain. We got one of these guns, and found it to have a wheel outside, cogs or teeth, and a tradition exists that y came from these ruins. often tell us, when asked it they knowledge God, about the big stones in the Banyai, where all created things are to be seen, even sphynxes, pyramical shaped buildings, and catacombs

Hon, JEFFERSON DAVIS'S TOUR IN SOUT-LAND.-The Loudon Standard of the 15 h of August chronicles the movements of Hon, Jefferson Davis thus :

gow and its vicinity just now, himself and party baving established themselves in that city, and made several excursions in the neighborhood. On Wednesday, sa route to Glasgow, they passed through Dusternline, and visited the Abbey church and runs.--Mr. Davis then paid a visit to Stirling, and left for Callande, in the evening. The news soon spread that the ex President was in the town, and as he left per train in the evening three hearty on ers were given by the large concourse of people congregated on the platform. Mr. Davis aturwards visited Dollar. At Grasgow he visited the Excumps, where, in expectation of a rigit, seminage opened a passage in the centre of the hall, up to which Mr. Davis walked, and at the end of the room, entered his name in the visitors back. On leaving the building Mr. Davis was landly cheered. The shipbuilding yard of the Menars. Napier & Govan was also visited, after which the party returned to the residence of Mr. Smith, Benvue, Downshill, On Thursday, Mr. Davis, with Dr. Charles Macay, left Giasgow for Oban, Mr. Smith and a number of friends accompanied him some distance down the Clyde. On leaving the Broomielaw quay, where there was a large concourse of persons, Mr. Davis was followed by loud cheers, which he acknowledged by raising his hat and bowing re-peatedly. A similar demonstration was corded him at Greenock, Dancon, Inncilan, Rothesay and Tighnabruaich, the crowds who were a nembed at the different piers exhibiting an eager desire to have a sight of the famous ex-President of the

RECURRECTION PLANT,-Rev. Dr. J. B. Boyce, of Greenville, S. S., recently brought from New York a specimen of this wonder. ful plant, a native of California. It may be taken out of water, and become shriveiled and dry as tinder, and kept so any longth figuration may be produced over and over
