SEMI-WEEKLY, \$50 PER YEAR.
WEEKLY, \$30 PER YEAR.

THE SENTINEL.

PUBLIC PRINTING.

We give in the joint statement made by the book keeper and the seaman who measured the printing, which shows we had no personal knowledge of the matter out of which such capital will fain make capital. The public printing since the Legislature has been in session has been done at the expense of the *Sentinel* office. We are in debt to some thirty journeymen printers who to whom our ability to pay. We have borrowed two thousand dollars of bank and friends to pay for setting type since the Legislatiure has been in session. Our book keeper reports over fifteen thousand dollars due the *Sentinel* office, not counting four thousand due from the State for work done since last September. If there out of fifteen of those indebted to the *Sentinel*, will promptly remit the amount due, we shall discharge our obligations to printers and friends. And whether they do or not, it will in no wise interfere with the issuing of the *Advertiser*. The weekly receipts are ample sufficient to run the paper unencumbered by State printing.

Early in the session when it was proposed to put the printing to the lowest bidder, we without compensation our type and fixtures to the journeymen of the office to enable them to bid the lowest price for the work. A contract was entered into between Mr. David C. Dudley, the oldest journeyman printer in the State and the Committee on printing, to do the work for fifty cents per thousand, just what we pay the printers for setting type. The printer Union did a little and remonstrated against Mr. Dudley's taking the contract. At that instance he aban-

doned it.

We are not candidates for State printer and would not take it for all the special tax bonds out. We will not put ourselves in the way of our friends, in having the work done at the lowest possible rates.

We will furnish the Editor of the *Advertiser* of Temperance of some persons connected with the office sit, our material to enable them to give the job to the journeymen now in our office, who are yet unpaid for what they have done. With that aid they can under bid Billy Smith or the Pennsylvania Central. The *Advertiser* does not look to public patronage for its support. It is better sustained by the people than any other paper in the State. And we may add higher than any paper in the State ever was before. We regret to have been forced to this public statement of private affairs. All we ask is for three fifths of the amount due us. We will then be able to pay the printers, and enter the campaign against carpet-baggers and their allies.

NEW SENATOR.

General Mat. Robison, on Friday night after four ballottings in caucus, was unanimously nominated to the United States Senate, to fill the vacancy made by the expiration of the term of service of J. C. Abbott, of New Hampshire.

Gen. Robison needs no introduction from us to the people of North Carolina. We would say for the information of those out of the State, that he was born in Warren County October, 1820, graduated at the University of North Carolina with the highest distinction and took his professorship of law, which he practiced with great success. In 1832 he was elected Attorney General of the State, which position he resigned in 1835. He was a member of the North Carolina Legislature in 1838 and 1840. In February, 1841, he was sent with Gov. Swain and John L. Bridges, on a peace commission to the Montgomery Congress, while Judge Ruffin, Hon. George Davis, Gov. Moorehead, Gov. Read and Hon. D. M. Barringer were sent to Washington City on a like mission.

When hostilities began, Gen. Robison lost no time volunteering. His rank and promotion in the army was as rapid as that of Claude Melville of the 1st N. C. Infantry, then Colonel of the 30th, then Brigadier General, and then a Major General. As to his mind, that will soon show itself when he takes his seat in the Senate. In person he is tall and commanding, neat in his dress and elegant in his manners.

North Carolina may well be proud of her Senator.

Mr. Moore's CARD.—The editor was sick in bed all Friday and did not see Mr. Moore's Card until it was in print.

The contract made by Mr. Moore calls for measurement by the letter *em*. We are told by printers who know that the letter *em* was the mode of measurement used by Lemay, Holden and others.

Mr. Moore and all connected with the office will make a hedgehog in saying we know nothing of the contract or the mode or manner of measuring the work until September last, when the Auditor refused to audit the printer's accounts.

We gave no order or direction about the accounts.

The year 1871, just gone with a year of many calamities, and 1872 will be one of many elections, especially in old Terra- bri.

In the last twelve months, in Cincinnati, 405,309 barrels of lager beer were manufactured, requiring 1,226,657 barrels of barley. An analysis shows six per cent. of hops. The *Advertiser* says "The residents and sojourners in this city drink during the year 8,274,254 gallons, at the cost of over \$1,000,000."
