A distinguishing mark of our time is political subscriptney - a bowing down of manhand of the times before the al turn of pelf and place. Whilst it is doubtless true; se Juvenal says, that mo man ever arrived suddenly at the summit of vive, it is from sailly true that the career of many of our people has had an unerand though gradual tendency to political production and all its concomitants of quaters for the land the victims of poareal subserviency have been of all coses and conditions, and the wearer of crimine has been as easy a victim of vice at the fifthy creatures that evil times have powned in their muddy waters. Whilst be ignorant, brutish boors have surren-
