## THE SENTINEL.

WM. E. PELL, PROPRIETOR.

### THE CALIFORNIA ELECTION.

The democratic victory in California is a proof against the utter supremacy policy of the radicals; the proof of a practical, energetic and never over-enthusiastic community against the wild theories and extravagant purposes that, by keeping the country in the hands of a few, are the cause of the present state of affairs. We may acknowledge in the broadest terms that there were cases within the republicanism organization in the Pacific States that weakened it. Republican voters in California, as in Connecticut some time ago, were disgusted with the conduct of their leaders and remained away from the polls. Thus the vote was reduced, and this reduced vote was divided on different candidates. But these causes only gave a greater field to the rising wave, for the democrats would probably have secured a substantial victory without them. There is, however, just enough in this view of the result—in this argument of the reduction and division of the republican vote—to serve for the use of radical leaders with the masses in the Atlantic and Mississippi Valley States. It will serve them to explain away the event—to prevent their voters from rightly understanding a lesson that would impair the power of the radical party. But the lesson is all the same for the country at large, for that large part of the people that is not to be deluded by the declamation of political spouters. It is the distinct declaration of the apprehension of the people of the Pacific slope, that the tendencies of the dominant party are dangerous, and their purpose that it shall no longer be trusted with the destinies of the country. California has a population of vigorous, bold, thinking people. Her citizens bear the same relation to the Atlantic States that the people of those States at one time bore to Europe, and are made up of the adventurous, clear-sighted, intelligent men of all our Atlantic communities, who sought in the new State an ample field for an enterprising spirit that they could find at home. Such a population is seldom conservative, and when it utters its political protest against party extravagance we may be sure that the whole nation is alive to the danger.—N. Y. Herald.

### HOW THE RADICALS ARE TREATING GENERAL GRANT.

General Grant has probably found out by this time that his friend Congressman Washburne's advice to him to commit himself to the radicals, has not worked very well. Here is Wendell Phillips's manifesto in the last Anti-Slavery Standardist.

Grant, at last, has spoken and—blundered. How he blundered in the Secretaryship, his friends would be the first to tell you. He has not only blundered, but he has blundered in a way that has done the most mischief. What mischief has he committed? None. The only power he claimed against the President, a moment's thought would show him to renounce. That is our "pragmatic" statesman, whose first move is a blunder. This was our St. Michael, whose relation to the President was to move down the States of the fallen host. Instead of that we find that he does not even know how to draw!

The great popular leader sinks to be only the President's Secretary, issuing orders he abhors; sits like an "ancient Pagan" on his throne, and grumbling! Was not boasting his lack of power to the Secretaryship, his relation to the President was to move down the States of the fallen host. Instead of that we find that he does not even know how to draw!

Here is what Tilton says in the Independent.

General Grant has surrendered to the President. This fact was unexpected. It took the country by surprise. It is still the theme of universal talk.

But it is neither to be denied, nor concealed, nor explained away, that General Grant has, within the last few weeks, greatly disappointed the American people. He has, within the period of his administration, made a record in the public press and in private circles, that is only former time since he became a famous man. Moreover (which we do not like to make the "sounding" of these certainties has been just. There is a natural desire among men to have one's heroes perfect—without blemish or flaw; and, when they are not in reality, we strive to patch things to our imagination. But even General Grant is now proven to be not a hero in all points.

Gracely, in the Tribune, keeps up the same kind of sneering criticism, and throughout the country the Radical pack are at General Grant's heels.

## PETERSBURG ADVERTISEMENTS NOTICE!

I HAVE THIS DAY OPENED A VERY NEAT ASSORTMENT OF

## FALL GOODS,

Especially suited to immediate wants, to an inspection of which you are respectfully invited. They embrace

## A FULL ASSORTMENT

OF
