WAKE FOREST COLLEGE COM interesting facts upon his breeding formally for the discounties of many land. Resourced Society of Many land, recon time honored custom required to be proven-ted on this day, and, therefore, at 17 A.M., the College bill called visitors and students Olds, "The influence of Litterte on Lab-guage and Music," though novel, seemed to us to be eminently appropriate to the ob-casion. We confess there was some differences of opinion in regard to the merits of the address, but in 'the estimation of most of the mess of letters greath, it was pronounced not only remarkable, but admirable. What were may be said of the theory of the oracle tor, of which the public will have an opportunity of judging alone, we tearn, it is to published, it was certainly learned, logical and lengthy, occupying about two hours in its delivery; and yet such was the interest of this disquisition upon a parely about the black and green has fish, aslmen, perch, &c. into the waters of the Potomac tiver from the Ohio, It was also mentioned that Mr. William M. Siriver undertook the experiment, in 1854, of introducing these experiment in 1854, of introducing these experiment, in 1854, of introducing these experiment, in 1854, of introducing these experiment in 1854, of introducing these experiment in 1854, of introducing these experiment. McDowell, D. D., President of Murirose, bore Female Institute, addressed the Alumni Association, on the "Training of Children." Dr. McDowell is a gentleman of excellent common sense, and a teacher of many years experience, as well as the very highest require, and, therefore, we were not emprised that an address embodying such matured and valuable thoughts use important a subject was asked for publication by the Alsociation before whom it was defined in the alternation of the country, and in department of the country, and in the large the breeding of lab in all parts of the behaver, a bill now the country of the literation of the country. There is, however, a bill now by the Association before whom it was de islatures of the States will give attention to the matter. There is, however, a bill now hefore Congress making a small appropriation in aid of the experiment, for the artificial propagation of shad in the Potomac, speech to be published, on the ground that by the Association before whom it was de-

board of Commissioners. His experiments in shad culture are said to show.

First. The ages need river water to haden io. He first tried his experiment in a brock, where the water was thirteen degrees to cold, and failed. Second In the five, where the temperature was about 70 degrees, the eggs hatched in sixty hours. Eagga have been hatched in a bottle, in a surger temperature, in firsty sight hours. Third, By tilting his boxes, so as to cappes oul; the wire gauss bottom to the carrent, he hatched almost every egg, only even failing to batch in one lot of less thousand. Fourth, with the utmost care he could hatch on the fiatural river had only a wo per cent of the eggs, a last most significant of the commissions in the natural method.

The fectuality of the fish under the process employed by Mr. Green is almost incred.

cess employed by Mr. Green is almost increable. He has recently come to Washington cess employed by Mr. Green is almost incredible. He has recently come to Washington with a view of conducting a series of hatching operations in the waters of the Tallomac. The attention of prominent gentlemen of the Dustice and of members of Congress has been, called to the carifolities of his method and experiments, and the Boult is that a resolution has been introduced making as supropriation to 12.500 to defay the necessary experiment of the experiments in the every of the Laited States. This subject is becoming of practical importance. This forms a considerable part of the field of munking as the Laited States. This subject is becoming of practical importance.
