NEW METHOD OF WASHING CLOTHES  
WITHOUT LABOR.

THE AUTOMATIC  
CLOTHES WASHER AND BOILER.

THIS BOILER IS MOST EFFECTUAL, reliable and universal - recommended. It can be used on any Stove or Range, in any boiler, and the low price of the article places it within the reach of every family.

This Boiler operates upon purely philosophical principles, is self-acting, and dispenses with labor and the wear of the clothes.

The hot water, steam, by the action of heat, is driven up through the pipes, and forced upon the cloth, and forced through the fabric with astonishing rapidity, cleansing all articles, from the finest lace to the bed-blinds. For Flannel it is invaluable, as it does not pull them as in the old process of rubbing.

The time required for cleaning a boiler full of clothes is twenty to thirty minutes, and nearly three hundred gallons of boiling water are forced through the fabric thoroughly loosening and extracting the dirt, without loss of friction.

A thorough washing of the clothes.

Washing day will no longer be a terror and dread to housewives. The cost of the Boiler will soon be returned in the SAVING OF TIME AND LABOR, and the great saving in the wear of clothes.

The great value of this invention appears so clear, and appeals so directly to common sense, that we have deemed it unnecessary to accompany its introduction with numerous letters of approval.

No letter has met with such ready sale and general satisfaction. Call at UPHURCH & BROTHERS, and see its wonderful operations. We have the exclusive right to sell and manufacture in the State.

All orders must be addressed to
