JOSIAH TURNER, Jr., EDITOR.

RADICALISM RUNNING INTO MON.

ABOHY. who began their career as Republica, and ended it with Imperialism, We know of the past nine or ten years, we are inclined to question the "superior civilization," the wider diffused intelligence, and the wisdom that comes from experience. Certain grim facts all the while stare us in the face, and stagger us. Greece bad her Thirty Tyrants, under whose sway free government was impossible. We have, in our Radical was impossible. We have, in our Estical Directory at Washington—by courtesy called a Congress—five times thirty tyrants, whose outrages upon liberty are quite as atrocious; and if Rome, in her decline and fall had Heliogabolus, have we not had Liocoln and Grant? History thus keeps on repeating itself. We are no better than anylody, else. We are awayed by pretty much the same passions and the same ambitions that governed our poor human na-ture thousands of years since,

"There was a Brutus once that would have brook'd The eternal devil to keep his state in Rome,

But in due time, nevertheless, the "king" The so called Republican party is in every marinet imperial. From the first hour of its a cension to power, it has aimed at noth-ing so much as the exercise of arbitrary authority. The demagogues whom it has invested with the power of the purse and the sword, have trampled upon the fiberties of the people with a recklesaness which has more than once, brought the beads of European monarchs to the block. In private and social life its tendencies and tastes are are all in the same direction. Its founders for wealth, wring from honest industry, its estentations display of that wealth, its pampered and luxurious testes, have forced the plain, republican habits of former and better days quite out of fashion. Itselfenators no longer travel as private citizens.

They go abroad like petty princes, attended by servants to livery, and aping all the airs of Old World aristocracies not me to what a calamitous and these ominot see to what a calamitous end these oning nous be gioning must assuredly lead. With this bestard Republican party in power, in point of fact, we have Imperialism already—the hideous thing in substance, with only the name wanting. The old forms of government, to a certain extent, remain, but the spirit and the essence are goine. Not too lar gone, however, for recovery, if the people will but open their eyes to the perils which confront them, and resolve to bring back the government to its ancient moorings. This can only be done by restoring back the government to its ancient moorings. This can only be done by restoring
the Constitution, ejecting the imperialists
from power, and replacing the administration of the Government in the hands of the
good old Democratic party, under which
public liberty was always asir, and under
which the country was peacful and pospercus at home, with its flaghonored and
respected by every nation and every government on the face of the earth.

It happened that about three weeks ago
a prize suggrested to Sam maybe he was
pictored." And advised bim to seed and
consult an old negro doctor named Wesver
who lives this side of Morris' Depot on the
road to Raleigh. Sam sent to him on Sanday. The messenger described his case and
the old doctor sent word to him "that he
had been pixened by a negro mas and waman that grudged him his place and wanted
to get it; but that if he would take the
medicine he reat him it would core him in

THE TEN DOLLAR COUNTERPRIT GREEN
RACKS.—The Treasurer of the United States hately received a letter from the Cashier of a bank in Indianapolis, exclosing a good ten dollar note of the issue under act of March 8, 1863, put out in lieu of the convertible note, asking that the note be tenturned with a statement of the difference between it and the new counterfeit. It was stated that the same issues of greenbacks vary in small particulars, and an answer to this letter would not a tile the question. When a plate gets worn a new one is used, and no two are exactly alike. As but one no'e has actually been pronounced counterfeit, though three others evidently are, applications for specimens of the counterful are useless. A large number of such supplications have already been received. The Treasurer is countered that this ten dollar note is the most dangerous consterfeit yet discovered.

Notice has been posted at hisper in work.

Notice has been posted at hisper in work. THE TEN DOLLAR COUNTERPRIT GREEN

House has been posted at himple in veter core to the musting steamers "United Kingdom" and "Cheduba," calling upon the underwriters to settle their liabilities of trespective ability being as a salar file that they both must have foundared with all on board. The Linked Kingdom" as one of the line of packets trailing belyens new york and Ginagow. So let the firmer port on April 19th, and was never seen attacked. The "Choduba" belonged to a Britch Biombay for May, and is supposed to have encountered a heavy epithone two days a terwards and must have been unguiphed in it, for nothing was based or seen of her. The notice are contained two other mirring ships. The number of people lost in the tone ship is easily 400.

The sext in the United State's Scate and mass there are the sext of the will help ships. The number of people lost in the tone ship is easily 400.

The sext in the United State's Scate and must have been dependent of the tone ship is easily 400.

The sext in the United State's Scate and mass sheeted a constitution of the soul that we are the long them to the form and it will help to make him sure of being numorial. It is not to be seen and the sext of the soul that we have the length of the soul that we

THE WHITE PINE OAVE.

THRASURE HILL.

The largest, or rather the longest, despest, and most brilliant, cavern yet struck in The Imperialist hossingly proclaims "it still lives." It tells us that its circulation is rapidly on the increase, and that many who alood aghast at its sontinents, when they were first prominigated, are now among their most boarty endorsers. This is not at all thinkely. Bitter experience has admonished us how soon men's minds become familiarized with ideas which at the outet they abhorred, and how swift and easy becomes the transition from virtue to vice, so to speak, when the passions get the better of the reasoning faculties. Before the recent war for the Union," we all know how men who are now rempant Consolidationists would have rolled up their eyes in hely horror at the bars thought of military dictar or the union of the popular will by force in States deemed to be soverign. Yet how calmly, nay, how approvingly, they contemplate it now—now, that it coincides with their notions of partian thrift and political expediency. It would not do, it erefore, to assume, as some do, that the American procedes a first than the first that the approximation of the popular with the American procedes are the supplied to the continuous of the supplied to the continuous of the southwest at an angle of 50 dages, of the subidiance of the continuous the call of the Consolidated Chloride Priat campany, day before yesterday. The fact is about four feet wide, there feet high, dips to the south at an angle of 40 is exact is about four feet wide, there feet high, dips to the south its count at an angle of 40 is exact. At this point the caver is chekened to the point is unknown, but it will be come that all alabaster. To what depth it descends the open within a few days and explored throughly. The face of the over heast around the entrance to this cave is similar in appearance to other portions of the mine in the same vicinity—over extending the point is unknown, but it will be continued to the continuent of Treasure till was opened by the worth ove breast, forty foot level, acubesas of the Belmont shalt of the Consolidated Chloride in crystais, forming fan like aggregations, would not do, therefore, to assume, as some do, that the American people can never be persuaded to follow the example of the Is rachites of old, and "sak for a king." We are no better than the Orecks and Romans, who have the same the constant of the same than the oreas that the oreas the same to carrie on the surface. Here the compact opaque alabaster gives way on all phate to carbonate of lime; massing rapidly phate to cartionate of lime; passing rapidly from the milk white selenize to the and ended it with imperialism. We know it is a common thing to beast of our superior civilization, of our wider diffused in telligence, and of the wadom we have learned from the blunders of peoples and nations that have gone before us—but it is only a beast. Looking back at the events below—the root, proper maintaining its beight from the floor with great results its proof, and reappear in the main cavern for below—the root, proper maintaining its beight from the floor with great results its proof, and reappear in the main cavern for the floor with great results its proof, and reappear in the main cavern for the floor with great results its proof and the milk white selentite to the golden from the floor that the proof of th below-the roof proper maintaining its beight from the floor with great regularity, Some of those arched cavities would per mit the passage of a man 10 or 12 feet to the top of the arch and down to the main op ning again, 30 feet from the star ing point, while others are so short one could hardly hold a candle at arm's length und see the light of it through the arch. Much of the compact alabaster, where broken, is dend r tic and beantful as a moss sgute. cavers is nearly uniform in size down to the depth of 100 feet, but in places where the floor is covered with debris one is com-pelled to craw! through like a make. The air is pure, and condles burn freely to the greatest depth explored. Stopping for a moment near the bottom to gaze on the wondrous beauty around us, a ticking like that of a death watch attracted our attention, and we inquired of Sam Ferguson the cause. He said it was the striking of drills, 30 or 40 of which were busy within 140 sect of us, and informed us that they can be heard 200 feet through solid limestone. came along, and was not only 'brooked' Ladies cannot go down this wondrous su'-but wikingly obeyed. We are feeling the terranean passage, we are sorry to say, to way to a like enslavement—different in kind, it may be, but the same in automance.

WITCHCRAFT-A POISON DOCTOR

AND HIS PATIENT. The days of witchcraft are beginning to be revived among some negroes in this section. Sam Barram—a son of "old Dave," so well remembered by former students at Chapel Hill—is a boy that was raised in the service of Lemnel Lynch, Esq., of this town, and since the war has been living out at Mr. L'a plantation, Mr. L. places the utmost confidence in Sain and has ever found him an honest, sensible and reliable servant. Last Sept-mber Sam was taken sick. Had pains all over him-"some hard something a working all about him"-and a shorteers of breath together with a swell-ing of his person. This lasted through the winter and so r duced and wasted his sys-tem that early in the spring he was placed

medicine he seat him it would care him in

## LIFE INSURANCE COMPANY

JANUARY 18T., 1869.

Assets \$10,462,531,75. Amount of Income 6,227,071.

SURPLUS OVER LIABILITIES 2,675,999,48.

THE Ætna is the LEADING LIFE INSURANCE COMPANY in North

Largest amount of Losses to Widows and Orphans! The Largest Revenue to the States. And has by far the largest number when compared with 58 Companies reported officially by the Commissioners of New York and Massachusetts it will be seen that the Ætna ranks as one of the first Companies of the Continent. But two of the fifty-eight Companies permitted to do business in New York and Massa chusetts had so large an income for the year 1868; but two had so large a number of Policies in force, but one among all these incorporated under the laws of the State of New York had so small a per centage of Expense to Income during the year 1868.

Its expenses are lower than most Companies', and consequently its ability to make and pay liberal dividends to the insured is greater than that of most other Companies. It is one of the great Companies of the land in Income, in Assets, in Number of Policies, in Amount Insured, in Solidity and Strength, in Soundness, Cheapaces, Promptness, and Success. Persons contemplating this mode of investment in the future as in the past would do well to examine the claims of all and take a policy accordingly.
