THE SENTINEL.

JOSIAH TURNER, JR., EDITOR. THURSDAY, SEPTEMBER 16, 1909.

OUR EDUCATIONAL PROSPECTS.

We have heretofore said that there is no subject of greater concern to the people than the education of the children and youth of the State. This is a matter, indeed, of the very first importance, and the one that comes nearest to every parent who desires to give his child a good education.

OUR EDUCATIONAL PROSPECTS.

We have heretofore said that there is no subject of greater concern to the people than the education of the children and youth of the State. This is a matter, indeed, of the very first importance, and the one that comes nearest to every parent who desires to give his child a good education.

OUR EDUCATIONAL PROSPECTS.

We have heretofore said that there is no subject of greater concern to the people than the education of the children and youth of the State. This is a matter, indeed, of the very first importance, and the one that comes nearest to every parent who desires to give his child a good education.

S. Barnes & Co. These books are such as are used in New England, and embody such political and religious ideas as suit the taste and fancy of Mr. Ashley. Besides nearly all of them are of a low standard of merit, and they cost more money than books of continuously greater merit, published by other leading houses. For example, the great publishing house of D. Appleton & Co. offered Arithmetic of standard merit at such price as that, in buying a hundred thousand of them, the State would save twenty-five thousand dollars. There was not a word of this in other books, and in Geography much greater. Besides this, the State would be in possession of a new Arithmetic for each of its districts. Arithmetic that any child in the State might have, free of charge. Yet these books are rejected, and the books of A. S. Barnes & Co. are taken. The State, and hence the people, lose by this selection, tens of thousands of dollars. The books selected are objectionable because they are, in a measure, partisan in their character, the people of the State are unacquainted with them, and they cost much more than those other books which are better in point of educational merit.

OUR EDUCATIONAL PROSPECTS.

We shall revert to this subject again, because we believe the character of the books placed in the hands of our children is a matter of vital importance, outside of any money consideration.

OUR EDUCATIONAL PROSPECTS.

There is no money more freely paid, and none more judiciously expended, than that which is expended for the purpose of education. Each year who makes his plan in Wake County, earning and receiving a salary, or enjoying an income of \$1,500, will be sure to pay the State \$1,500, or more money to the State than the State pays to him. This is, one thousand dollars, more than he is worth to his county yearly, and a quarter million of dollars more than the same number of uneducated day laborers. It is surprising that money should be comparatively scarce in this State, where a considerable proportion of the people are uneducated. To what service of our country do we look for wealth? The State has a large and managed man. Why the great disparity in the thrift and enterprise of Wake and Johnston counties? Why the great disparity in the thrift and enterprise of Wake and Johnston counties? Why the great disparity in the thrift and enterprise of Wake and Johnston counties?

OUR EDUCATIONAL PROSPECTS.

We have heretofore said that there is no subject of greater concern to the people than the education of the children and youth of the State. This is a matter, indeed, of the very first importance, and the one that comes nearest to every parent who desires to give his child a good education.

For the Sentinel, THE "RING" ON THE WESTERN N. C. RAILROAD, AGAIN. If the managers of this Road think that we are done with them, they are much mistaken. J. J. Mott, the President, in his recent report to the Stockholders (which I have before me) says: "It is not the size of the debt which makes our bonds as low in the market. North Carolina can pay it, and she will. The continued marketing of the distressed demagogues against the authority of the State, and the management, good and bad, has much to do with it. Shareholders reports are circulated everywhere. They reach the ears of Wall Street, and so on."

OUR EDUCATIONAL PROSPECTS.

There is no money more freely paid, and none more judiciously expended, than that which is expended for the purpose of education. Each year who makes his plan in Wake County, earning and receiving a salary, or enjoying an income of \$1,500, will be sure to pay the State \$1,500, or more money to the State than the State pays to him. This is, one thousand dollars, more than he is worth to his county yearly, and a quarter million of dollars more than the same number of uneducated day laborers. It is surprising that money should be comparatively scarce in this State, where a considerable proportion of the people are uneducated. To what service of our country do we look for wealth? The State has a large and managed man. Why the great disparity in the thrift and enterprise of Wake and Johnston counties? Why the great disparity in the thrift and enterprise of Wake and Johnston counties? Why the great disparity in the thrift and enterprise of Wake and Johnston counties?

For the Sentinel, THE UNIVERSITY AND THE PUBLIC SCHOOLS. (No. 3.) Any slight laxness in the following statement will not be noticed by the average citizen. The University of North Carolina is a thoroughly educated man at \$1,500 per annum, and of the uneducated, or day laborer, at \$200. The value to the State, in dollars and cents, of the educated man exceeds that of the uneducated man by \$1,300 per annum. The education of one hundred men, in North Carolina, is to enable them to earn upon an average \$150,000, increases the annual monetary interest of the State \$125,000. Add to this the superior intelligence, and the moral power and worth of such a class of citizens, and we have some conception of the profit accruing to the State from the liberal education of its young men.

OUR EDUCATIONAL PROSPECTS.

There is no money more freely paid, and none more judiciously expended, than that which is expended for the purpose of education. Each year who makes his plan in Wake County, earning and receiving a salary, or enjoying an income of \$1,500, will be sure to pay the State \$1,500, or more money to the State than the State pays to him. For the Sentinel, DEATH OF J. H. JONES. The death of J. H. Jones, of Tennessee, took place in Raleigh, N. C., on the 14th inst. Mr. Jones was born at Nashville, February 25, 1837. Graduating at a Western College, he studied Law, and in 1857 he was elected to the State Senate. In 1858 he was elected to Congress as an Alabama candidate, but became an adherent of Calhoun, and, after several vain attempts of policy took ground as a Whig, and was elected Speaker of the House of Representatives in 1862. In 1861 he was appointed Secretary of War by President Lincoln, but resigned immediately after the latter's death, he being only one month in office. After a period of retirement he was elected United States Senator in 1871, and was re-elected in 1877. In 1880 he was nominated by a convention in Baltimore, as a fourth candidate for the Presidency, with Edward Everett as the vice-presidential candidate, carrying only three States—Virginia, Kentucky and Tennessee. The Bell-Everett ticket, as it was called, represented the Southern Unionists, and what was left of the old Whigs and Know-nothings of the North. It was a party of compromise—an effort on the part of well-meaning men to postpone the evil days of civil war. Its platform was "The Union, the Constitution, and the Enforcement of the Law."

OUR EDUCATIONAL PROSPECTS.

There is no money more freely paid, and none more judiciously expended, than that which is expended for the purpose of education. Each year who makes his plan in Wake County, earning and receiving a salary, or enjoying an income of \$1,500, will be sure to pay the State \$1,500, or more money to the State than the State pays to him. This is, one thousand dollars, more than he is worth to his county yearly, and a quarter million of dollars more than the same number of uneducated day laborers.
