JOSIAH TURNER, Jr., EDITOR.

STRENGTH OF EUROPEAN ARMIES.—In view of the dispatches from Europe, it is interesting to know what military force the nations concerned can put in the field. France has 414,632 soldiers on the peace footing, and 947,371 in the field, a total of nearly 1,100,000. Of these, 370,000 men are now ready to march on the tap of the drum

Austria has 278,470 men on the peace establishment, 888,700 of a war strength, or 390,000 fully prepared to move. Could the South German Confederation or group of States be secured on the same side, they have 66,540 men on the peace list, or 194,408 on the war footing, with 107,000 of these prepared for instant service. Such a coalition would give France the control of 777,000 fighting men at once, with a reserve of 1,596,108 trained soldiers.

On the other hand, Prussia has 796,000 men on the peace or 1,266,000 on the war footing, with 300,000 now ready for operations on her western frontier. North Germany, going with Prussia, has 315,536 on the peace, 551,993 on the field or 944,321 on the war footing, of which 546,000 are instantly available. This would place at Prussian disposal 846,000 men for the first moment, and 1,364,321 in reserve. Thus she would have, instantly, 69,000 men more, and hereafter 231,785 less than the French alliance. Should she be able to manage Southern Germany for her cause she would have 1,055,000 men, or 176,000 more than France, to move at once, or quite enough to cope with her and Austria together, for the time being, with all the advantages of a common language and position. This would leave Prussia still a reserve of 1,441,727 men, or only 151,379 less than that of France and Austria coalesced, a difference swamped to the extent of nearly 90,000 men by her superiority of immediate force.

Italy, out of a force of 876,731 on a war footing, with 197,000 of a reserve, or 573,721 in all, could spare possibly 200,000 men to operate on the French frontier or hold a hostile corps in check. The direct and open participation of Russia is hardly to be expected unless circumstances should force her into the melee. In that case she could dispose of about 250,000 men from about 700,000 composing her army in Europe, including the Cossacks. She could take no other course by family alliance, position, and the recollection of Crimean wounds than to aid Prussia. Sweden and Denmark would, if they dared to move at all, have to go in the same direction, with about 50,000 men. Thus Italy, the East and Scandinavia would bring King William 500,000 men—a force that, with South German aid, would place him 430,000 ahead of France, allowing England, Belgium, Holland and Switzerland to remain neutral.

There is a vast copper mine in England where shafts extend many hundred yards under the sea. The moaning of the waves as they dash against the rocks is forever sounding in those gloomy aisles. When the storm comes, the sound of the waters becomes terrific, and even the boldest miners cannot stay below, but leave their work and come out upon the earth. Overhead are seas of bright copper streaming through the gallery in all directions, traversed by a net work of thin, red veins of iron, and over all the salt water drips down from tiny crevices in the rock. Immense wealth of metals is contained in these roofs, but no miner dares give it another stroke with his pickaxe. Already there has been one day's work too much upon it, as a huge wedge of wood driven into the rocks bear witness. The wedge is all that keeps back the sea from bursting in upon them. Yet there are three tiers of galleries where men work by day, not knowing but at some fatal hour the flood may be upon them, rendering all escape as hopeless as it was in the days of Noah. The awe-stricken visitors hurry away from the scene with a heart appalled in view of the hourly dangers.

CABLE FROM FLORIDA TO CUBA.—Cyrus W. Field, the pioneer Atlantic cable layer, asks of Congress permission to lay a cable between the United States and Cuba. His petition was presented in the Senate sometime ago. To get rid of the existing International Ocean Telegraph Company, which has a monopoly of the privilege sought, Mr. Field offers, if Congress will repeal this grant, (as it reserved the power to do,) to buy the cables and lines of that company at cost, with ten per cent. interest added, less the dividends heretofore paid to the stockholders. He further offers to transmit messages for one-fourth of the charges now made by the International Company

Faber's speaking-machine is attracting attention in Germany. It pronounces each letter distinctly, and even laughs and sings. German philologists have heretofore declared it to be impossible to imitate the letter I (as pronounced in German) by artificial means, but this machine speaks the word Mississippi very plainly. During a performance at Berlin, a slip of paper, containing the words, "Long live King William of Prussia," was handed to Mr. Faber, and correctly pronounced by the machine, whereupon there was a great deal of applause.

The Washington *Star* says that "Shoo Fly" has got into the Senate. Recently, Mr. Hamlin in the course of his speech on the income tax question paused to interrogate Mr. Morrill in regard to what he construed to be a vigorous expression of dissent by that gentleman to his proposition that it was necessary to replace the income tax by a tax on sugar. Mr. Morrill intimated that it was a mistake, he had not dissented.—"But," said Mr. Hamlin, "you shook your head." Whereupon Mr. Morrill, explained that he had stuck his head to get a fly off, and the matter ended with a ripple of laughter among the grave and reverend seignors.

WATCH THE THIEVES.—The New York *Tribune*, apropos of the closing week of Congress, utters its annual warning cry of "Watch the Thieves!" It thinks that between this and next Friday, the day of adjournment, many millions may be slipped into the appropriations which will bear watching. It is the big jobs, however, the millions upon millions of land grabs, bond aids, etc., etc., that are the overwhelming evil. At the same time, however, let the appropriation items be watched.

"Well my boy, do you know what synthesis means" said a schoolmaster to a pupil. "Yes, sir," was the reply; "it is the duty on whisky."

WALTHAM

WATCHES.

THEIR EXTENSIVE USE OF THESE WATCHES for the last fifteen years by Railway Conductors, Engineers, and Expressmen, the most exacting of watch-wearers, has thoroughly demonstrated the strength, steadiness, durability and accuracy of the Waltham Watch. To satisfy that class in all these respects, is to decide the question as to the great value of these timekeepers.

More than 450,000 of these watches are now speaking for themselves in the pockets of the people—a proof and a guarantee of their superiority over all others.

The superior organization and great extent of the Company's Works at Waltham, enable them to produce watches at a price which renders competition futile, and those who buy any other watch, merely pay from 25 to 50 per cent. more for their watches than is necessary.

We are now selling Waltham Watches at less prices in greenbacks, than the gold prices before the war. There is no other manufacture of any kind in the United States of which this can be said.

These time-pieces combine every improvement that a long experience has proved of real practical use. Having had the refusal of nearly every invention in watchmaking originating in this country or in Europe, only those were finally adopted which secure lasting by the most skillful artizans in our works, and long use on the part of the public demonstrated to be essential to correct and enduring time-keeping.

Among the many improvements we would particularize:

The invention and use of a center-piece of peculiar construction, to prevent damage to the train by the breakage of main springs, is original with the American Watch Company, who, having tried the refusal of all other contrivances, adopted Pogg's Patent pinion as being the best and simplest.

Hardened and tempered hair springs, now universally admitted by watchmakers to be the best, are used in all grades of Waltham Watches.

All Waltham Watches have dust-proof caps, preventing the movement from dust and lessening the necessity of the frequent cleaning necessary in other watches.

Our new patent stem-winder, or keyless watch, is already a decided success and a great improvement on any stem-winding watch in the American market, and by far the cheapest watch of its quality now offered to the public. To those living in portions of the United States where watchmakers do not abound, neither with the above mention'd improvements which lend to insure accuracy, steadiness, durability and convenience, must prove invaluable.

Every watch guaranteed by the Company.

To prevent imposition, buyers should see that every watch should bear either of the following trade marks:

American Watch Co., Waltham, Mass.
Aspn. Watch Co., Waltham, Mass.
Waltham Watch Co., Waltham, Mass.
Home Watch Co., Boston, Mass.

For sale by jewelers generally throughout the United States and Canada. Descriptive circulars sent free on application.

ROBBINS & APPLETON,

Gen'l Agents.

182 Broadway, New York.

Ask to see the new PULS-PLATE WATCH bearing the trade mark "AMERICAN WATCH Co., Crescent st., Waltham, Mass." It is by far the best Pallplate Watch made in the United States, and surpasses anything heretofore made in this country for Railway Engineers, Conductors, &c.
