THE TIP TOP WASHER. (Patented Feb. 28, 1871.)

This machine combines simplicity and durability.

ACKNOWLEDGED TO BE THE BEST REGARDLESS OF COST.

PRICE \$12.

The most perfect Washing Machine yet invented is the TIP TOP MACHINE, which for utility and durability is never surpassed if equaled. The public have ever demanded a simple machine which will clean, under steady use, and in order. No invention has met with more favor or success in so short a time than the Tip Top Washer has. The reason is it is cheap and durable, not liable to get out of order. It is self-acting, easily operated and easily handled, mounted on rollers. It wears clothing much less than any other machine or process as it washes the clothing perfectly clean by a rapid succession of strokes or squirts, thereby saving them from the wear and tear ways sustained by the old process of washboard or rubbing. This machine requires no washing fluid or chemical operation. None the common soap used in making your clothing white or clean. This machine will not damage the most delicate fabric or tear off buttons, yet it will clean any piece of clothing from a best quality pocket handkerchief. It will pay for itself every year by the saving of clothing, not liable to get out of order. It is self-acting, easily operated and easily handled, mounted on rollers. It wears clothing much less than any other machine or process as it washes the clothing perfectly clean by a rapid succession of strokes or squirts, thereby saving them from the wear and tear ways sustained by the old process of washboard or rubbing.
