The "blonde young man from Phili desphia," who was so successful at Hal-eigh in engineering the bill to asthorize the construction of the New York, Nor-felk, Charleston and Tom-Scott Railway, is now at Columbia trying his persussiv powers on the Legislature of South Carolina. A BIG BAILROAD SCHEME.

One of the most ambitious projects that has ever been presented to the reconstructed Legislature of South Carolina was introduced in the House a day or was quietly handed to the clerk to be entered on the journal, and then sent to the railroad committee, the apparent object of this little smuggling device being to prevent any knowledge of the scheme by the newspaper correspondents until it was so far selvanced as not to be intered by publicity. It is entitled a buil to auorize the construction of the New York, Norfolk and Charleston Railway, and while it does not seek to incorporate the said company in this State, it proposes to confer upon the corporation, which is said to have been chartered in North Carolina, ome of the most remarkable rights and privileges that have ever been proposed It indicates a lefty disregard of the prorisions of the general railroad law, and ignores altogether the usual formula for obtaining possession of lands for the use of the road, and it provides instead of all this, samply that the company shall "occupy " so much land as they may deem cessary for their purposes. provision for the assessment of the price such lands, nor for the payment to the resent owners for the land which is to be taken, and indeed, it does not appear certuin that any payment at all is contem plated, the idea apparently being that the

Co., shall take possession of such lands as it needs, and then leave the owners selves as to the payment therefor. The bill is being engineered by a blonde young gentleman from Philad-lphia, who disourses patriotically upon the benefits said that he has a trunk full of money, which he is ready to donate to the mem bers of the Legislature in the furtherance
