[CONTINUED]
The Rebels then kept a constant scouting, and their numbers were so great, that we had to lay still for some time; and when Collier and Balfour left the settlement, he said Collier Dudley, before mentioning, took the place with 300 men from Virginia. He took a negro man from me and sold him at public auction for 110 pounds; the said negro was sent over the mountains, and I never saw him since. At length they all began to scatter; and we to embody. William Ellwood being the first of my taking too much command of the men, and one day, in my absence, he persuaded them that I was going to make them all regular soldiers, and came then to be attached to Col. DIAMOND SPECTACLES. The spectacles are manufactured from "Minute Crystal Pebbles" melted together, and are called Diamond on account of their hardness and fine Crystal. They are well known that Spectacles cut from Brazilian or Scotch pebbles are very injurious to the eye, because of their refracting light. Having been tested with the polariscope, the diamond lenses have been found to admit fifteen per cent. less heated rays than any other pebble. They are ground with great scientific accuracy, are free from chromatic aberrations, and produce a brightness and distinctness of vision not before attained in spectacles. Manufactured by the Diamond Optical Manufacturing Company, New York. For sale by responsible agents in every city in the Union.
