WHEAT HARVEST,-The harvest is progrowing in this and the adjoining counties, with remarkable flow weather for the purpose. The account of the condition of the crups is very conflicting, in some portions of the county, the yield promising a fair average, while in others it is much below. In the red land the crops has fored more hardly from the severity of the winter. In the gray lands the injury was less. On the whole, it may be set down that the wheat crop of Orange is not a full one, nor is the grain as good as it was last year.—Hillsbore' Recorder.

The Hillsboro Reserver has an interest ing article on the Granite Factory on Haw er. It manufactures excellent colored fabrica. It is certain that in smoothness of texture, to beauty and derability of colors, and in thorough fidelity of workmanning, the articles known as striped and checked demosters and plaids, not only risal the same class of goods made at the North, but in reality for surpose them. An Acr or Churly.—Chapped hands and faces are the most serious annoyances that farmers, and people who labor much out of doors, experience from exposure. Exposed persons, especially children, repeatedly suffer intensely from great cracks upon the hands, that often bleed. It is cruel to allow one's self or other to suffer in this way, when the means of positive prevention are so easy to be had, and so cheaply, as to pay ten cents for a cake of Hand Sapolio. Hand Sapolio is not only better than the costliest soap for removing dirt, but it prevents chapping, and ren-ders the skin soft and pliable. Sold everywhere,
