Midnight Dispatches

## Domestic News.

FROM NEW YORK.

NEW YORK, July 17.

The following are interesting details of Dr. Sears' report on schools in the South:

Virginia.—The number of public schools in this State for the year ending August 1st, 1872, is 2,000, and scholar population consisted of 411,000 persons between the ages of five and twenty-one years of which—247,000 whites, 164,000 colored. Of assistance received from the fund \$35,000 was appropriated to Virginia schools during the past scholastic year.

North Carolina.—The condition of public schools and education generally in this State is far from being satisfactory. There is an alarming indifference on the part of the common people, and a want of union and hearty cooperation among the public men. The amount appropriated to schools in this State was \$12,500.

South Carolina.—Few schools are reported throughout the year. An application was made for Charleston as follows:

The legislature at its last session appro-

priated over three hundred thousand dollars for educational purposes. Not one dollar of this amount was ever received from the treasury and the result has been, that nearly all public schools in this State have been closed. The amount paid this State from the fund is \$1,500.

Georgia.—Dr. Sears quotes from the report of the State superintendent. It is not to be disguised that the effort thus far to establish a public school system for the State has resulted in comparative failure. The fund contributed is ten thousand and two hundred dollars to twelve schools.

Florida.—A somewhat gloomy picture of the condition of education in this State is given from the report of State Superintendent, who amongst other remarks, says, it is sadening to reflect that three-fourths of the youth of this State are yet uneducated by the educational system, but adds, it is encouraging to know that the ratio is rapidly changing. The Peabody fund contributed \$8,000 in aid of fourteen schools.

Alabama.—The State Superintendent of Alabama gives a despondent report. Out of a population of one million three hundred and eighty-three thousand, can neither read nor write. Of voting population there are ninety-one thousand blacks, seventeen thousand whites who cannot read or write, enough, if consolidated into one party to control every election in the State. The State funds paid \$606,617.35 during the year, and the Peabody fund seven thousand dollars to five schools.

Mississippi.—By the new school law in addition to the State tax of four million dollars for payment of teachers, the supervisors of the counties are required to levy a county tax for school purposes and incidental expenses. The estimate of the Superintendent is that there are four thousand six hundred and fifty public schools with an average attendance of one hundred and twenty-five thousand, and four hundred in private schools with a hundred and forty-eight thousand seven hundred and eighty pupils enrolled. The expenses of common schools is one million one hundred and thirty-six thousand nine hundred and eighty-eight dollars, and the Peabody fund contributed four thousand four hundred and fifty dollars to aid six schools.

Louisiana.—On recommendation of the agent to the fund, who acts gratuitously in the State, the sum of seven thousand three hundred and eighty dollars was contributed to aid the schools.

Texas.—Unsettled state in school matters. The general agent was constrained to reply to letter of State Superintendent, which was a new call for money, that in the present unsettled condition of the system the trustees did not feel justified in making donations from the fund.

FROM WASHINGTON.

WASHINGTON, July 18.

Delano leaves for Ohio to-morrow. On Tuesday Gen'l Howard visited the office of the Inspector General of the army who has his Headquarters in the War Department and requested from an officer attached to that branch of service, information as to what charge he could be tried should the Department see fit to order a court martial in his case. He was informed that he could be tried for neglect of duty in allowing his subordinates to misappropriate money belonging to the Freedmen's Bureau, or under the 30th article of war for embezzlement. In a conversation had with the officer upon the subject of his troubles, it was suggested to him that he had the privilege to demand a court of inquiry and inasmuch as the charge had become a matter of public notoriety, it might be to his advantage to request an investigation by a military court. Howard replied that with the feeling toward him, entertained by many officers in the Unit. J. States army, he did not think he could get justice, and hence had thus far declined to ask for a trial by such a tribunal.
