Death of an Old Outcast. The past-time of the ancestors of Mr. Darwin's has been turned into rhyme as follows: "There he quailed the stoutheaded Spring, or hung with apple-like glow By his beak or tail or eyelid To the slippery mango tree. There he wooed and won a dusky Bride of foliage like his own; Talked of love till he was weary, In a tongue to 'em unknown. THE CABINETS is pleased that we will allow ten feet. There are within a fraction of 216 feet in one side of a square acre. So you can grow on one acre 160 rows with 100 plants to each row making 16,000 plants. Mr. R. says the hands will average 7 lbs, you would then have 77,120 lbs. of cabbage. Cabbages brought last winter in Horry as high as \$12 cents, but the market only averaged about \$12 cents per lb. At this price the yield of an acre would be worth the next little sum of \$1,225.72-2. Say the hands would average only 5 lbs and they would bring only 2,250 and you have upwards of \$1,000.00 to the acre. Surely more than you can make at selling cotton or anything else.

ONE THING IS CERTAIN, if the swapper business don't prove more lucrative with in the next six months, we are going to try to carry ten acres of land in Watauga and go to raising cabbage.—Furnished by 10 A. M.
