Ранама, Верт. 26. The United States flag-ship B is here. A correspondent of the Ster and Hereld, writing from Antigus, Gustemals, under date of the 4th inst,, re-ports an earthquake which took place there on the evening before at 8:80 p. m. without any previous warning A strong earthquake shook the ground violently in the direction from the west to the cast The movement was a series of strong vertical and horizontal impulses combined This wave like undulations on the surface, rose and fell at least a foot. This acting alone, with the above mentioned vertical movement, made it almost impossible to move about without being thrown to the ground. Added to this there were piercing cries of the populace, creak. ing and cracking of walls, loud sounds rettiring clean of trives, and the state of the previous of this ordinary and if down in conduct which the never be torgotten; with a practice hope that it will indee the

was very dark, too, and every visible ob- siews of the public generally.

Very respectfully, ject was in welcut motion. Long after the first shock had parsed there was still a poise of walls falting more or less distant. Suddenly there arose sounds of hundreds of voices chanting hymne to an ordinance for the funding of the their Creater for mercy. Shocks followed carr schipt, and for other purposes, during the night of varying intensities, every one of which gave rise to a new alarm and new Impotations for mercy. The night seemed as age in length. Fortunately no rain fell. About two dozen houses that were inhabited have been destroyed, causing, as far as could be learned, the loss of thirty-two lives. The number of houses damaged, and which will have to be taken down, will be found considerable. The Isdians say that three villages at the foot of the volcano has been destroyed, though this wants confirmation, st. 2 and december 1994

FREEDMAN'S BANK Washington, Oct. 5.

The commissioners appointed to settle the affairs of the Freedman's Savings and Trust Company, write to a correspondent as follows: It is impossible yet to say when the first dividend will be paid. They have now only forty-five thousand dollars in the Treasury, and six hundred thousand dollars are required as the basis of a dividend of twenty per cent. In the present condition of the money market, on account of high rate taxation in the District of Columbia, the collections are slow and yezy small, so it will take a long time to raise sufficient furds to make such dividend. The approximate liabilities up to the 11th of July, were two millions and eight hundred thousand dollars, and the assets were \$2,700,000. While much will be lost in collections, a considerable sum will be realized in the accumulated interest. As a matter of economy, it has been determined to close the thirty-three branches at the end of this month, by which a saving of at least one bundred thousand dollars will be effected.
