OUR SUPPERING FARMERS.

RALEIGH, N. C., Jan. 10, 1876. EDITOR SENTINEL : I see by your pa per that a great quantity of pork has been spoiling throughout the state, and you generously open your columns for discussion as to the cause, I boldly assert that it was caused by negligence, which I will undertake to prove. I am an old Virginian of considerable experience in the curing of bacon, and it gives me pleasure to be able to afford informaon of such vital importance. I moved four years ago from the tide-water regidu of Virginia to Baleigh ; so you see I am a North Carolinian by adoption, and I do not want even a scalawag or

radical to LOSE IES BACON. I would not advise the kilting of pork in warm weather, but as it frequently turns suddenly warm after it is killed, the question is, what is to be done to keep it from spoiling. In clear, cold weather any one, no matter how care ess, will have no trouble. It is only in warm, damp weather that it requires care nucl judgment. I will suppose T have just finished killing my hogs, and it has suddenly turned warm. Let them hang on the gallows

ALL NIGHT.

Then commence cutting out and as you do so lay the meat in the shade on the ground; this will extract the animal heat out of it. Do not commence cutting until after night. Put an even tablespoonful of line y pulverized saltpeter to each ham or shoulder. In 36 ours break it up, and lay it out on the zcound again and let it remain there 2 or hours to cool, and then resalt it. This operation must be performed in the night; if in the day-time, you will expose it to a warmer atmo-phere than exsts in the bulk, and will ruo a great risk of losing the whole of it. This has been a very

COMMON AND FATAL ERROR.

Let it remain in salts 10 days, break a up and wash it clean with warm water, and before it diffes make the flesh side black with finely sifted black pepper to prevent the flics; (red pepper does no good. Hang it up in the smoke-house; give it time to drip, say 2 or 3 days. and then smoke it with hickory wood. This should be done in

CLEAR COLD WEATHER, never in rainy, damp weather; it will take smoke better, and besides it will be more sightly. Use brown sugar freely in the salt for hams and shoullers. To bid defiance to the flies, make a paste of corntield peas, strain it through a sifter and with a knife spread it smoothly over the flesh side; this should be done after you have finished NEWS AND NOTES.

A WONDERFUL CURE.-Yesterday morning, John O. Arthur, a young man who resides in Granitoville, South Carolina, came into our office, and requested us to look at his eyes. They were hadly crossed, and had been so, according to his statement, for eighteen years, since a short time after his birth. Having heard of the wonderful cures performed by Dr. J. A. Jones he had come to the city for the purpose of letting the latter operate upon him. In the course of a couple of hours Mr. Arthur returned, and stated that the defect in hisvision had been entirely removed, and that his eyes were as straight as those of any one else. His looks fully corroborated his assertion, and there was every evidence of a wonderful cure having been accomplished in an incredibly short space of time by the skillful physician .- August. PROF. TRIPP'S LECTURE. - A good audience assembled last evening in the hall of the Young Men's Christian Association, to hear the first of Prof. Tripp's course of lectures. The subject was Louis Napoleon, and the professor gave his hearers an instructive talk on the upphew of his uncle, and the succession of revolutions and accidents that raised him from a constable on the streets of London to the imperial throne of France. The subject this evening will be The Second Empire, embracing the Crimean campaign, the Mexican expedition and reminiscences of Maxitailian and the "Poor Carlotta" whom his host breath immortalized. The lecture will be illustrated by a map prepared and printed expressly

for Prof. Tripp.

THE GRADED SCHOOL .- We met foday Capt. J. E. Dugger, who is visiting our city by invitation, to perfect the plans for our much needed graded shool. Our citizens will hold a meeting at 8 o'clock to-morrow evening, in Metropolitan hall, to appoint a board of trustees and take such other steps as may be necessary. This is one of the most important forward movements yet made by our city, and it is hoped that our people will give an hour to the subject. The prompt and cordial co-operation of our citizens is indispensable to the suc-cess of the school, and when cess we know there are children in our midst growing up in utter ignorance, how can we be Tangle." indifferent on this subject ? P. S. I am under the impression that pork can be saved any cool time in spring by having a large kettle of strong brine boiling and dip each piece of meat in it from 1 to 2 minutes ; this will penetrate to the bone and extract all the blood; then lay on the ground and as soon as it is cool, salt it and pack it away. This is an idea of my own, but I have never tried it. H. J. C.
