The very fine results and increasing demand of the Star Ammoniated Soluble Phosphate seem to have created quite a sensation among manufacturers of and dealers in commercial fertilizers.

Other manufacturers have even commenced manipulating and offering for sale a fertilizer called the "Star Bond Phosphate."

Farmers should beware of imitations.

The original and only genuine Star Ammoniated Soluble Phosphate has the trade mark of a star printed on each sack with the analysis manufactured by Loretto & Ritter of Baltimore, Md., and for sale by A. C. Sanders & Co., or their agents.

IMPORTANT DECISION.—Under the head of "An Important Supreme Court Decision," the Charlotte Observer of March 10, says:

A telegram received in this city yesterday afternoon from Raleigh states that in the case of Joseph H. Wilson et al. vs. the Board of Aldermen of the City of Charlotte, recently argued before the supreme court, the court on yesterday filed an opinion in favor of the city. In this case the plaintiffs raised the question of the power of the city to tax stocks, bonds and evidences of debt, and also the right of the city to borrow money for its necessary purposes.

The court holds, as is presumed from the decision, that the defendants have the power, under the charter, to tax stocks, bonds and other evidences of debt, and to borrow money for necessary purposes. It overrules, it is thought, a previous decision of the court, in the case of Weinstein vs. the City of Newark. Some \$8,000 or \$10,000 are involved in this suit. The telegram announcing the decision, was received by Messrs. Jones & Johnston, attorneys for the city.
