#### B. Franklin's Essays.

Always happy .- An Italian Bishop struggled through great difficulties with 'out repining, and met with much opposition in the discharge of his episcopal function, without betraying the least im patience. One of his intimate friends, who highly admired those virtues which he thought impossible to imitate, one day asked the Prelate if he could communicate the secret of being always easy ?-" Yes,' replied the old man, " I can teach you my secret, and with great felicity : it consists in nothing more than making a right use of my eyes.' His friend beg ged him to explain himself, - Most will ligly,' returned the Bishop: 'In what ever state I am, I first of all look up to Heaven, and remember that my principal business here is to get there; I then look down upon the earth, and call to mint how small a place I shall occupy in it when I come to be interred; I then look abroad into the world, and I observe what multitudes there are who are in all respects more unhappy than myself. Tous I learn where true happiness is placed, when all our cares must end, and what little reason I have to repine or th complain.'

In an article in the New Monthly Magazine, it is remarked, that more close ex mination has proved the fabulous nature of many of the accounts extensively credited, during part of the past century, concerning the populousness, magnifi cence and fertility of China, and the cividelicate palate, and a grateful cordial to lization and enlightened condition of the inhabitants. " Recent, travellers," says the Editor, " found vast deserts as they approached the capital, which surrounded it on all sides; and that the wealth, resources and population of China have been ridiculously magnified. The date of the foundation of the Celestial Empire, which the Chinese pretend has existed for 97 millions of years, and which even Voltaire states at 5000 years before Christ, scarcely reaches the fittieth century before the coming of our Saviour.

Administration Meetings .- Maryland seems to be all alive with the Presidential question. Meetings are held in every section of the State, which are 'represen ted to be well or ill attended, as the re presentor happens to be favorable or unfavorable to their objects .- It cannot however, be questioned, that the meeting of the Administration in Baltimore is worthy of notice whether we regard the number that attended, or the influential character of those who composed it. About 1500 persons were present. After the apprintment of Chairman, Secretary. &c the meeting was addressed by Mr. Keli, Attorney General of the State of Maryiand. An eloquent Preamble and sunory resolutions, were then passed pledging the meeting to the support of the Auministration. It was also determined to elect Delegates to a Convention to be held in Baltimore as soon as pos sible, in which the People of other parts of the State were invited to concur.

the stomach. This is the first discovery of a medicine taken into the stomach, that has had the long desired effect of curing the most obstinate and distressing external diseases. The use of nutritious tood, and the ordinary avocations of business, are not interrupted by the Catholicon; and its properties having the power of restoring both flesh and bone, and of renovating and invigorating every part of the system during the process of exterminating disease, is without a parallel. The following certificates will, it is

presumed, satisfy the most incredulous, of the pre-eminent virtues of the Catholicon.

## CERTIFICATES.

CASE. G .---- was of a scrofulous habit ; at the age of three years his parents perceived an ulceration of the head, procee ding, it is supposed, from vaccination. It was at first confined to a small compass, but from the continual discharge, it was soon communicated to the whole scalp, which presented a horrible appearance, being almost one entire scab : soon after this, a discharge commenced from his ears, which became very offensive Blisters washes, ointments, &c. were rigorous ly resorted to, but in vain After remaining in this situation for more than six months, the legetable Catholicon was recommended and its use immediately commenced. It quickly displayed its acknowledged powers over the disease, by first increasing the discharge, but which soon after ceased, the complaint being completely eradicated, and the child restored to health.

For information as to the accuracy of this case, the father of the child can be referred to, on application to W. W. POTTER

N B The above case of Tinea Capitis, or ulcerated sore head, should be a warning to parents to guard against the evil effects which too often arise from neglecting to use some purifier of the blood, after the vaccination of their children. The Catholicon is offered as a suitable remedy in these cases, and should be invariably used .- Phila. Feb. 23d, 1827.
