

Carolina Sentinel.

VOL. X.

NEWBERN, N. C. SATURDAY, JUNE 23, 1827.

NO. 433.

PUBLISHED WEEKLY, BY
WATSON & MACHEN,
At \$3 per annum—half payable in advance.

STATE OF NORTH-CAROLINA,
CRAVEN COUNTY.

NOTICE IS HEREBY GIVEN,
to the inhabitants of the County aforesaid, that I have received from the Clerk the list of taxable property, and hold it ready for their inspection and they are hereby requested to give me information of any lands, polls, or other taxable property, not given in: and they are further notified, that I will attend at my Store until the 1st day of July next, for the purpose of receiving from the inhabitants of the Town, and Captain's Richardson, Russell, Dubberly, Roach, and Whitford's districts, their respective taxes. I also will attend at the next musters in said districts; after which time, I shall proceed to collect the Tax in arrears by distress and sale of the delinquents property.—Persons who intend leaving the Town for their health, or other reasons, will do well to pay their Taxes before they go.

ELIJAH CLARK, Sheriff.
June 5, 1827—'81 83.

NOTICE.

THE subscriber having been appointed by the Commissioners of Newbern to receive the lists of taxables for the present year, will attend at his Store during the month of July next, for that purpose.

JEREMIAH BROWN.

Cooper's New Novel.

THE PRAIRIE, by the Author of the Spy, Pioneers, &c. For sale by

T. WATSON.
June 9, 1827.

ORDINANCES.

FROM and after the 20th inst., the following Ordinances will be rigidly enforced.

By Order of the Commissioners,
NATHAN TISDALE, C. C.

Newbern, June 16, 1827—'82 83.

"In order to prevent as much as possible all indecent, riotous and scandalous behaviour of free negroes and slaves, it is hereby ordained, that if any negroes or mulattoes shall be found gaming at five, cat, or other games on Sundays, or shall be seen gathering together in the streets, or other places, at any time, in a quarrelsome, riotous, or disorderly manner, each of them shall, for every such offence, on conviction before a Magistrate, or the Intendant of Police, at his discretion, suffer the punishment of twenty four hours imprisonment, or whipping, not exceeding thirty-nine lashes on his or her bare back.

Passed 10th July, 1801.

"No slave shall be permitted to keep house within the town, unless owned or hired by a resident of the town—nor shall such a slave keep a house except upon the lot occupied by the person to whom they belong, or by whom they are hired, unless permission be specially granted by the Commissioners, which permission shall be granted upon the proprietor or hirer of such slave entering into bond in the sum of fifty pounds to the Commissioners and their successors in office, with sufficient surety, with condition that such slave shall not receive in such house any stolen property, nor harbour any runaway, nor permit any riot or breach of the peace at said house. Any free person permitting a slave to keep house, in violation of this ordinance, shall forfeit five pounds; and the Negro, keeping the house, shall be punished at the discretion of the Justice or Intendant before whom he or she may be brought on said charge, not exceeding thirty-nine lashes. And for every month continuation of the offence, after the first conviction, the same fine and punishment shall be incurred and inflicted."

Passed 14th Feb. 1817.

"In pursuance of the authority of the Act of the General Assembly, passed in 1807, It is ordained that one hundred slaves, each owned or hired by some person resident of this town, may be licensed to hire their own time, and to be employed as ordinary labourers and daily workmen in this town, for the term of one year. Each slave shall be furnished by the Treasurer with a metal badge, containing its number, and with a licence also numbered, the number of the badge and licence to each slave shall be the same, and the badge shall be publicly worn by the slave so licensed.

Each person on obtaining said licence and badge, shall pay to the Treasurer for the use of the town, ten shillings. If any slave so licensed shall be convicted of frequenting tipping shops on Sunday, or of dishonesty, or of permitting any other slave to use his badge and licence, such slave shall forfeit his licence and be subject to be punished at the discretion of the Intendant, not exceeding thirty-nine lashes. Any slave, not licensed, who shall deceptively use the badge or licence of another slave, shall, on conviction before the Intendant, be punished not exceeding thirty-nine lashes.

The license shall be in the following form:—No. The Commissioners of the Town of Newbern, certify, that A. B. a resident of said Town, is licensed to hire to Negro owned or hired by the said A. B. (as the case may be) his own time, and to be employed as an ordinary labourer and daily workman in said town, for one year from this date. Provided, however, that if the said slave shall be convicted of frequenting tipping shops on Sunday, or of dishonesty, or of permitting his badge or his license to be used by another person, this license shall thenceforth determine and be void."

E. F. TREASURER.

Passed 14th Feb. 1817.

"No person shall run or gallop a horse, or gallop a horse in a cart or carriage, in the streets of this Town, nor ride upon the foot walks, which may be paved, under the penalty of forty shillings.

If a slave commit the offence, he shall be punished not exceeding thirty-nine lashes."—Passed Feb. 14th, 1817.

THE SUBSCRIBER

HAS recently received from N. York, a fresh supply of Lemon Syrup, Seidlitz Powders, and Soda Powders.—Also, one elegant Musical Snuff Box.—Silver Table Spoons and Tea Spoons, of patent patterns,—patent and common Watch Crystals, Watch Ribbons.—First quality flatted robbin, peach, and trout Hooks.—Marbles.

THO'S W. MACHEN,
2nd door north of the Court-house.
June 9, 1827.

COLLECTOR'S OFFICE,

DISTRICT OF OCRACOKE, June 14, 1827.

PROPOSALS will be received at this Office until the 10th day of July next, for building a Light House, Dwelling House, &c., at the Point of Marsh, mouth of Neuse River—of the following materials, dimensions, and description:

The Light House to be built of stone, or hard brick; the form round. The foundation to be raised with stone, five feet above the level of the marsh, to be built up solid, and laid in best lime mortar; and if necessary to secure the fabric, piles are to be drove for it to rest on.—The tower to be thirty feet high from the surface of the ground; the diameter of the base to be eighteen feet, and that of the top nine feet; the thickness of the walls at the base to be three feet, and to be uniformly graduated to twenty inches at the top. The top to be arched, on which is to be laid a deck of soap-stone, eleven feet diameter and four inches thick; the pieces forming it to be clamped together with iron clamps set in lead, and the joints filled in with lead. On one side of the deck, to be a scuttle door to enter the lantern, of the same dimensions as that of the eastern light house at North Point; the frame of which to extend down the whole thickness of the arch to be of cast iron, and the door an iron frame covered with copper, at least thirty ounces to the square foot; with an iron handle on the upper, and a bolt on the lower side, and good wrought iron hinges.

The walls both inside and out, to be well pointed with strong mortar, and white washed twice over at least.

There are to be three windows in the tower of twelve lights each, of eight by ten best glass, in strong frames; and a door six feet by three, made of double inch boards, cross nailed, with substantial wrought iron hinges, and a good lock and latch. The door posts to be of dressed stone, at least ten inches square, the cap and stool or sill, to be of same thickness, of Susquehanna stone, dressed on the outside, to extend in width the whole thickness of the wall, and to which the door posts are to be permanently secured with dowels at the top and bottom. The ground floor to be well paved with brick or stone. A sufficient number of circular dressed stone stairs not to exceed eight inches rise, to lead from the ground floor to within seven feet of the soapstone deck, one end of each step to be worked in the wall, the other to go up plumb, forming a newel, guarded by a good iron hand railing, substantially secured to the wall with iron eye-bolts. From the platform at the top of the stairs, to the entrance of the lantern, to be an iron ladder, with steps, the usual distance apart to equal two inches square.

On the top of the tower to be a wrought iron frame lantern of the octagon form, the posts of which to be one and a half inches square, to extend down into the stone or brick work five feet, and well secured with anchors. The height and diameter of the lantern to be sufficient to admit an iron sash in each octagon, to contain eighteen squares, eleven by nine; fifteen of which to be glazed with the best double glass from the Boston manufactory; the other three squares or lower tier, to be of sheet copper, of thirty ounces to the square foot. The rabbits of the sashes to be three quarters of an inch deep, with holes drilled in the top and bottom of each square, to admit iron or copper pins to secure the panes of glass. In one of the octagons to be an iron frame door four feet high, covered with copper of thirty ounces to the square foot, to open on the outside, and to shut tight in the rabbits, with strong iron turn-buckles to confine it closed. The dome to be formed of sixteen iron rafters or ribs, concentrating in an iron hoop or neck four inches wide and nine inches diameter, covered with copper of thirty ounces to the square foot, each sheet to embrace three of the ribs and to be riveted thereto, and to extend down and rivet on the piece that forms the base of the dome, which is to be three inches wide. On the dome, to be a traversing ventilator two and half feet long and fifteen inches diameter, to which is to be secured a copper vane, three feet long and twenty inches wide.—The seams where the sheets of copper join in covering the dome to be substantially brazed—and the dome ventilator and vane to be constructed and finished as that to the western light house at North Point.

Around the lantern to be an iron railing, the posts of which to be one and a quarter inch square, to be inserted in the stone deck at least three inches, set in lead, and within six inches of its outer edge, every other one of which to be continued with a sweep to join & be secured to the piece that forms the top of the sash, the upper rail to be three feet four inches from the deck, and two and a half inches wide by half an inch thick, with two other

rails at equal distances below, of round iron seven eighths of an inch diameter.

The wood work of the tower, the lantern, and iron railing to be painted twice over, exclusive of the priming with best white lead,—the dome to be painted black with two coats exclusive of priming.

The light house to have a complete electrical conductor made of copper, three quarters of an inch diameter, with an approved electrical point—to be substantially secured with proper eye-bolts and stays to the base, tower and dome;—to extend in height at least, four feet above the top of the ventilator or vane, and in depth at least four feet into the earth, forming an obtuse angle from the perpendicular of the foundation of the light house.

The dwelling house to be of stone or hard brick, thirty-four feet by twenty from out to out; one story of eight feet in the clear, divided into two rooms with an entry between;—the stairs to lead to the chambers and to the cellar, to be in the entry.—A chimney with a fire place in each room with iron or stone backs and sides. A cellar under the whole of the house with sufficient walls of stone to support the walls of the house, which are to be twenty inches thick, the whole laid up in strong lime mortar, and to be well pointed.—The roof to be rectangular, the boards of which to be jointed and halved, the roof joists to be not less than 3 inches by 5 at the ridge, and 3 inches by 7 at the foot, with collar beams 7 inches by 3; the joists to be placed not over 2 feet apart, the whole to be well secured, and covered with first quality shingles.—There are to be three windows in each room of sixteen lights, of eight by ten glass each, and one of the same dimensions in each chamber. The doors to be four pannelled, with first quality hinges and thumb latch to each, a good lock on the outside door, with a bolt and thumb latch to the back passage door.—A closet in each room with a good lock to it.—All the floors to be doubled and well nailed—the joists of the first floor to be 12 by 3 inches, & of the second, to be 10 by 3 inches square to be laid not exceeding two feet apart.

Also a kitchen, attached to the dwelling house, fourteen feet by twelve in the clear, the walls of stone or brick eight feet high, with double floors, the joists of the first floor to be 12 by 3 inches, and of the second 10 by 3 inches square, two windows and one door, besides a door to communicate with the dwelling house—a chimney with a fire place, and a sizeable oven with an iron door; iron crane, trammel and hooks in the fire place and on one side of the chimney a sink, with a spout leading through the wall.

Also an out house or privy at a convenient distance from the dwelling, of stone or brick, five feet by four in the clear, with a well at least eight feet deep, walled up with stone or brick; the roof to be well shingled.

All the wood work of the dwelling-house, kitchen, and out house, to be painted with two coats of good paint, exclusive of priming.

The inside walls and ceilings to be lathed and plastered, and finished in a plain neat style. Gutters of double tin to lead round the dwelling house and kitchen, with spouts of the same material to carry off the rain water. All the lumber used, to be of well seasoned yellow heart pine, consequently entirely free from sap.

Also a cistern, to hold not less than one thousand gallons, to receive the water running from the gutters of the dwelling house and kitchen.

The whole to be completed in a faithful and workmanlike manner, by the first day of December next.

The sand used in making the mortar must be inland sand, and the water must be spring or well water, so that there shall be nothing of a saline nature in the cement or mortar.

Above and below each window frame of the light house, must be single stone of sufficient dimension to reach from out to out of the frame, and extend inwards the whole thickness of the wall. And in building up the walls, if of stone, there must be an entire range of thoroughstones every three feet, besides that in the intermediate space, the stones must tie.

Separate proposals will be received for fitting up said light house, within one month after it shall be built, with patent lamps and reflectors, tin butts for keeping the oil, and all the necessary apparatus, in the same manner as the light houses of the United States have been fitted up by Mr. Winslow Lewis—the whole to be approved by the superintendent.—Payment to be made when the whole shall be completed and approved.

JOSHUA TAYLOR,

Collector.
