### Oxford Female Academy.

SEVERAL Gentlemen from a distance, having  
requested information respecting the course  
of Studies pursued in this Institution, the  
manner of teaching, price of board, tuition, &c. we  
embrace the present opportunity of making a  
public statement on those subjects.

The following branches are taught, viz. Read-  
ing, Spelling, Plain and Ornamental Penman-  
ship, Arithmetic, English Grammar, Geogra-  
phy with the use of the Globes, Projecting & Draw-  
ing Maps, Biography, Belles Lettres, Grecian  
Roman and Jewish Antiquities, Botany, Mine-  
ralogy, Chemistry, Natural Philosophy, Astron-  
omy, Philosophy of the Mind, and Plain and  
Ornamental Needle-work.

The price of Board and Tuition in the above  
Branches, is sixty dollars per session of 5 months.  
Music thirty—Painting and Drawing twenty—  
Latin Language ten—French ten dollars.

With regard to the manner of Teaching, the  
Instructors keep one object constantly in view,  
viz. to bring the understanding into ex-  
ercise, without burdening the memory. We do not think  
we have accomplished great things, simply be-  
cause we can persuade a child to repeat a long  
lesson from the book. It is our object to fix  
the attention on particular facts and to get the  
pupil to understand the nature of those facts;  
and this not only in the higher branches, but in  
the first elements. In simple Arithmetic, and  
English Grammar, we commence in this way;  
and by this method, we gain not only much more  
rapid progress in the first stages, but what in  
our opinion is of vastly greater importance, we  
get the pupil, almost without exception, to be  
fond of the study in which she is engaged. Study  
is then not an odious task, but a delightful  
employment. Nothing is more pleasing to youth  
than to discover the strength of their own pow-  
ers of understanding. This discovery we en-  
deavor to get them to make, and when this is  
accomplished we have no fears, but correspond-  
ing efforts will be made to bring those powers  
into exercise. Since the commencement of the  
Session, we have received a Chemical and Philo-  
sophical Apparatus; and now, each recitation  
in Chemistry, Philosophy and Astronomy, is ac-  
companied with a Lecture and Experiments illus-  
trating the principles of those sciences.

A close and parental watchfulness is exercised  
over the young ladies who board with the Prin-  
cipal, and while every necessary indulgence for  
exercise and recreation will be allowed them,  
nothing inconsistent with strict decorum & gen-  
teel manners will be permitted.

The local situation of this Institution is pecu-  
liarly propitious. The healthfulness of the place  
is extraordinary. Not an instance of serious  
illness has ever been known among the pupils,  
since a boarding school has been established  
here; and since the commencement of the last  
summer session, they have enjoyed uninterrupted  
health. The moral character of the society of  
Oxford and the vicinity, needs not our com-  
mendation; and what we consider equally favor-  
able for the institution is, that a lively interest is  
manifested for its prosperity, and our first families  
pay every attention to the young ladies from a  
broad, consistent with the attainment of the ob-  
ject for which they were sent here by their Pa-  
rents and Guardians. The Principal has four As-  
sistants, three ladies and one gentleman, all  
constantly engaged—and we take this opportu-  
nity of assuring the public, that no exertion or  
expense within their power shall be wanting to  
make the Institution what it ought to be.

### Runaway

FROM the subscriber, living about 12 miles  
east of Raleigh, on the road leading from  
Rogers' Cross Roads to Smithfield, his Negro  
Man, named AARON. Aaron is about forty  
years of age, quite a knowing, polite fellow,  
dark complexion, and from a fall received from  
a horse by which his leg was injured, he limps  
when walking. He has a remarkable scar over  
his right eye, occasioned by a blow from a rock  
during a fight. He took with him a mixed home-  
spun body coat, a drab great coat, and a pair of  
pantalons dyed with copperas—none of his other  
clothing recollected. It is expected he will en-  
deavor to make his way to Virginia, whence he  
was originally brought. Probably he is lurking  
about Petersburg; or he may go to Richmond  
county in this State, as he has a wife there.  
The subscriber will give a reward of \$10 for  
his apprehension, if taken in the State, or \$20 if  
out of the limits, besides paying all necessary  
expenses in bringing him home.

### NEWMAN'S

CELEBRATED  
PATENT CRIST MILL.

The Runner at the Bottom.

PATENT having been issued by the Presi-  
dent of the United States, to Edward New-  
man, for his valuable improvement on the Grist  
Mill, the subscriber is fully authorized and em-  
powered to make sale of Rights for using a single  
Mill, or the Rights for using said Mills in any  
County, or in any State in the Union, except  
Louisiana.

Persons wishing to purchase Rights, can di-  
rect their letters to Samuel Morehead, Postmas-  
ter, Martineville, Guilford, N. C. and they will be  
immediately attended to.

The superior advantages of this Mill, consist  
in the grinding being done so near the centre,  
where the power is applied—the small size of the  
stones,—and the application of pressure to sup-  
ply the absence of weight. The running stone  
is placed on the spindle, and facing upwards to  
the bed stone, which is permanently fixed. The  
pressure is applied to the centre of the runner,  
and the grain introduced into the mill through  
the eye of the bed or top stone.

The simple construction of this Mill, its great  
durability and cheapness, and its convenience  
and usefulness to all persons having large families  
and stock, and the facility with which animal or  
water power can be applied, have given it the  
decided preference over all the inventions of  
this kind, with persons who can judge such  
things correctly.
