The Newbern Spectator announces the arrival of the Steam Boat, Codorus, having successfully performed her first trip to Beaufort, through the Clubfoot and Harlow's Creek Canal. She departed again for Beaufort, carrying besides freight, sixteen passengers. The most agreeable part of the information given in the Spectator, is the determination of the Proprietors to run her, during the next session of our Legislature, up Neuse River, to Smithfield and if practicable to Cobb's Mills. We hope Mr. Keene, whose operations on the Cape Fear, have been so successful, will be employed on shall, Gov. Tyl r, and Gen. Mercer, from the Neuse this summer, and thereby facilitate the views of our Newbern friends .come visitant. The mere probability of it, is exhilirating.

Edinburgh Review .- This is a celebrated journal both in England and the United States. It has shown, on many occasions, considerable liberality to our citizens and institutions. This feature in its character, has perhaps, contributed more than any other to its great circulation in this country. That circulation. however, is now considerably diminished on account of the deserved popularity of our own Reviews. We were much gratified to discover in the last number, a notice of the Life of Columbus, by our countryman Irving, in which the merits of that work are set forth in a manner more flattering, if possible, than by the North-American.

The Hon. EDWARD LIVINGSTON, at preof Louisiana, was on the 12th ult. appointed by the Legislature of that State, a Senator in Congress, vice Mr. Bouligny, whose term of service expires on the 3d March next.

Upon a large scale!—The State of Pennsylvania has effected a loan of \$800,000 for Internal Improvement, redeemable in 1854, at an interest of 5 per cent per annum-The contractors are Messrs. T. & J. G. Biddle, & S. J. Nevins and Co.

A correspondent of one of the Northern papers, says that the members of Congress attend so much less to business than to pleasure, that he has seen the Speaker exerting himself a whole hour to get a quorum into the House. At last he sent the Sergeant-at-Arms to compel their attendance and directed the door-keeper to lock them into the hall as fast as they arrived. This another paper compares to

a Western Court, into which the Sheriff came one morning, and told the Judge that he should probably have the jury ready by the next day, " for" (said he) " we have run down ten of them, and have got ties and four dogs are after the others. and they expect to catch them this after-

Still Later .- The Napoleon, from Li verpool, brings papers to the 23d Dec .-The material fact of the retreat of the Russians beyond the Danube, is put beyond question.

Lafayette.-A finely executed white marble bust of Genl. Lafayette, has been presented, by an unknown donor, to Congress. The bust is the work, it appears, of P. J. David. of France, wrought in 1828, and inscribed to the General. On the right are inscribed the following words, taken from Lafayette's last speech to the President of the United States, Sept.

" God 'des- you, Sir, and all who surround us. God pless the American Peo le, each of their States, and the Federal Government. Accept this patriotic farewell of an overflowing heart. such will be its last throb when it ceases to beat ?

On the left are the following, taken from his speech in the House of Representatives on the 10th December, 1824 :-

" What better pledge can be given of a persevering national love of Liberty, when those blessings are evidently the result of a virtuous resistance of oppression, and of institutions founded on the Rights of Man, and the republican to Mrs Emily Trolman, principle of self-government." In Currituck county,

The total of the registered and the enrulled and licensed Tunpage of the United States in 1826, as reported, was 1,534,190 ons. Tricks in Trade.—A pair of elegantly matched ponies, belonging to the South, were on a visit to this city, and on inspecting one of them closely, the animal was found to have a glass eye, a close re-semblance to the natural one. It seems that a sail in the manger had struck out the eye of the horse, which being a favorite with his master, was carried to Doctor Scudder, who soon remedied the defect by a large artificial one, fixed in with great neatness. The defect is not easily seen.

Darien Bank .- This institution, notwithstanding the machinations and adverse predictions of its enemies, has prich into the treasury of Georgia the second ingfale ment of seventy-five thousand dollars, within the time prescribed by law; and we are happy in being able to announce hat the mother back and its branches are gain in op ration .- Phenix.

We perceive, by the Chio State J urnal that a petition present d to the Legislature of that Soite, praying for the organization of the Thompsonian Medical Socieies, was referred o the Committee on the sent a member of Congress from the State penitentiary. . The member who proposed the reference, stated that "he had been informed that a worthy citizen of Hamilton County had recently fallen a victim to the Thompsonian practice, under circums ances which rendered it quite probable that the practitioner with whom the accident had happ ned, wou'd be permitted to finish his medical studies in the pententiary; that cases of the same kind were likely to occur hereafter ; and that, cons quently, the Committee on the Penitentiary was beiter qualified than any other, to take cognizance of the subject."

> The last few weeks have been productive of more extensive fires in factories than we ever noticed in the same period of time. To those already given is to be added the following :

"We learn from the Norwich Courier, that the Silk Factory in Lisbon, Conn. owned and occupied by Messrs. Z. P. & J. Bottum, took fire on the night of the first inst. and was entirely consumed .-We learn that a small part only was insured, and that the loss to the owners will greatly retard, if not entirely break up their labors in this new and interesting branch of manufactures. This, it is believed, was the only silk manufactory in Connecticut, if not the only one in New England."

The following just and beautiful tribute o the volue and importance of the art of Printing, is from Living's Life of Colum-

" The recent invention of the art of Printing, enabled men to communicate rapidly and extenevely their ideas and d scoveries. It drew forth learning from libraries & convents, and brought it familiarly to the reading desk of the student. Fracts of information, which before had existed mly in costly manuscripts, carefully treasured up, and kept out of the reach of the indigent scholar and obscure artist, were now in every sion in knowle ge, nor any pause in its career. Every step in advance was immediately, and simultaneously, and widely promulgated, recorded in a thousand forms, and fixed forever. There could never again be a dark age. Nations might shut their eyes to the light, and sit in wilful darkness, but they could not trample it out. It would still stine on a dispensed to happier parts of the world, by the diffusive powers of the
