BY JAMES EWELL, M. D.

On the important subject of domestic medi-ine, many books have been written, which, bough excellent in other respects, have greatly ours. The book now offered to the public has, therefore, the great advantage of having been written by a native merican, of long and suc-cessful practice in the southern states, and who, for years past, has turned much of his attention to the composition of it.

To every family, more especially those in re-note situations, the possestion of this book must unquestionably, be of incalculable value: for, conducted by such a guide, it will not be presumptuous to say that any person of tolerable capacity, and reasonable attention, may be enabled to pracetise with safety and advantage, in those cases of simple diseases most incident to our climate.
