## THE SPANISH STORM SHIP.

vessels had come into the harbor during anchor some distance to terward, and so we disapprove of eggs. close in shore, rendered it squally and fit- altered location. bor for his anchorage grounds.

As we looked up the bay, during the short intervals of lighter weather during the day, the scene was peculiarly interesting. Vessels of all possible varieties were there collected. Clumsy built Dutchmen were riding beside light built feluccas, manged with Greeks; and some of the latter seemed to betray, by their lightness and armament, that, in a more open sea, they could easily throw off the merchant and assume the picarnon.

There was a large Spanish built vessel which lay quite up the harbor. Report said she had a valuable cargo on board, and the peculiar care which was bestowed on her safety seemed to confirm the idea.-But she sat too high out of the water to be heavily laden, and our sailors insisted that she was only in ballast. She had laid there for forty-eight hours, and had as yet no interesurse with the shure. She hoisted a Spinish pag soon after the Turkish now at the swiftest, carried her astern of officer of the part boarded her, but it was hauled down within an hour after.

As the evening closed in upon us, the mist seemed to rise and form itself into suge misshapen masses of clouds, which drove more and more rapidly over the heaens. The setting sun would occasionally tinge with a brassy hue the edge of the western horizon, but it was soon darkened with one huge mass of heavy clouds. The moon rose about seven, and for nearly an hour it seemed to be struggling and labor. ing through the clouds, occasionally bursting forth for an instant, and lighting up beyond. the whole bar, and then again plunging us into total darkness. The gale was evidently approaching, and an old Greek sailor who was on board told us that it would soon burst forth in all its violence. Our the wreck. Not a trace or vestige of the Captain, who was used to the sudden squalls of the Mediterranean, carried out another anchor, and having lashed every thing close, prepared to receive the gale. Our station was a more secure one, as not being amidst the crowd of the upper harbor, and in case the gale was a severe one; we could easily put to sea,

Greek saitors, in a gale, pray to heaven to After pacing the deck with my friend C. keep them from the Spanish storm ship. until a late hour, watching the driving clouds, and listening to the angry dash of the waves on the beacon rock, which lay with its blazing tops, about half a mile to the north of us, we retired to our births. the sun is beautiful and warm, duels may About twelves I was waked by a shout from above, and found it was the Captain often be seen to have taken place between hailing some craft with his speaking truin- two inhabitants of the same hive. In some pet. On going upon deck, the scene was cases the quarrel appears, to have begun noble but terrific. Our vessel rolled and within, and the combatants may be seen pitched in the midst of these short chapping coming out of the gates eager " for b'ows." waves which strain a vessel much more Sometimes a bee peaceably on the outside than a full deep swell. The moon was of the have, or walking about, is rudely nearly south, and the wind blew a perfect jostled by another, and then the attack hurricane. The whole bay was covered commences, each endeavoring to obtain with a white foam, and streaked with long the most advantageous position. They black wind strenks. Two feluccas were turn, pirouette, throttle each other; and driving loosely and scarcely manageable, by such is their bitter earnestness, that Read us-one, with a small sail set, was striving our has been enabled to come near enough to pass the entrance and keep out to sea to observe them with a lens, without caus--while the other was defing side to the fing a separation. After rolling about in wind full upon us. The capitain was just the dust, the victor, watching the time and continue until March. hailing them with directions, but the fright. when his enemy uncovers his body, by ened Greeks were all on their knees, and elongaring it, in the attempt to sting, thrusts an instant more brought them against us its weapon between the scales, and the with a crash which seemed to have split next instant its an agonist stretches out its every timber in our vessel. She swung quivering wing and expires. A bee cannot found with her broadside to us, and then be killed so suddenly, except by croshing, her bows pacted from us, and she whirled as by the sting of another bee. Sumetimes round again. A few of her shrouds were the stronger insect produces the death of thangled in our rigging, but one of our the vanquished by squeezing its chest. and the drifted astern about a cable's ous bee constantly remains, says Reaumur,
