Raleigh, October 2, 1839. READ AND PROFIT :

THE following Letter from the Hon, BEVERLY TUCKER, Professor of Law in William & Mary College, Virginia, was recently received, and affords very strong evidence of the efficacy of BECKWITE's Anti-Dyspeptic Pills, in the disease for which they were designed: *Lee's Springs, Virginia, Aug. 7th*, 1839. STR: An accidental meeting with a friend of yours has determined me to offer you the acknowledge-ments which I have long felt to be due from me, for the benefits I have received at your hands. Four-

the benefits I have received at your hands. Four-teen years ago I was left by a most malignant fover with a diseased liver, a disordered digestion, and a constitution in ruins. My Physicians permitted me to hope that with care and prudence I might drag on a few years of precarious existence, and assured me that the least indiscretion must be fatal. Soon afterwards I found myself becoming dyspeptic, and became acquainted with all that indescribable misery which dyspeptics alone can know. This, as usual, grew upon me, though less rapidly than in most al, grew upon me, though less haplory than in most cases, because a consciousness of my danger put me on my guard, and experience had made me familiar with the proper management of myself. By the constant use of the most approved remedies the progress of the disease was retarded, and my life was made tolerable, but not comfortable. I rarely ate two meals in regular succession, and for some hours of almost every day, was incapable of any exercise of thought or feeling. A prevish impatience of ex-istence occupied my whole mind.

Two years ago I met with your Anti-dyspepti will tell you that he has never seen my strength or spirits flag, or my elasticity of mind or body fail for a moment. For this it gives me pleasure to say you have my thanks, and to add the assurance of 85_tf.
