THE NEWS FROM WASHINGTON.

The contents of the Northern Mail have been made rather painfully interesting, for a few days past, by he news of the serious indisposition of President HAR-RISON. Our first certain information of it was from the Washington paper of Wednesday last, stating, evidently upon the authority of the President's medical attendants, that his complaint (which attacked him on Saturday the 27th of last month) is Pneumonia, or Pleurisy. Each of the Washington papers, of the succeeding days of the last week, have alluded to the President's indisposition in a manner to shew that it is considered serious ; the latest paper (that of Saturday last) giving reason to hope, however, that it will terminate favorably.

It is not to be wondered, that this news has produced every where a very considerable sensation.

The immediate effect of the President's confinement to his bed by indisposition, every reader will at one perceive, is to arrest, during the whole time of suc confinement, all such action on the part of the Gou ernment as depends on the personal agency of th President, and even all such as requires his signatur to authenticate the act of the subordinate department Whilst he is in the hands of the Physicians, he is course not in a situation to transact business; nor ca the members of his Cabinet, or any other person hold conferences or consultations with him. The ness of the President, therefore, whilst it lasts, op rates, to a considerable extent, to suspend the Execution functions of the Government. Matter and such as have received the previous sanction of th Executive, will go on as usual : but what we inter to say is, that there can be no originating of Executiv measures, nor any issuing of orders or commission such as require the President's signature, until h health and strength shall be sufficiently restored to enable him to resume the discharge of such official duties. Such is the immediate effect of the President's confinement by indisposition. In this view, his illness is an inconvenience to those who are dependent upon the Executive action, and the cause of suspense in the public mind as to the course of the Executive upon matters yet to be acted upon. It is not in this view, however, that the illness of the President is the subject of the gravest reflection, not unmixed with alarm. An indisposition so serious as to call for the attendance of four Physicians (as mentioned in the Washington papers) may terminate fatally; and the People may be deprived of the services of their patriotic and popular Chief Magistrate, by his death, at the very moment after placing the reins of Government in his hands. - An event, how painful in the contemplation ! Should it unhappily occur, how deeply to be deplored ! How earnestly to be deprecated in the prospect ! And, O ! how sadly to be mourned over in the reality ! Most sincerely do we hope and trust, that the country will be spared this desolation. It is not possible, however, to exclude the idea of what may happen, or to prevent the mind from looking forward to its consequences Our readers are generally too well acquainted with the Constitution of the United States not to know that, at the moment of the decease of a PRESIDENT of the U. States, the VICE-PRESIDENT becomes PRESIDENT. In the event of the death of General HARRISON (which Heaven forbid!) JOHN TYLER of Virginia, becomes President of the United States for the remainder of the term for which Gen. HARRISON has been chosen. This contingency, carefully provided for by the wisdom and forecast of the framers of the Constitution, has never occurred since the beginning of the Government. It is a yet untried part of our political system -no one can well tell how it would work. As far as depends upon the personal character and political integrity of the distinguished citizen who now occupies the second place in the Government; there is reasonable ground for confidence that he would worthily follow out the great chart of principles contained in the Inaugural Address of President HARBISON, which has met with so cordial a response from the body of the People. It is altogether probable, also, that the able and powerful Ministers who now form the Cabinet would remain in office, and afford to the new President the full benefit of their counsels. These would all be consoling circumstances. Notwithstanding all which, the death of President HARRISON would, we believe, universally, be regarded as a national calamity and a cause of deep affliction. It is not therefore at all a matter of surprise, that the unexpected news of his severe illness produces a deep and painful sensation as it spreads over the land.

## THE CAMPAIGN.

The political Ball was again set in motion at our City Hall, on Thursday last-Dr. SMITH and Judge SAURDERS, the rival candidates for the Congressional seat vacated by Dr. MONTGOMERY, appearing on that afternoon before a large number of the voters of Wake, to express their political creeds, and define their respective positions. Circumstances beyond our control prevented us from being personally present, but from what we learn; the Whigs were well satisfied with the sound Republican principles, the plain " hard sense" views of public affairs, delivered by their candidate, Dr. SMITH. In another column, will be found his very able Address, in which his views are so fully and clearly expressed, as to render unnecessary the publication of copious notes of the Doctor's Speech. with which we have been favored. Judge Saunders promised to issue shortly "a love letter" to his party, which, when received, we shall probably have occasion to notice. In the mean time, we call upon our friends to give the Doctor's Address an attentive perusal, confident that when they have done this, it will secure for him their cordial, undivided and unflinching

## From the Hillsboro' Recorder.

To the Freemen of the eighth Congressional District

At a Convention recently held in the town of Hillsborough, Dr. JAMES S. SMITH WAS nominated as the candidate of the Republidec. can party; to represent them in the next Congress of the United States, and he is now before them in that capacity. The Doctor is advantageously known in the District, as being a self-made man, who, by his industry, talents, and upright moral character, has won the respect and esteem of all who knew him personally. His sound Republican principles and political integrity have always silenced the tongue of his opponents. When but a young man, he fought gallantly on the Republican side. He entered the political arena at a time of great party excitement, and was triumphantly elected to a seat in Congress, where he maintained a high rank. He served there four years, and then returned to the walks of private life, against the will and wish of thousands of his fellowcitizens. Resuming his Profession, he ap-

plied himself with great assiduity, and was eminently useful to his suffering friends and middle of the pond (which is one of the laracquaintances.

Dr. Smith is a native born citizen of Orange, and has embarked his all within her confines. Attached as he is to the land of his birth, the theatre of his early associations; identified with her people in feeling and interest; he is just the man that should represent us in the Councils of the Nation. He possesses the main requisites of a public man. He combines sound practical sense, with a diversity of learning on various subjects. Plain and unostentatious in his manners and habits, political distinction can never make him forget that courtesy, good will and respect due to those in the humble walks of life, as becomes a servant of the people. Rally then to the polls; break the vile chains of party, and scatter them to the winds, and sustain him whose age, experience, and sound political principles, would insure you a faithful representative. Whigs of Orange, to the rescue! Gird on your armour, and be ready for the conflict. The enemy, though vanouished, is not conquered. Remember that " eternal viligance is the price of liberty ;" that the battle is not to the strong alone, but to the vigilant, the active, and the brave. Give your banner, then, to the breeze; yea, unfurl it on the outer wall. Stand to your posts; and, in the language of the gallant and intrepid Harrison on a trying occasion to his troops, I would say, "one more fire, my brave boys,

gether, as fellow-citizens of a common country, because we had passed through so long and heated a contest of parties without bloodshed or violence.

While dinner was preparing, the company amused themselves in various ways. In the gest bodies of water in the up country) they had reared a tall pole, and upon that they inscription. They had a number of boats. which were filled with men armed with muskets, and commanded by Col. Abner Parker. They then rowed out to the large

flag, and had a mock naval engagement .--They had repeated firings, and were answered with firings from the banks. The boats also had with them four beautiful flags, which I will describe presently,) and as often as the flags were waved, they were saluted with firings from the banks; and although I cannot describe the scene, it was really very imposing and interesting; and the strong commanding voice of Col. Parker, and the orderly manner in which he caused every thing to be done, added much interest to the scene.

After the amusements upon the water, the company insisted upon having a Speech .-Efforts had been made to have some speakers who were in the habit of speaking, but it was not convenient for any to attend .-Nevertheless, they must have a Speech ; and Mr. John A. Barnett was prevailed upon to make one. And although I shall attempt to give you a sketch of it, and although you may see how fit it was for the occasion, yet you can have but little idea of it, unless you had heard his most admirable manner of de-
