My windows were all open, and yet the flame of the candle scarcely fl ckered. I had become deeply interested in the pages of a new book, and was heedless of the lapse of time, or the circumstances around me, thtil suddenly a moth fluttered into the flame, and the crackling of its filmy wings attracted my attention. Upon glancing at my watch which lay beside me on the table, I found to my surprise that it was already past midnight. I determined thereupon to read no more, and shutting my book, walked across the room to draw the curtain, intending immediately to go to bed, but the moonlight shone so pleasantly in at the window, that I was forced to sit down and lean upon the sill, and gaze upon the scene. There were a few thin, whitish clouds hanging around the horizon, like the its clay tenement—and thought that, per- The coffin was lifted and placed upon a tadistant wings of an enormous spirit, but oth- chance, even at the very moment while I was ble. There is a strange fascination in sitting in the moon light-and for almost an hour I sat leaning out into the air. All was quiet save the monotonous musical gurgle of frogs in the pond, and at intervals the rustling of green leaves, as a tremulous breath of wind swelled gently and then died away, or the prolonged bark of some far-off dog. I had fallen into a vague reverie, when I heard the bell strike the hour of one. I arose and went to bed. But no sooner had I left the window than I felt a sharp pain shoot through my head, which, after recurring at intervals through the next half hour, finally settled in a raging headache. My brain throbbed violently and seemed loosed in my head, so that every motion added to the pain. It was as if an iron hand compressed my temples within its griping fingers. At last the dim, whispering hum about the room ceased—the clock struck loudly, and the clergyman's voice repeated those first sentences in the service for the dead. -" I am the resurrection and the life," &c.
