Owing to the length of the Session, which embraces a period of nine months, three Professors are enabled to perform all the duties which in other medical in-stitutions are usually assigned to six; and the students are seldom required to attend more than two lectures on the same day. By this arrangement, the students have an opportunity of being well grounded in Anahave an opportunity of being well grounded in Ana-tomy, Physiology, and other elementary branches of Medical Science, before they investigate their applications in connection with the study of the practice of Médicine and Surgery.

Immediately before each lecture, the students are bjected to a full and rigid examination on the preeding lecture, or on portions of approved text books It is apparent, that the plan. of which the outlines have been briefly stated, is one which allows the student to commence as well as to complete his medical studies in the institution; and presents a happy combination of the advantages of the system of instruction by pri-

vate pupilage and that of public lectures. Any person of approved moral conduct may offer as a candidate, and receive the degree of M.
